

# **FATIMA COLLEGE (AUTONOMOUS)**

**Re-Accredited with “A” Grade by NAAC (3<sup>rd</sup> Cycle)  
74<sup>th</sup> Rank in India Ranking 2020 (NIRF) by MHRD  
Maryland, Madurai- 625 018, Tamil Nadu, India**

**NAME OF THE DEPARTMENT: INFORMATION TECHNOLOGY**

**NAME OF THE PROGRAMME : M.Sc.**

**PROGRAMME CODE : PSIT**

**ACADEMIC YEAR : 2021-2022**

**VISION OF THE DEPARTMENT**

To be the center of excellence in training the students in Information Technology to excel both as a professional and as a human in the society.

**MISSION OF THE DEPARTMENT**

- ✂ Empower women by teaching them technology and life lessons.
- ✂ Encourage students to be the change in the society.
- ✂ Educate students and prepare them in various aspects of IT industry.
- ✂ Provide leadership quality for effective strategic and tactical planning in use of technology.
- ✂ Instill the power of faith and hope, so they could be the blessing to their next generation.

**PROGRAMME EDUCATIONAL OBJECTIVES (PEO)**

|              |   |
|--------------|---|
| <b>PEO 1</b> | Our graduates will be academic, digital and information literates; creative, inquisitive, innovative and committed researchers who would be desirous for the “more” in all aspects  |
| <b>PEO 2</b> | They will be efficient individual and team performers who would deliver excellent professional service exhibiting progress, flexibility, transparency, accountability and in taking up initiatives in their professional work |
| <b>PEO 3</b> | The graduates will be effective managers of all sorts of real – life and professional circumstances, making ethical decisions,  |

|              |  |
|--------------|--|
|              | pursuing excellence within the time framework and demonstrating apt leadership skills  |
| <b>PEO 4</b> | They will engage locally and globally evincing social and environmental stewardship demonstrating civic responsibilities and employing right skills at the right moment. |

### GRADUATE ATTRIBUTES (GA)

Fatima College empowers her women graduates holistically. A Fatimite achieves all-round empowerment by acquiring Social, Professional and Ethical competencies. A graduate would sustain and nurture the following attributes:

| <b>I. SOCIAL COMPETENCE</b> |  |
|-----------------------------|--|
| <b>GA 1</b>                 | Deep disciplinary expertise with a wide range of academic and digital literacy   |
| <b>GA 2</b>                 | Hone creativity, passion for innovation and aspire excellence  |
| <b>GA 3</b>                 | Enthusiasm towards emancipation and empowerment of humanity  |
| <b>GA 4</b>                 | Potentials of being independent  |
| <b>GA 5</b>                 | Intellectual competence and inquisitiveness with problem solving abilities befitting the field of research                           |
| <b>GA 6</b>                 | Effectiveness in different forms of communications to be employed in personal and professional environments through varied platforms |
| <b>GA 7</b>                 | Communicative competence with civic, professional and cyber dignity and decorum  |

|                                    |   |
|------------------------------------|---|
| <b>GA 8</b>                        | Integrity respecting the diversity and pluralism in societies, cultures and religions   |
| <b>GA 9</b>                        | All – inclusive skill - sets to interpret, analyse and solve social and environmental issues in diverse environments  |
| <b>GA 10</b>                       | Self-awareness that would enable them to recognise their uniqueness through continuous self-assessment in order to face and make changes building their strengths and improving on their weaknesses |
| <b>GA 11</b>                       | Finesse to co-operate exhibiting team-spirit while working in groups to achieve goals   |
| <b>GA 12</b>                       | Dexterity in self-management to control their selves in attaining the kind of life that they dream for  |
| <b>GA 13</b>                       | Resilience to rise up instantly from their intimidating setbacks  |
| <b>GA 14</b>                       | Virtuosity to use their personal and intellectual autonomy in being life-long learners  |
| <b>GA 15</b>                       | Digital learning and research attributes  |
| <b>GA 16</b>                       | Cyber security competence reflecting compassion, care and concern towards the marginalised  |
| <b>GA 17</b>                       | Rectitude to use digital technology reflecting civic and social responsibilities in local, national and global scenario   |
| <b>II. PROFESSIONAL COMPETENCE</b> |   |
| <b>GA 18</b>                       | Optimism, flexibility and diligence that would make them professionally competent   |
| <b>GA 19</b>                       | Prowess to be successful entrepreneurs and employees of trans-national societies  |
| <b>GA 20</b>                       | Excellence in Local and Global Job Markets  |

|                                |   |
|--------------------------------|---|
| <b>GA 21</b>                   | Effectiveness in Time Management  |
| <b>GA 22</b>                   | Efficiency in taking up Initiatives   |
| <b>GA 23</b>                   | Eagerness to deliver excellent service  |
| <b>GA 24</b>                   | Managerial Skills to Identify, Commend and tap Potentials   |
| <b>III. ETHICAL COMPETENCE</b> |   |
| <b>GA 25</b>                   | Integrity and discipline in bringing stability leading a systematic life promoting good human behaviour to build better society |
| <b>GA 26</b>                   | Honesty in words and deeds  |
| <b>GA 27</b>                   | Transparency revealing one's own character as well as self-esteem to lead a genuine and authentic life                          |
| <b>GA 28</b>                   | Social and Environmental Stewardship  |
| <b>GA 29</b>                   | Readiness to make ethical decisions consistently from the galore of conflicting choices paying heed to their conscience         |
| <b>GA 30</b>                   | Right life skills at the right moment   |

### PROGRAMME OUTCOMES (PO)

The learners will be able to

|             |  |
|-------------|--|
| <b>PO 1</b> | Apply acquired scientific knowledge to solve major and complex issues in the society/industry. |
| <b>PO 2</b> | Attain research skills to solve complex cultural, societal and environmental issues.           |

|             |  |
|-------------|--|
| <b>PO 3</b> | Employ latest and updated tools and technologies to solve complex issues.                          |
| <b>PO 4</b> | Demonstrate Professional Ethics that foster Community, Nation and Environment Building Initiatives |

### PROGRAMME SPECIFIC OUTCOMES (PSO)

On completion of M.Sc.IT programme, the graduates would be able to

|              |   |
|--------------|---|
| <b>PSO 1</b> | Understand the concepts and applications in the field of Information Technology like Web designing and development, Mobile application development, and Network communication technologies. |
| <b>PSO 2</b> | Ability to understand the structure and development methodologies of software systems.  |
| <b>PSO 3</b> | Apply the learning from the courses and develop applications for real world problems.   |
| <b>PSO 4</b> | Understand the technological developments in the usage of modern design and development tools to analyze and design for a variety of applications.  |
| <b>PSO 5</b> | Familiarity and practical competence with a broad range of programming language and open source platforms.  |
| <b>PSO 6</b> | Demonstrate the understanding of the principles and working of the hardware and software aspects of computer systems  |
| <b>PSO 7</b> | Possess professional skills and knowledge of software design process.   |
| <b>PSO 8</b> | Be acquainted with the contemporary issues, latest trends in technological development and thereby innovate new ideas and solutions to existing problems.                                   |

|              |  |
|--------------|--|
| <b>PSO 9</b> | Communicate in both oral and written forms, demonstrating the practice of professional ethics and the concerns for social welfare. |
|--------------|--|

**COURSE DESCRIPTION**

This course provides various techniques of Java Programming and help them to create effective programs in this language.

**COURSE OBJECTIVES**

This course is aimed to apply variety of technologies in JAVA for different platforms.

**UNITS****UNIT –I INTRODUCTION& BASIC CONCEPTS****(11 HRS.)**

Java Program Structure-Java Tokens-Java Statements- Implementing a Java Program-Java Virtual machine. Packages: Introduction- Java API Packages- Using System Packages- Nesting Conventions-Creating Packages- Accessing a Package- Using a Package- Adding a Class to a Package- Hiding Classes Applet Programming: Introduction- How Applets Differ from Applications- Preparing to Write Applets – Building Applet Code- Applet Life Cycle- Creating an Executable Applet- Designing a web page- Applet Tag-Adding Applet to HTML File- Running the Applet- More about Applet Tag- Passing Parameters to Applets- Aligning the Display – More About HTML Tags- **Displaying Numerical Values- Getting input from the user (Self Study)**

**UNIT –II SWINGS****(11 Hrs)**

GUI Programming with Swing: Introducing Swing – Two key swing features – The MVC Connection – Components and Containers – Swing Packages – Event Handling – Swing Applet – Painting in Swing.

