The Intellectual Property Rights Cell conducted a session on 25.11.2020 between 2.00 p.m - 3.00 p.m to discuss the “Importance of Patent Rights” among the members of Research Advisory committee.

Dr. Vasantha Esther Rani, Dean of Research (Shift I), highlighted the importance of patent rights and clarified the questions raised on start ups and small business. As innovation due to the rapidly advancing technology increasingly becomes vital to the college education, campuses are stepping ahead to protect the [Intellectual Property Rights](#) (IPRs) of their students and staff members.

IPR cell aids students to promote their research work. And, it further helps the students in the commercialization of their products, ideas, etc., by attracting potential buyers. Patent registration helps in restricting the competition in terms of commercializing the particular invention in the market. This right further places the inventor in a superior position in the negotiation table for royalty when we decide to license the product. The Research Advisory committee members discussed about their own projects and the ways of converting into an effective project in the research forum.

The Research Advisory committee members were also motivated to highlight the importance of innovation and patent rights to their Department staff members and students.

By the end of the meeting, staff members were oriented to involve their post graduate students and research scholars to filter their varied innovative ideas into a structured format to be recognized as registered patents. The meeting concluded with vote of thanks proposed by Dr. S. L. Kumari, Dean of Research, Shift II.
