POLLUTION FREE CELEBRATIONS: AWARENESS ON THE HAZARDS OF BURSTING CRACKERS

Date :12.11.2020
Venue : San Jose Auditorium
Aim of the Programme : To educate the people about the harms of bursting crackers.
Beneficiaries : I & II NSS Students

No of Beneficiaries of the Programme : 43

Highlights of the Awareness Programme:

- Harmfulness of bursting crackers
- Impact of crackers on Air and Noise Pollution
- Awareness posters on the hazardous effects of crackers on the community

Programme Highlight:

As happens every year, unacceptably high air and noise pollution levels were recorded across the country due to the bursting of firecrackers during Diwali. NSS units of Fatima College directed NSS volunteers for a time limit for firecracker. There is also a great need to sensitize common people about hazards of firecrackers and the results of air and noise pollution. NSS volunteers were taught not to fire crackers NSS volunteers spread the same awareness and educated the hazards of crackers to the community people by designing attractive and informative posters and by spreading the same by using technology through social media. NSS students clearly pointed out following usage of Chemicals in Crackers and its hazardous effects on health.

- Copper: Irritates the respiratory tract.
- Cadmium: Leads to anemia by reducing the capacity of blood to carry oxygen.
- Magnesium: Metal fume fever is caused by Magnesium fumes.
- Sodium: It is a highly reactive element and causes burns when it is combined with moisture.

A step taken in the right direction is bound to give desired result.