Exploring Swing: JLabel and ImageIcon – JTextField – The Swing Buttons – JTabbedPane – **JScrollPane – JList – JComboBox – Trees – JTable (Self Study).**

**UNIT –III: JDBC****(12 Hrs)**

JDBC- Java Database Connectivity: Introducing JDBC Driver Types - Creating Your First JDBC Program – Performing Batch Updates – Using Save points - Configuring the JDBC-ODBC Bridge- Explaining Database Connection pools and data sources-**Revisiting DBProcessor-Using the RowSet Interface (Self Study)**

**UNITIV : J2ME Overview****(12 Hrs)**

Inside J2ME - J2ME and Wireless devices – J2ME Architecture – MIDlet Programming- J2ME Software development kits – J2ME Style- Multiple MIDlets- J2ME wireless toolkit.

**UNIT V : J2ME UI****(12 Hrs)**

Commands- Items- Event Processing- High level Display : Screens – Low level Display :Canvas

**UNIT –VI DYNAMISM (Evaluation Pattern-CIA only)****(3 Hrs)**

## Implementation of Real-time application using JAVA

**COURSE OUTCOMES**

On the successful completion of the course, students will be able to:

| NO.  | COURSE OUTCOMES  | KNOWLEDGE LEVEL<br>(ACCORDING TO REVISED BLOOM'S TAXONOMY) | PSOs ADDRESSED |
|------|--|--|----------------|
| CO 1 | To understand the structure and model of the Java programming language.          | K2   | PSO1, PSO4     |
| CO 2 | To explain the concepts of Packages, Interfaces and strings.                     | K2, K3   | PSO4, PSO5     |
| CO 3 | To develop software implementing Exception handling mechanisms                   | K3, K4   | PSO3, PSO6     |
| CO 4 | To design software for database connectivity and able to design GUI applications | K3, K4   | PSO3, PSO9     |
| CO 5 | To implement server side programming using SERVLETS                              | K4, K5   | PSO6, PSO8     |

### Mapping of COs with PSOs

| CO/<br>PSO | PSO1 | PSO2 | PSO3 | PSO4 | PSO5 | PSO6 | PSO7 | PSO8 | PSO9 |

SEMESTER –I

*For those who joined in 2021 onwards*

| PROGRAMME CODE | COURSE CODE | COURSE TITLE   | CATEGORY | HRS/WEEK | CREDITS |
|----------------|-------------|----------------|----------|----------|---------|
| PSIT           | 21PG1IT2    | SOFT COMPUTING | Lecture  | 4        | 4       |

**COURSE DESCRIPTION**

This course emphasizes learning various soft computing techniques.

**COURSE OBJECTIVES**

To facilitate the student to apply soft computing techniques to solve problems.

**UNITS****UNIT –I INTRODUCTION (12 HRS.)**

Introduction-Artificial Intelligence-Artificial Neural Networks-Fuzzy Systems-Genetic Algorithm and Evolutionary Programming-Swarm Intelligent Systems-Classification of ANNs-McCulloch and Pitts Neuron Model-Learning Rules: Hebbian and Delta- Perceptron Network-Adaline Network-Madaline Network.

**UNIT –II: ARTIFICIAL NEURAL NETWORKS (12 HRS.)**

Back propagation Neural Networks – Kohonen Neural Network -Learning Vector Quantization -Hamming Neural Network – Hopfield Neural Network-Bi-directional Associative Memory -Adaptive Resonance Theory Neural Networks- Support Vector Machines – Spike Neuron Models.

**UNIT –III: FUZZY SYSTEMS (12 HRS.)**

Introduction to Fuzzy Logic, Classical Sets and Fuzzy Sets – Classical Relations and Fuzzy Relations -Membership Functions -Defuzzification – Fuzzy Arithmetic and Fuzzy Measures -Fuzzy Rule Base and Approximate Reasoning – Introduction to Fuzzy Decision Making.

**UNIT –IV :GENETIC ALGORITHMS****(12 HRS.)**

Basic Concepts- Working Principles -Encoding- Fitness Function – Reproduction -Inheritance Operators – Cross Over – Inversion and Deletion -Mutation Operator – Bit-wise Operators -Convergence of Genetic Algorithm.

**UNIT –V: SWARM INTELLIGENT SYSTEM****(11 HRS.)**

Introduction – Ant Colony System – Any colony Optimization – particle Swarm Intelligent Systems – Artificial Bee colony System

**UNIT –VI: DYNAMISM (Evaluation Pattern-CIA only)****( 1 HRS.)**

Ant colony System

**TEXT BOOK:**

1. N.P.Padhy, S.P.Simon, “Soft Computing with MATLAB Programming”, Oxford University Press, 2015.

Unit I – Chapter 1

Unit II – Chapter 3, 4

Unit III – Chapter 5, 6

Unit IV – Chapter 7

Unit V – Chapter 8

| <b>PSIT</b>        | <b>21PG1IT<br/>3</b> | <b>DATA<br/>MANAGEMENT<br/>USING R-<br/>PROGRAMMMI<br/>NG</b> | <b>Lecture</b> | <b>4</b>     | <b>4</b>    |

**COURSE DESCRIPTION:**

This course provides an in-sight to learn and understand the concepts of relational database management and its programming using R.

**COURSE OBJECTIVES :**

The course is aimed to expose the student to the fundamental concepts and techniques in database use and development as well provides a foundation for data management and storage using R.

**UNITS**

**UNIT I :DATA INPUT,OUTPUT & MANAGEMENT (11 Hrs)**

Input-Output- Structure and Metadata – Derived variables and data manipulation – Merging, combining, and subsetting datasets – data and time variables – Probability distributions and random number generation – Mathematical functions – Matrix operations.

**UNIT II : PROGRAMMING & COMMON STATISTICAL PROCEDURES**

**(11 Hrs)**

Control flow, programming and data generation – functions – Integration with the operating system – Summary statistics – Contingency tables – Tests for continuous variables.

**UNIT –III :LINEAR REGRESSION AND ANOVA (11 Hrs)**

Model fitting – Tests, contrasts, and linear functions of parameters – Model results and diagnostics – Model parameters and results – Generalized linear model – Further generalization – Robust methods – Models for correlated data – Survival analysis.

**UNIT –IV : GRAPHICAL COMPENDIUM AND CONFIGURATIONS (11 Hrs)**

Univariate plots – Univariate plots by grouping variable – Bivariate plots – Multivariate plots – Special purpose plots - Adding elements – Options and parameters – saving graphs.

**UNIT –V: SIMULATIONS ADVANCED STATISTICAL METHODS (11 Hrs)**

Generating data – Simulation applications – Bayesian methods – Propensity scores – Bootstrapping – Missing data.

**UNIT –VI DYNAMISM (Evaluation Pattern-CIA only) (5 Hrs)**

R Data Frame: Create, Append, Select, Subset - R Vs Python - SAS Vs R

**TEXT BOOKS :**

1. “Using R and RStudio for DataManagement, Statistical Analysis, and Graphics” , by Nicholas J. Horton and Ken Kleinman, CRC Press, New York, Second Edition
2. “Beginning R – The Statistical Programming Language”, by Dr. Mark Gardener, Wiley India Pvt., Ltd., 2017.

**COURSE CONTENTS & LECTURE SCHEDULE:**

| <b>Module No.</b>  | <b>Topic</b>   | <b>No. of Lectures</b> | <b>Teaching Pedagogy</b> | <b>Teaching Aids</b> |
|--|--|------------------------|--------------------------|----------------------|
| <b>UNIT -1 DATA INPUT,OUTPUT &amp; MANAGEMENT</b>              |  |                        |                          |                      |
| 1.1  | Input-Output- Structure and Metadata                   | 1                      | Discussion               | Black Board          |
| 1.2  | Derived variables and data manipulation                | 1                      | Chalk & Talk             | Black Board          |
| 1.3  | Merging, combining, and sub setting datasets           | 2                      | Lecture                  | LCD                  |
| 1.4  | Data and time variables                                | 2                      | Discussion               | Google classroom     |
| 1.5  | Probability distributions and random number generation | 2                      | Chalk & Talk             | Black Board          |
| 1.6  | Mathematical functions – Matrix operations.            | 2                      | Chalk & Talk             | Black Board          |
| <b>UNIT -2 PROGRAMMING &amp; COMMON STATISTICAL PROCEDURES</b> |  |                        |                          |                      |
| 2.1  | Control flow   | 1                      | Lecture                  | PPT & White board    |
| 2.2  | Programming and data generation                        | 2                      | Chalk & Talk             | Green Board          |
| 2.3  | Functions  | 2                      | Chalk & Talk             | Black Board          |
| 2.4  | Integration with the operating system                  | 2                      | Chalk & Talk             | Black Board          |

| <b>Module No.</b>                                       | <b>Topic</b>   | <b>No. of Lectures</b> | <b>Teaching Pedagogy</b> | <b>Teaching Aids</b> |
|---|--|------------------------|--------------------------|----------------------|
| 2.5   | Summary statistics   | 2                      | Chalk & Talk             | Black Board          |
| 2.6   | Contingency tables – Tests for continuous variables.                 | 2                      | Chalk & Talk             | Black Board          |
| <b>UNIT – 3 LINEAR REGRESSION AND ANOVA</b>             |  |                        |                          |                      |
| 3.1   | Model fitting – Tests, contrasts, and linear functions of parameters | 1                      | Discussion               | PPT & White board    |
| 3.2   | Model results and diagnostics  | 2                      | Chalk & Talk             | Green Board          |
| 3.3   | Model parameters and results   | 2                      | Chalk & Talk             | Black Board          |
| 3.4   | Generalized linear model   | 2                      | Chalk & Talk             | Black Board          |
| 3.5   | Further generalization – Robust methods                              | 2                      | Discussion               | Black Board          |
| 3.6   | Models for correlated data – Survival analysis.                      | 2                      | Lecture                  | PPT & White board    |
| <b>UNIT – 4 GRAPHICAL COMPENDIUM AND CONFIGURATIONS</b> |  |                        |                          |                      |
| 4.1   | Univariate plots   | 1                      | Discussion               | PPT & White board    |
| 4.2   | Univariate plots by grouping variable                                | 2                      | Chalk & Talk             | Green Board          |
| 4.3   | Bivariate plots – Multivariate plots                                 | 2                      | Chalk & Talk             | Black Board          |

| <b>Module No.</b>  | <b>Topic</b>                            | <b>No. of Lectures</b> | <b>Teaching Pedagogy</b> | <b>Teaching Aids</b> |
|--|---|------------------------|--------------------------|----------------------|
| 4.4  | Special purpose plots                   | 2                      | Chalk & Talk             | Black Board          |
| 4.5  | Adding elements                         | 2                      | Discussion               | Black Board          |
| 4.6  | Options and parameters – saving graphs. | 2                      | Lecture                  | Green Board          |
| <b>UNIT – 5 SIMULATIONS ADVANCED STATISTICAL METHODS</b> |   |                        |                          |                      |
| 5.1  | Generating data                         | 1                      | Lecture                  | PPT & White board    |
| 5.2  | Simulation applications                 | 2                      | Chalk & Talk             | Black Board          |
| 5.3  | Bayesian methods                        | 2                      | Lecture                  | Black Board          |
| 5.4  | Propensity scores                       | 2                      | Chalk & Talk             | Black Board          |
| 5.5  | Bootstrapping                           | 2                      | Chalk & Talk             | Black Board          |
| 5.6  | Missing data.                           | 2                      | Chalk & Talk             | Black Board          |
| <b>UNIT –6 DYNAMISM</b>                                  |   |                        |                          |                      |
| 6.1  | R Data Frame: Create, Append, Select    | 2                      | Discussion               | Black Board          |
| 6.2  | Subset - R Vs Python - SAS Vs R         | 2                      | Discussion               | Black Board          |

***\*The best out of two will be taken into account***

## COURSE OUTCOMES

On the successful completion of the course, students will be able to:

| NO.  | COURSE OUTCOMES   | KNOWLEDGE LEVEL<br>(ACCORDING TO REVISED BLOOM'S TAXONOMY) | PSOs ADDRESSED |
|------|---|--|----------------|
| CO 1 | To understand the basic concepts in R- Programming.           | K2   | PSO1, PSO2     |
| CO 2 | Illustrate various statements used in R-Programming           | K2, K3   | PSO3, PSO5     |
| CO 3 | Analyze various techniques to import and export the data set. | K3, K4   | PSO5, PSO6     |
| CO 4 | To know about the aggregate functions.                        | K4, K5   | PSO6, PSO7     |
| CO 5 | Implementation of R-Programming in current scenario           | K4, K5   | PSO8, PSO9     |

### Mapping COs Consistency with PSOs

| CO/<br>PSO | PS<br>O1 | PSO<br>2 | PSO<br>3 | PSO<br>4 | PSO<br>5 | PSO<br>6 | PSO<br>7 | PSO<br>8 | PSO<br>9 |
|------------|----------|----------|----------|----------|----------|----------|----------|----------|----------|
| CO1        | 3        | 3        | 1        | 1        | 1        | 1        | 1        | 1        | 1        |
| CO2        | 1        | 1        | 3        | 1        | 3        | 1        | 1        | 1        | 1        |
| CO3        | 2        | 1        | 1        | 1        | 3        | 3        | 1        | 1        | 1        |
| CO4        | 1        | 1        | 1        | 2        | 1        | 3        | 3        | 1        | 1        |
| CO5        | 1        | 1        | 2        | 1        | 2        | 1        | 1        | 3        | 3        |

**Mapping of COs with Pos**

| CO/ PSO | PO1 | PO2 | PO3 | PO4 |
|---------|-----|-----|-----|-----|
| CO1     | 3   | 2   | 1   | 1   |
| CO2     | 3   | 2   | 1   | 1   |
| CO3     | 3   | 2   | 1   | 1   |
| CO4     | 3   | 2   | 1   | 1   |
| CO5     | 3   | 2   | 1   | 1   |

**Note:** ♦ Strongly Correlated – 3      ♦ Moderately Correlated – 2

| <b>PSIT</b>        | <b>21PG1IT4</b> | <b>DISTRIBUTED<br/>OPERATING<br/>SYSTEM</b> | <b>Lecture</b> | <b>4</b>     | <b>4</b>    |

**COURSE DESCRIPTION**

To understand the concept of design and implementation in the context of distributed operating systems.

**COURSE OBJECTIVES**

To apply the concepts of distributed systems in designing large systems, and will additionally apply these concepts to develop sample systems.

To recognize the inherent difficulties that arise due to distribution of computing resources.

**UNITS****UNIT –I INTRODUCTION****(10 Hrs)**

Fundamentals – Distributed computing systems – Evolution of distributed computing systems – Distributed computing system models – Popularity of distributed computing systems – Distributed operating system – **issues in designing a distributed operating system– Introduction to distributed computing environment(DCE)(Self Study).**

**UNIT –II MESSAGE PASSING****(11 Hrs)**

Message Passing – Introduction – Desirable features of a good message-passing system – Issues in IPC by message passing – Synchronization – Buffering – Multidatagram messages – Remote

Procedure Calls – Introduction – The RPC model – Transparency of RPC – Implementing RPC mechanism.

### **UNIT –III DISTRIBUTED SHARED MEMORY (12 Hrs)**

Distributed Shared Memory – Introduction – General architecture of DSM systems – Design and implementation issues of DSM – Synchronization – Introduction – Clock synchronization – Election Algorithms. **Resource Management – Introduction – Desirable features of a good global scheduling algorithm – load sharing approach. (Self Study)**

### **UNIT –IV PROCESS MANAGEMENT (12 Hrs)**

Process Management – Introduction – Process migration - Distributed File Systems – Introduction – Desirable features of a good distributed file system – File models– File-Accessing models – File-Sharing semantics – **File-Caching schemes – File replication – Fault tolerance. (Self Study)**

### **UNIT –V LINUX (12 Hrs)**

The Linux Shell and File Structure: The Shell – The Command Line – History – Filename Expansion – Standard Input/Output and Redirection – Pipes – Ending Processes – The shell scripts and Programming –Shell Variables – Shell Scripts – Environment Variables and Subshells – Control Structures – **TCSH/C Shell Control structures.(Self Study)**

### **UNIT –VI DYNAMISM (Evaluation Pattern-CIA only) ( 3 Hrs.)**

Analysis of different types of Operating systems in real time applications.

**COURSE CONTENTS & LECTURE SCHEDULE**

| Module No.                     | Topic   | No. of Lectures | Teaching Pedagogy | Teaching Aids         |
|--------------------------------|---|-----------------|-------------------|-----------------------|
| <b>UNIT -1 INTRODUCTION</b>    |   |                 |                   |                       |
| 1.1                            | Fundamentals – Distributed computing systems  | 1               | Chalk & Talk      | Black Board           |
| 1.2                            | Evolution of distributed computing systems  | 2               | Chalk & Talk      | LCD                   |
| 1.3                            | Distributed computing system models – Popularity of distributed computing systems             | 4               | Lecture           | PPT & White board     |
| 1.4                            | Distributed operating system – Issues in designing a distributed operating system(Self Study) | 1               | Discussion        | Google Classroom      |
| 1.5                            | Introduction to distributed computing environment(DCE)  | 2               | Lecture           | Black Board           |
| <b>UNIT -2 MESSAGE PASSING</b> |   |                 |                   |                       |
| 2.1                            | Introduction – Desirable features of a good message-passing system                            | 1               | Lecture           | Green Board<br>Charts |
| 2.2                            | Issues in IPC by message passing – Synchronization – Buffering                                | 2               | Chalk & Talk      | Green Board           |
| 2.3                            | Multidatagram messages – Remote Procedure Calls   | 3               | Chalk & Talk      | Black Board           |
| 2.4                            | Introduction – The RPC model – Transparency of RPC  | 3               | Chalk & Talk      | Black Board           |

| <b>Module No.</b>                        | <b>Topic</b>  | <b>No. of Lectures</b> | <b>Teaching Pedagogy</b> | <b>Teaching Aids</b>  |
|--|---|------------------------|--------------------------|-----------------------|
| 2.5                                      | Implementing RPC mechanism  | 2                      | Chalk & Talk             | Black Board           |
| <b>UNIT -3 DISTRIBUTED SHARED MEMORY</b> |   |                        |                          |                       |
| 3.1                                      | Introduction – General architecture of DSM systems  | 3                      | Chalk & Talk             | Black Board           |
| 3.2                                      | Design and implementation issues of DSM   | 3                      | Lecture                  | Green Board<br>Charts |
| 3.3                                      | Synchronization – Introduction – Clock synchronization – Election Algorithms.   | 3                      | Chalk & Talk             | Black Board           |
| 3.4                                      | Resource Management – Introduction – Desirable features of a good global scheduling algorithm – load sharing approach. (Self Study) | 3                      | Discussion               | Google Classroom      |
| <b>UNIT - 4 PROCESS MANAGEMENT</b>       |   |                        |                          |                       |
| 4.1                                      | Introduction – Process migration  | 2                      | Chalk & Talk             | Black Board           |
| 4.2                                      | Distributed File Systems – Introduction – Desirable features of a good distributed file system                                      | 3                      | Lecture                  | Green Board           |
| 4.3                                      | File models– File-Accessing models  | 3                      | Chalk & Talk             | Black Board           |
| 4.4                                      | File-Sharing semantics  | 2                      | Lecture                  | Green Board           |
| 4.5                                      | File-Caching schemes – File replication – Fault tolerance. (Self Study)   |                        | Discussion               | Google Classroom      |

| Module No.               | Topic   | No. of Lectures | Teaching Pedagogy     | Teaching Aids    |
|--------------------------|---|-----------------|-----------------------|------------------|
| <b>UNIT - 5 LINUX</b>    |   |                 |                       |                  |
| 5.1                      | The Shell – The Command Line – History – Filename Expansion                 | 3               | Chalk &Talk           | Black Board      |
| 5.2                      | Standard Input/Output and Redirection – Pipes – Ending Processes            | 3               | Lecture               | Green Board      |
| 5.3                      | The shell scripts and Programming –Shell Variables                          | 3               | Chalk & Talk          | Black Board      |
| 5.4                      | Shell Scripts – Environment Variables and Sub shells -Control Structures    | 2               | Chalk & Talk          | Black Board      |
| 5.5                      | TCSH/C Shell Control structures.(Self Study)                                | 1               | Discussion            | Google Classroom |
| <b>UNIT – 6 DYNAMISM</b> |   |                 |                       |                  |
| 6.1                      | Analysis of different types of Operating systems in real time applications. | 3               | Assignment submission | Google Classroom |

## COURSE OUTCOMES

On the successful completion of the course, students will be able to:

| NO.         | COURSE OUTCOMES  | KNOWLEDGE LEVEL<br>(ACCORDING TO REVISED BLOOM'S TAXONOMY) | PSOs ADDRESSED |
|-------------|--|--|----------------|
| <b>CO 1</b> | Understand the core concepts of distributed systems.       | K2   | PSO1, PSO2     |
| <b>CO 2</b> | Analyze various message passing mechanisms with its model. | K2, K4   | PSO4, PSO6     |

| <b>NO.</b>  | <b>COURSE OUTCOMES</b>  | <b>KNOWLEDGE LEVEL<br/>(ACCORDING TO REVISED BLOOM'S TAXONOMY)</b> | <b>PSOs ADDRESSED</b> |
|-------------|---|--|-----------------------|
| <b>CO 3</b> | Identify the inherent difficulties that arise due to distribution of computing resources. | K3& K4   | PSO3,PSO6             |
| <b>CO 4</b> | Explain migration with the process management policies.                                   | K2, K3   | PSO2,PSO5             |
| <b>CO 5</b> | Explain the basic concepts, design and structure of the LINUX operating system.           | K2 & K4  | PSO4,PSO6             |

### Mapping of COs with PSOs

| <b>CO / PSO</b> | <b>PS O1</b> | <b>PSO 2</b> | <b>PSO 3</b> | <b>PSO 4</b> | <b>PSO 5</b> | <b>PSO 6</b> | <b>PSO 7</b> | <b>PSO 8</b> | <b>PSO 9</b> |

**COURSE DESCRIPTION**

This course provides programming skills on various concepts in JAVA.

**COURSE OBJECTIVES**

This course is aimed to learn and practice the various programming concepts in JAVA

**UNITS**

1. Programs using the concept of Overloading.
2. Programs using the concept of Inheritance and Constructor
3. Programs using the concept of Interface and Overriding .
4. Programs using the concept of Built\_in and User defined Exception Handling.
5. Programs using the concept of Threads.
6. Programs using the concept of String Handling.
7. Programs using the concept of Packages
8. Programs for creating Applet.
9. Programs using Event Handling.
10. Programs using the concept of swing
11. Programs using the concept of J2ME

**12. Programs using Data Base Connectivity****COURSE CONTENTS & LECTURE SCHEDULE:**

## COURSE OUTCOMES

On the successful completion of the course, students will be able to:

| NO.  | COURSE OUTCOMES   | KNOWLEDGE LEVEL<br>(ACCORDING TO REVISED BLOOM'S TAXONOMY) | PSOs ADDRESSED |
|------|---|--|----------------|
| CO 1 | To understand the concept of Object Oriented Programming & Java Programming Constructs.                           | K4 & K5  | PSO3,PSO5      |
| CO 2 | To practice the concepts of operators, classes, objects, inheritance, packages, Enumeration and various keywords. | K4 & K5  | PSO1,PSO2      |
| CO 3 | To apply exception handling mechanisms.   | K4 & K5  | PSO6,PSO9      |
| CO 4 | To design the applications of Java & Java applet, Swings and JDBC   | K4 & K5  | PSO7,PSO9      |
| CO 5 | To Analyze and implement J2ME   | K4 & K5  | PSO8,PSO9      |

### Mapping of COs with PSOs

| <b>PSIT</b>        | <b>21PG1IT<br/>6</b> | <b>LAB II: DATA<br/>MANAGEMENT<br/>USING R -<br/>PROGRAMMIN<br/>G</b> | <b>Practical</b> | <b>5</b>     | <b>3</b>    |

**COURSE DESCRIPTION**

This course provides to understand the Data storage, management and organization techniques.

**COURSE OBJECTIVES**

The major objective of this lab is to provide a strong formal foundation in database concepts, technology, relating to query processing in SQL and PLSQL

**PROGRAM LIST**

1. Arithmetic Operations
2. Access-system date – create date, time variables, extract month, weekdays, quarters and year details
3. Scanning data
4. Scanning character
5. Setting location
6. Data entry using spreadsheet
7. Mathematical functions
8. List, vector and matrix
9. List – a combination of string, numbers, vectors and logical values
10. List-vector, matrix, data about list data
11. List- add element
12. List- element selection
13. Array
14. Array concatenation

15. Framing
16. Factors
17. Matrix- create from vector, combine vectors
18. Matrix creation, addition, transpose, multiplication
19. Matrix- dimension check, determinant matrix, subset of matrix, diagonal matrix, vector from matrix, vector diagonal matrix
20. For loop to print characters from a string
21. For loop to find sum of real numbers
22. While loop to print a substring of a string
23. While loop to convert decimal to binary
24. If- else – to check whether the given number is +ve, -ve or zero
25. Nested if -else to check the occurrence of a string in a list
26. Nested if – to find leap year or not
27. Switch – perform arithmetic calculator
28. Switch – print area of shapes
29. Fibonacci series
30. Factorial of a given number
31. Program to Check prime number or not
32. Program to check Armstrong number or not
33. String palindrome
34. Number palindrome
35. Age calculation from given Date of birth
36. Function – to check even or odd
37. Function – area of shapes (square, rectangle, circle) in a single function
38. Function – to find LCM
39. Function – arithmetic calculator
40. Inline function – to print the result of a mathematical expression
41. Create a dataset using merging
42. Dataset creation for student mark list-export as csv file
43. Selection queries in student dataset
44. Dataset – create and select values from employee dataset
45. Student dataset- create and update with total and grade columns after calculation
46. Linear regression for height and weight data- predict and assess the prediction using R2 score
47. Multiple regression – mtcars
48. Multiple regression – student dataset
49. ANOVA – compare linear and multiple regressions – mtcars
50. ANOVA – compare two models – student dataset
51. Survival analysis – Kaplan – Meier Method
52. Survival analysis – Cox Proportional hazard model
53. Univariate plots
54. Bivariate plots
55. Multivariate plots

56. Pie chart – students’ details
57. Pie chart – car showroom
58. Special purpose plotting (12 programs)
59. Saving plots in different format
60. Generate a linear model using normal distribution(rnorm,dnorm,rpois)
61. Simulating dataframe #students # mtcars#airquality
62. Testing , recode and exclude

### COURSE CONTENTS & LECTURE SCHEDULE:

| Module No.     | Topic   | No. of Lectures | Teaching Pedagogy | Teaching Aids |
|----------------|---|-----------------|-------------------|---------------|

**COURSE DESCRIPTION**

This course is designed to facilitate different animation techniques in animation software.

**COURSE OBJECTIVES**

To facilitate the student to understand the animation techniques and make the students to develop their 3D animations.

**UNITS**
**UNIT 1 : EXPLORING THE INTERFACE:**
**(6 Hrs)**

Introduction to Alice - download and install Alice 3.1-A brief tour of the Alice 3 IDE -A brief tour of the Menu Bar- Set Preferences -Touring the Gallery

**UNIT-2: SETTING THE SCENE**
**(6 Hrs)**

Adding an object to a scene- set object properties in the Scene editor- set special effects in a scene-Marking - position and resize an object in the Scene editor- Positioning sub-parts in Scene editor- align objects using a Snap grid- Cut, Copy, and Paste with the Clipboard

### **UNIT -3: LEARNING TO PROGRAM THROUGH ALICE (6 Hrs)**

Sequential & Parallel Execution - Do in order - Do together- Further nesting- Branching & Looping-Conditional execution-Relational Operators-Randomness-Repetition-While loops- Lists

### **UNIT-4: EVENT HANDLING AND METHODS: (6 Hrs)**

Interactive programming & event handling - Control of flow- Events- Event handling methods.

### **UNIT -5: 3D TEXT AND BILLBOARDS, SOUND: (6 Hrs)**

Create 3D Text- Billboards- Creating a Sound- Adding a Sound - Posting on YouTube

### **PROGRAM LIST**

1. Alice Interface
2. Alice Objects
3. Alice Scene
4. Sequential and Parallel Execution
5. Branching and Looping
6. Event Handling
7. Methods
8. 3D text

| <b>UNIT -1 EXPLORING THE INTERFACE</b>           |  |                        |                          |                      |
| 1.1  | Introduction to Alice - download and install Alice 3.1-A brief tour of the Alice 3 IDE   | 3                      | Chalk & Talk             | Black Board          |
| 1.2  | A brief tour of the Menu Bar-Set Preferences -Touring the Gallery  | 3                      | Chalk & Talk             | Black Board          |
| <b>UNIT -2 SETTING THE SCENE</b>                 |  |                        |                          |                      |
| 2.1  | Adding an object to a scene-set object properties in the Scene editor  | 2                      | Lecture                  | PPT & White board    |
| 2.2  | set special effects in a scene-Marking - position and resize an object in the Scene editor- Positioning sub-parts in Scene editor- align objects using a Snap grid | 2                      | Demonstration            | Desktop              |
| 2.3  | Cut, Copy, and Paste with the Clipboard  | 2                      | Lecture                  | Black Board          |
| <b>UNIT -3 LEARNING TO PROGRAM THROUGH ALICE</b> |  |                        |                          |                      |
| 3.1  | Sequential & Parallel Execution - Do in order - Do together  | 2                      | Discussion               | Black Board          |
| 3.2  | Further nesting- Branching & Looping-Conditional execution   | 2                      | Lecture                  | Green Board Charts   |

| <b>Module No.</b>                            | <b>Topic</b>  | <b>No. of Lectures</b> | <b>Teaching Pedagogy</b> | <b>Teaching Aids</b> |
|--|---|------------------------|--------------------------|----------------------|
| 3.3  | Relational Operators-Randomness-Repetition-While loops- Lists | 2                      | Chalk & Talk             | Green Board          |
| <b>UNIT -4 EVENT HANDLING AND METHODS</b>    |   |                        |                          |                      |
| 4.1  | Interactive programming & event handling                      | 2                      | Lecture                  | Smart Board          |
| 4.2  | Control of flow- Events-                                      | 2                      | Demonstration            | Desktop              |
| 4.3  | Event handling methods.                                       | 2                      | Lecture                  | Smart Board          |
| <b>UNIT -5 3D TEXT AND BILLBOARDS, SOUND</b> |   |                        |                          |                      |
| 5.1  | Create 3D Text  | 2                      | Demonstration            | Desktop              |
| 5.2  | Billboards- Creating a Sound                                  | 2                      | Demonstration            | Desktop              |
| 5.3  | Adding a Sound - Posting on YouTube                           | 2                      | Demonstration            | Desktop              |

**C1** – Average of Two Model test Marks

**C2** - Program Completion and Record Work

**C3** – Non - Scholastic

## COURSE OUTCOMES

On the successful completion of the course, students will be able to:

| NO.         | COURSE OUTCOMES                                     | KNOWLEDGE LEVEL<br>(ACCORDING TO REVISED BLOOM'S TAXONOMY) | PSOs ADDRESSED    |
|-------------|---|--|-------------------|
| <b>CO 1</b> | Understand basic concepts in Alice.                 | K3,K4 &K5  | PSO1, PSO2& PSO3  |
| <b>CO 2</b> | Construct a scene.                                  | K3,K4 &K5  | PSO4, PSO5 & PSO7 |
| <b>CO 3</b> | Build program in Alice using looping and branching. | K3,K4 &K5  | PSO6, PSO7 & PSO8 |
| <b>CO 4</b> | Apply event handlers in alice.                      | K3,K4 &K5  | PSO8 & PSO9       |
| <b>CO 5</b> | Develop 3D animations.                              | K3,K4 &K5  | PSO6 & PSO9       |

## Mapping of COs with PSOs

| CO/<br>PSO | PS<br>O1 | PSO<br>2 | PSO<br>3 | PSO<br>4 | PSO<br>5 | PSO<br>6 | PSO<br>7 | PSO<br>8 | PSO9 |
|------------|----------|----------|----------|----------|----------|----------|----------|----------|------|

SEMESTER –II

*For those who joined in 2021 onwards*

| PROGRAMME CODE | COURSE CODE  | COURSE TITLE | CATEGORY | HRS/WEEK | CREDITS |
|----------------|--------------|--------------|----------|----------|---------|
| PSIT           | 21PG2IT<br>7 | DATA SCIENCE | Lecture  | 4        | 4       |

**COURSE DESCRIPTION**

This course emphasizes learning various concepts in data science.

**COURSE OBJECTIVES**

To provide strong foundation for data science and application area related to it and understand the underlying core concepts and emerging technologies in data science.

**UNITS****UNIT –I INTRODUCTION****(12 HRS.)**

Big Data and Data Science Hype – Why data science – Getting Past the Hype – The Current Landscape – Data Scientist - Data Science Process Overview – Defining goals – Retrieving data – Data preparation – Data exploration – Data modeling – Presentation.

**UNIT –II: BIG DATA****(12 HRS.)**

Problems when handling large data – General techniques for handling large data – Case study – Steps in big data – Distributing data storage and processing with Frameworks – Case study.

**UNIT –III: MACHINE LEARNING****(12 HRS.)**

Machine learning – Modeling Process – Training model – Validating model – Predicting new observations – Supervised learning algorithms – Unsupervised learning algorithms.

**UNIT –IV : DEEP LEARNING****(12 HRS.)**

Introduction – Deep Feedforward Networks – Regularization – Optimization of Deep Learning – Convolutional Networks – Recurrent and Recursive Nets – Applications of Deep Learning.

**UNIT –V: DATA VISUALIZATION, ETHICS AND RECENT TRENDS****(11 HRS.)**

Introduction to data visualization – Data visualization options – Filters – MapReduce – Dashboard development tools – Creating an interactive dashboard with dc.js-summary. Data Science Ethics – Doing good data science – Owners of the data - Valuing different aspects of privacy - Getting informed consent - The Five Cs – Diversity – Inclusion – Future Trends.

**UNIT –VI: DYNAMISM (Evaluation Pattern-CIA only)****( 1 HRS.)**

Data Science Ethics

**TEXT BOOK:**

1. Introducing Data Science, Davy Cielen, Arno D. B. Meysman, Mohamed Ali, Manning Publications Co., 1st edition, 2016  
Unit I – Chapter 1,2  
Unit II – Chapter 4,5  
Unit III – Chapter 3  
Unit V – Chapter 9
2. Deep Learning, Ian Goodfellow, YoshuaBengio, Aaron Courville, MIT Press, 1st edition, 2016  
Unit IV – Chapter 6, 7
3. Ethics and Data Science, D J Patil, Hilary Mason, Mike Loukides, O'Reilly, 1st edition, 2018 Unit V – Chapter 1,3,4

**REFERENCE BOOK:**

1. Data Science from Scratch: First Principles with Python, Joel Grus, O'Reilly, 1st edition, 2015
2. Doing Data Science, Straight Talk from the Frontline, Cathy O'Neil, Rachel Schutt, O' Reilly, 1st edition, 2013
3. Mining of Massive Datasets, Jure Leskovec, Anand Rajaraman, Jeffrey David Ullman, Cambridge University Press, 2nd edition, 2014

***\*The best out of two will be taken into account***

## COURSE OUTCOMES

On the successful completion of the course, students will be able to:

| NO.         | COURSE OUTCOMES   | KNOWLEDGE LEVEL<br>(ACCORDING TO REVISED BLOOM'S TAXONOMY) | PSOs ADDRESSED |
|-------------|---|--|----------------|
| <b>CO 1</b> | Understand the fundamental concepts of data science   | K2   | PSO1&PSO2      |
| <b>CO 2</b> | Evaluate the data analysis techniques for applications handling large data                          | K2, K4   | PSO3           |
| <b>CO 3</b> | Demonstrate the various machine learning algorithms used in data science process                    | K2   | PSO5&PSO6      |
| <b>CO 4</b> | Understand the ethical practices of data science.   | K4, K6   | PSO4           |
| <b>CO 5</b> | Learn to think through the ethics surrounding privacy, data sharing and algorithmic decision-making | K4   | PSO8           |

## Mapping of COs with PSOs

| CO/<br>PSO | PS<br>O1 | PSO<br>2 | PSO<br>3 | PSO<br>4 | PSO<br>5 | PSO<br>6 | PSO<br>7 | PSO<br>8 | PSO<br>9 |
|------------|----------|----------|----------|----------|----------|----------|----------|----------|----------|
| CO1        | 3        | 3        | 1        | 1        | 1        | 1        | 1        | 1        | 1        |
| CO2        | 1        | 1        | 3        | 1        | 1        | 1        | 1        | 1        | 1        |
| CO3        | 2        | 1        | 1        | 1        | 3        | 3        | 1        | 1        | 1        |
| CO4        | 1        | 1        | 1        | 3        | 1        | 1        | 1        | 1        | 1        |
| CO5        | 1        | 1        | 2        | 1        | 2        | 1        | 1        | 3        | 2        |

### Mapping of COs with POs

| CO/ PSO | PO1 | PO2 | PO3 | PO4 |
|---------|-----|-----|-----|-----|
| CO1     | 3   | 2   | 1   | 1   |
| CO2     | 3   | 2   | 1   | 1   |
| CO3     | 3   | 2   | 1   | 1   |
| CO4     | 3   | 2   | 1   | 1   |
| CO5     | 3   | 2   | 1   | 1   |

**COURSE DESCRIPTION**

The course helps to create interest in image processing techniques and infuse research thirst in this area

**COURSE OBJECTIVES**

- To inculcate ideas and create interest in processing images techniques.
- To provide a research orientation inducing them to pursue research.

**UNITS****UNIT I : INTRODUCTION****(14 Hrs)**

Introduction- What is Digital Image Processing- The Origins of Digital Image Processing – Examples of Fields that Use Digital Image Processing – Fundamental Steps in Digital Image Processing – **Components of an Image Processing System(Self Study).**

**UNIT II : DIGITAL IMAGE FUNDAMENTALS****(14 Hrs)**

Elements of Visual Perception – Light and the Electromagnetic Spectrum – Image Sensing and Acquisition – Image Sampling and Quantization – image interpolation - Some Basic Relationships between Pixels – **An Introduction to the Mathematical Tools Used in Digital Image Processing. (Self Study)**

**UNIT III: INTENSITY TRANSFORMATIONS AND SPATIAL FILTERING****(14 Hrs)**

Background-Some Basic Intensity Transformation Functions - Histogram Processing – Fundamentals of Spatial Filtering – Smoothing Spatial Filters – Sharpening Spatial Filters – **Combining Spatial Enhancement Methods.(Self Study)**

#### **UNIT IV: IMAGE RESTORATION AND RECONSTRUCTION (14 Hrs)**

A Model of the Image Degradation/Restoration Process-Noise Models - Restoration in the Presence of Noise Only-Spatial Filtering.**Color Image Processing: Color Fundamentals – Color Models(Self Study)**

#### **UNIT V: IMAGE COMPRESSION AND SEGMENTATION (14 Hrs)**

Fundamentals – Huffman coding – Golomb coding- Arithmetic coding – LZW coding- Runlength coding - **Segmentation Fundamentals - Point, Line and Edge Detection(Self Study)**

#### **UNIT –VI DYNAMISM (Evaluation Pattern-CIA only) (5 Hrs)**

Image processing tools in current real time problems

## COURSE OUTCOMES

On the successful completion of the course, students will be able to:

| NO.         | COURSE OUTCOMES   | KNOWLEDGE LEVEL<br>(ACCORDING TO REVISED BLOOM'S TAXONOMY) | PSOs ADDRESSED |
|-------------|---|--|----------------|
| <b>CO 1</b> | Understand the representation of digital image and its manipulations  | K2   | PSO1, PSO2     |
| <b>CO 2</b> | Analyze image sampling and quantization requirements and implications | K2, K3   | PSO4, PSO5     |
| <b>CO 3</b> | Describe various Transformation and Filtering Techniques              | K2, K3   | PSO4, PSO5     |
| <b>CO 4</b> | Demonstrate Restoration And Reconstruction models                     | K3, K4   | PSO5, PSO6     |
| <b>CO 5</b> | Utilize Image Compression And Segmentation for efficient storage      | K3, K5   | PSO5, PSO8     |

## Mapping of COs with PSOs

| CO/<br>PSO | PSO1 | PSO2 | PSO3 | PSO4 | PSO5 | PSO6 | PSO7 | PSO8 | PSO9 |
|------------|------|------|------|------|------|------|------|------|------|
| <b>CO1</b> | 3    | 3    | 1    | 1    | 1    | 1    | 1    | 1    | 1    |
| <b>CO2</b> | 1    | 1    | 2    | 3    | 3    | 1    | 1    | 1    | 1    |
| <b>CO3</b> | 2    | 1    | 1    | 3    | 3    | 2    | 1    | 1    | 1    |

|            |          |          |          |          |          |          |          |          |          |

**COURSE DESCRIPTION**

The primary goals will be design the next generation of mobile website, apps and other mobile interfaces across multiple platform such as IOS, android, windows and mobile web.

**COURSE OBJECTIVES**

The course is aimed to develop basic android application and understand the application development lifestyle.

**UNITS****UNIT I: INTRODUCTION****(10 Hrs)**

A Brief History of Mobile: -The Evolution of Devices. The Mobile Ecosystem: Operators -Networks -Devices -Platforms - Operating Systems -Application Frameworks - Size and Scope of the Mobile Market- **The Addressable Mobile Market- Mobile As a Medium. (Self Study)**

**UNIT II: DESIGNING FOR CONTEXT****(12 Hrs)**

Designing for Context: Thinking in Context -Taking the Next Steps .Developing a Mobile Strategy: New Rules.Types of Mobile Applications: **Mobile Application Medium Types. (Self Study)**

**UNIT III: ARCHITECTURE****(12 Hrs)**

Mobile Information Architecture : Mobile Information Architecture -The Design Myth. Mobile Design: Interpreting Design-The Mobile Design

Tent-Pole-Designing for the Best Possible Experience-The Elements of Mobile Design -Mobile Design Tools -Designing for the Right Device -Designing for Different Screen Sizes. Mobile Web Apps Versus Native Applications: The Ubiquity Principle - **When to Make a Native Application - When to Make a Mobile Web Application. (Self Study)**

#### **UNIT IV: MOBILE WEB DEVELOPMENT**

**(10 Hrs)**

Mobile 2.0: Mobile 2.0. Mobile Web Development: Web Standards -Designing for Multiple Mobile Browsers -Device Plans -Markup - CSS: Cascading Style Sheets- JavaScript. iPhone Web Apps: Markup- CSS- JavaScript- Creating a Mobile Web App- **Web Apps As Native Apps -PhoneGap -Tools and Libraries. (Self Study)**

#### **UNIT V: ADAPTING TO DEVICES**

**(12 Hrs)**

Adapting to Devices: Strategy #1: Do Nothing- Strategy #2: Progressive Enhancement- Strategy #3: Device Targeting- Strategy #4: Full Adaptation- What Domain Do I Use. Making Money in Mobile: Working with Operators- Working with an App Store- Add Advertising- Invent a New Model. Supporting Devices: Having a Device Plan- Device Testing- **Desktop Testing- Usability(Self Study)**

#### **UNIT –VI DYNAMISM (Evaluation Pattern-CIA only)**

**(4 Hrs.)**

Current trends in mobile application development

**COURSE DESCRIPTION**

The course helps to create interest in image processing techniques and infuse research thirst in this area

**COURSE OBJECTIVES**

- To inculcate ideas and create interest in processing images techniques.
- To provide a research orientation inducing them to pursue research.

**Programs are written using the following concepts****Image Enhancement Techniques**

Histogram Processing, Median Filtering, Spatial Filtering, Filtering in Frequency Domain.

**Image Analysis and Segmentation**

Feature Extraction, Edge deduction, Thresholding

**Image Compression Techniques**

Scalar and Vector Quantisation, Huffman encoding, Run Length encoding. Transform image coding

**COURSE DESCRIPTION**

To Mobile User Interface (UI) Design is also essential in the creation of Mobile Apps. mobile UI considers constraints, context, screen, input, and mobility as outlines for design.

**COURSE OBJECTIVES**

- Develop a grasp of the android OS architecture.
- Understand the application development lifecycle.
- Identify ,analyze and choose tools for android development including device emulator, profiling tools and IDE

**LAB PROGRAMS :**

- Simulate mobile application that uses GUI components.
- Simulate mobile application that uses Layout Managers and event listeners.
- Simulate mobile application to create native calculator application.
- Simulate mobile application that makes use of database.
- Simulate mobile application that makes use of RSS Feed.
- Simulate mobile a native application that uses GPS location information.

- Simulate mobile application that writes data to the SD card.
- Simulate mobile application that creates an alert upon receiving a message.
- Write a mobile application that creates alarm clock.

### COURSE CONTENTS & LECTURE SCHEDULE

### **COURSE DESCRIPTION**

This course is designed to facilitate different animation techniques in animation software.

### **COURSE OBJECTIVES**

To facilitate the student to understand the animation techniques and make the students to develop their 3D animations.

### **UNITS**

#### **UNIT 1 : EXPLORING THE INTERFACE:**

**(6 Hrs)**

Introduction to Alice - download and install Alice 3.1-A brief tour of the Alice 3 IDE -A brief tour of the Menu Bar- Set Preferences -Touring the Gallery

#### **UNIT-2: SETTING THE SCENE**

**(6 Hrs)**

Adding an object to a scene- set object properties in the Scene editor- set special effects in a scene-Marking - position and resize an object in the Scene editor- Positioning sub-parts in Scene editor- align objects using a Snap grid- Cut, Copy, and Paste with the Clipboard

**UNIT -3: LEARNING TO PROGRAM THROUGH ALICE (6 Hrs)**

Sequential & Parallel Execution - Do in order - Do together- Further nesting- Branching & Looping-Conditional execution-Relational Operators-Randomness-Repetition-While loops- Lists

**UNIT-4: EVENT HANDLING AND METHODS: (6 Hrs)**

Interactive programming & event handling - Control of flow- Events- Event handling methods.

**UNIT -5: 3D TEXT AND BILLBOARDS, SOUND: (6 Hrs)**

Create 3D Text- Billboards- Creating a Sound- Adding a Sound - Posting on YouTube

**PROGRAM LIST**

1. Alice Interface
2. Alice Objects
3. Alice Scene
4. Sequential and Parallel Execution
5. Branching and Looping
6. Event Handling
7. Methods
8. 3D text

| PSIT               | 21PG2ITE1      | ADHOC<br>NETWORK | Lecture      | 4            | 5           |

**COURSE DESCRIPTION**

This course provides architecture and protocols of ad hoc wireless networks

**COURSE OBJECTIVES**

This course is aimed to Analyze the components of ad hoc network showing how wireless technology exists.

**UNITS****UNIT I : INTRODUCTION****[12 Hrs]**

Fundamentals of Wireless Communication Technology – The Electromagnetic Spectrum – Radio propagation Mechanisms – Characteristics of the Wireless Channel – Ad-hoc wireless network : Introduction- Issues in Ad Hoc Wireless networks

**UNIT II: MAC PROTOCOLS FOR AD HOC WIRELESS NETWORKS****[12 Hrs]**

Issues in designing a MAC Protocol- Classification of MAC Protocols- Contention based protocols-Contention based protocols with Reservation Mechanisms- Contention based protocols with Scheduling Mechanisms.

**UNIT III :ROUTING PROTOCOLS for AD HOC WIRELESS NETWORKS****[12Hrs]**

Issues in designing a Routing protocol for Ad hoc wireless networks-  
Classification of routing protocol – Table-driven routing protocol -  
On-demand Routing protocol -Hybrid routing

#### **UNIT IV : TRANSPORT LAYER AND SECURITY PROTOCOLS** **[12 Hrs]**

TCP over Ad hoc Wireless network – other Transport layer protocol for adhoc wireless network – Security in ad hoc wireless network – network security requirements – Issues and challenges in Security Provisioning- network security attacks – Secure routing in Ad-hoc wireless network.

#### **UNIT V : WIRELESS SENSOR NETWORK** **[10 Hrs]**

Introduction – Sensor Network Architecture – Data Dissemination – Data Gathering – MAC protocols for Sensor networks – Location Discovery – Quality of sensor network – other issues

#### **UNIT –VI DYNAMISM (Evaluation Pattern-CIA only)** **(2 Hrs)**

Recent Trends in Ad Hoc

#### **TEXTBOOK**

“ Ad Hoc Wireless Network – Architecture and Protocols “, by C. Siva Ram Murthy , B.S. Manoj, Pearson Education Inc., 2014.

***\*The best out of two will be taken into account***

## COURSE OUTCOMES

On the successful completion of the course, students will be able to:

| NO.  | COURSE OUTCOMES  | KNOWLEDGE LEVEL<br>(ACCORDING TO REVISED BLOOM'S TAXONOMY) | PSOs ADDRESSED    |
|------|--|--|-------------------|
| CO 1 | Understand the design issues in ad hoc and sensor networks       | K2   | PSO1, PSO2 & PSO3 |
| CO 2 | Learn the different types of MAC protocols                       | K2,K4  | PSO4, PSO5 & PSO6 |
| CO 3 | Be familiar with different types of adhoc routing protocols.     | K3   | PSO8 & PSO9       |
| CO 4 | Be expose to the TCP issues in adhoc networks                    | K3   | PSO4, PSO5 & PSO6 |
| CO 5 | Learn the architecture and protocols of wireless sensor networks | K4   | PSO5, PSO8 & PSO9 |

## Mapping COs Consistency with PSOs

| CO/<br>PSO | PS<br>O1 | PSO<br>2 | PSO<br>3 | PSO<br>4 | PSO<br>5 | PSO<br>6 | PSO<br>7 | PSO<br>8 | PSO<br>9 |
|------------|----------|----------|----------|----------|----------|----------|----------|----------|----------|
| CO1        | 3        | 3        | 3        | 1        | 1        | 1        | 1        | 1        | 1        |
| CO2        | 1        | 1        | 2        | 3        | 3        | 3        | 1        | 1        | 1        |
| CO3        | 2        | 1        | 1        | 1        | 2        | 2        | 1        | 3        | 3        |
| CO4        | 1        | 1        | 1        | 3        | 3        | 3        | 1        | 1        | 1        |
| CO5        | 1        | 1        | 2        | 1        | 3        | 1        | 1        | 3        | 3        |

**Mapping of COs with Pos**

| CO/ PSO | PO1 | PO2 | PO3 | PO4 |
|---------|-----|-----|-----|-----|
| CO1     | 3   | 2   | 1   | 1   |
| CO2     | 3   | 2   | 1   | 1   |
| CO3     | 3   | 2   | 1   | 1   |
| CO4     | 3   | 2   | 1   | 1   |
| CO5     | 3   | 2   | 1   | 1   |

**Note:** ♦ Strongly Correlated – 3      ♦ Moderately Correlated – 2  
 ♦ Weakly Correlated -1

### **COURSE DESCRIPTION**

This course emphasizes learning algorithms and theory including concept, decision tree, neural network, computational, Bayesian, instant and advanced learning.

### **COURSE OBJECTIVES**

To facilitate the student to understand Machine Learning Techniques and applications.

### **UNITS**

#### **UNIT –I INTRODUCTION (12 HRS.)**

Learning Problems – Perspectives and Issues – Concept Learning – Version Spaces and Candidate Eliminations – Inductive bias – Decision Tree learning – Representation – Algorithm – Heuristic Space Search.

#### **UNIT –II: NEURAL NETWORKS AND GENETIC ALGORITHMS (12 HRS.)**

Representation – Problems – Perceptrons – Multilayer Networks and Back Propagation Algorithms – Advanced Topics – Genetic Algorithms – Hypothesis Space Search – Genetic Programming – Models of Evaluation and Learning.

#### **UNIT –III: BAYESIAN AND COMPUTATIONAL LEARNING (12 HRS.)**

Bayes Theorem – Concept Learning – Maximum Likelihood – Minimum Description Length Principle – Bayes Optimal Classifier – Gibbs Algorithm – Naïve Bayes Classifier – Bayesian Belief Network – EM Algorithm – Probability Learning – Sample Complexity – Finite and Infinite Hypothesis Spaces – Mistake Bound Model.

#### **UNIT –IV :INSTANT BASED LEARNING**

**(12 HRS.)**

K- Nearest Neighbour Learning – Locally weighted Regression – Radial Basis Functions – Case Based Learning.

#### **UNIT –V: ADVANCED LEARNING**

**(11 HRS.)**

Learning Sets of Rules – Sequential Covering Algorithm – Learning Rule Set – First Order Rules – Sets of First Order Rules – Induction on Inverted Deduction – Inverting Resolution – Analytical Learning – Perfect Domain Theories – Explanation Base Learning – FOCL Algorithm – Reinforcement Learning – Task – Q-Learning – Temporal Difference Learning

#### **UNIT –VI: DYNAMISM (Evaluation Pattern-CIA only)**

**( 1 HRS.)**

Temporal Difference Learning

#### **TEXT BOOK:**

1. Tom M. Mitchell, –Machine Learning, McGraw-Hill Education (India) Private Limited, 2013.

#### **REFERENCE BOOK:**

### **COURSE DESCRIPTION**

Cyber Security courses aims to equip students with the knowledge and skills required to defend the computer operating systems, networks and data from cyber-attacks.

### **COURSE OBJECTIVES**

The learner will gain knowledge about securing both clean and corrupted systems, protect personal data, and secure computer networks.

#### **UNIT I : INTRODUCTION TO CYBER SECURITY [12 Hrs]**

Overview of Cyber Security, Internet Governance – Challenges and Constraints, Cyber Threats:- Cyber Warfare-Cyber Crime-Cyber terrorism-Cyber Espionage, Need for a Comprehensive Cyber Security Policy, Need for a Nodal Authority, Need for an International convention on Cyberspace.

#### **UNIT II :CYBER SECURITY VULNERABILITIES AND SAFEGUARDS**

**[12 Hrs]**

Cyber Security Vulnerabilities-Overview, vulnerabilities in software, System administration, Complex Network Architectures, Open Access to Organizational Data, Weak Authentication, Unprotected Broadband communications, Poor Cyber Security Awareness. Cyber Security

Safeguards- Overview, Access control, Audit, Authentication, Biometrics, Cryptography, Deception, Denial of Service Filters, Ethical Hacking, Firewalls, Intrusion Detection Systems, Response, Scanning, Security policy, Threat Management.

### **UNIT III : SECURING WEB APPLICATION, SERVICES AND SERVERS**

**[12 Hrs]**

Introduction, Basic security for HTTP Applications and Services, Basic Security for SOAP Services, Identity Management and Web Services, Authorization Patterns, Security Considerations, Challenges.

### **UNIT IV : INTRUSION DETECTION AND PREVENTION**

**[12 Hrs]**

Intrusion, Physical Theft, Abuse of Privileges, Unauthorized Access by Outsider, Malware infection, Intrusion detection and Prevention Techniques, Anti-Malware software, Network based Intrusion detection Systems, Network based Intrusion Prevention Systems, Host based Intrusion prevention Systems, Security Information Management, Network Session Analysis, System Integrity Validation.

### **UNIT V : CYBER LAW & CYBER FORENSICS**

**[12 Hrs]**

**Introduction, Cyber Security Regulations, Roles of International Law, the state and Private Sector in Cyberspace, Cyber Security Standards. The INDIAN Cyberspace, National Cyber Security Policy 2013.((Self Study)**

Introduction to Cyber Forensics, Handling Preliminary Investigations, Controlling an Investigation, Conducting disk-based analysis, Investigating Information-hiding, Scrutinizing E-mail, Validating E-mail header information, Tracing Internet access, Tracing memory in real-time.

### **TEXT BOOK**

1. “Fundamental Of Cyber Security – Principles,Theory and Practices” by Mayank Bhushan ,Rajkumar Singh Rathore , Aatif Jamshed , BPB Publications, ISBN: 9789386551559, 9789386551559

### REFERENCE BOOKS

1.” Cyber Security & IT infrastructure Protection” 1<sup>st</sup> Edition, by John Vacca, Syngress Publisher

2. Cyber Security and Cyber Lawsby Alfred Basta ,Nadine Basta ,Mary Brown , Ravinder Kumar, Cengage Learning India Private Limited Publisher (2018)

## COURSE OUTCOMES

On the successful completion of the course, students will be able to:

| NO.         | COURSE OUTCOMES   | KNOWLEDGE LEVEL<br>(ACCORDING TO REVISED BLOOM'S TAXONOMY) | PSOs ADDRESSED |
|-------------|---|--|----------------|
| <b>CO 1</b> | Analyze and evaluate the cyber security needs of an organization.   | K2   | PSO1, PSO4     |
| <b>CO 2</b> | Measure the performance and troubleshoot cyber security systems..   | K2, K3   | PSO2, PSO5     |
| <b>CO 3</b> | Comprehend and execute risk management processes, risk treatment methods, and key risk and performance indicators g | K3, K4   | PSO5, PSO6     |
| <b>CO 4</b> | Design and develop a security architecture for an organization.   | K3, K4   | PSO3, PSO6     |
| <b>CO 5</b> | Design operational and strategic cyber security strategies and policies.  | K4, K5   | PSO6, PSO8     |

## Mapping COs Consistency with PSOs

| CO/<br>PSO | PS<br>O1 | PSO<br>2 | PSO<br>3 | PSO<br>4 | PSO<br>5 | PSO<br>6 | PSO<br>7 | PSO<br>8 | PSO<br>9 |

**COURSE DESCRIPTION**

Data Mining and Data Warehousing consists of introduction about data mining, data pre-processing, mining frequent pattern, association, classification and cluster analysis and applications of data mining

**COURSE OBJECTIVES**

- To interpret the contribution of data mining and data warehousing to the decision support level of organizations
- To understand different models used for OLAP and data pre-processing

**UNITS****UNIT I: INTRODUCTION****(14 Hrs)**

Introduction to Data Mining-its importance — Data Mining on what kind of Data- Data Mining Functionalities-What Kinds of Patterns Can Be Mined – Are All of the Patterns Interesting – Classification of Data Mining Systems – Data Mining Task Primitives – **Integration of Data Mining System with a Database or Data Warehouse System – Major Issues in Data Mining (Self study).**

**UNIT II: DATA PREPROCESSING****(14 Hrs)**

Need to Preprocess the Data - Descriptive Data Summarization – Data Cleaning – Data Integration and Transformation – Data Reduction – Data

Discretization and Concept Hierarchy Generation. Data Warehouse and OLAP Technology : An Overview - What is a Data Warehouse – A Multidimensional Data Model – Data Warehouse Architecture – **Data Warehouse Implementation – From Data Warehousing to a Data Mining(Self study).**

### **UNIT III: MINING FREQUENT PATTERNS AND CLASSIFICATION**

**(18 Hrs)**

Efficient and Scalable Frequent Itemset Mining Methods: The Apriori Algorithm : Finding Frequent Itemsets Using Candidate Generation- Generating Association Rules from Frequent Itemsets- Improving the Efficiency of Apriori – Mining Frequent Itemsets without Candidate Generation- Mining Frequent Itemsets Using Vertical Data Format – Mining Closed Frequent Itemsets. Classification - Prediction – Issues Regarding Classification and Prediction – Classification by Decision Tree Induction – Bayesian Classification – Rule-Based Classification – Classification by Back propagation – Support Vector Machines.

### **UNIT IV: CLUSTER ANALYSIS**

**(14 Hrs)**

What is Cluster Analysis – Types of Data in Cluster Analysis – A Categorization of Major Clustering Methods – Partitioning Methods – Hierarchical Methods – Density-Based Methods – Grid-Based Methods – Model-Based Clustering Methods.

### **UNIT V: APPLICATIONS AND TRENDS IN DATA MINING**

**(10 Hrs)**

Data Mining Applications – Data Mining System Products and Research Prototypes – **Additional Themes on Data Mining – Social Impacts of Data Mining – Trends in Data Mining(Self study).**

### **UNIT –VI DYNAMISM (Evaluation Pattern-CIA only)**

**( 5 Hrs)**

Current trends in implementation of Data Mining tools in real time applications.

**COURSE DESCRIPTION**

The course helps to create interest in image processing techniques and infuse research thirst in this area

**COURSE OBJECTIVES**

- To inculcate ideas and create interest in processing images techniques.
- To provide a research orientation inducing them to pursue research.

**UNITS****UNIT I: OVERVIEW****(12 Hrs)**

The Context Of Software Development: Software-Development Tools-Learning Programming With Python-Writing A Python Program-A Longer Python Program.

Values And Variables:Integer Values-Variables And Assignment-Identifiers-Floating Point Types-Control Code With In Strings-User Input-The Eval Function-Controlling The Print Function.

**Expressions And Arithmetic: Expression-Operator Precedence And Associativity-Comments-Errors-Arithmetic Examples-More Arithmetic Operators-Algorithms (Self study)**

**UNIT II CONDITIONAL STATEMENT AND ITERATION****(15 Hrs)**

Conditional Execution :Boolean Expressions- Boolean Expressions – The Simple If Statement – The If/Else Statement – Compound Boolean

Expressions –Nested Conditionals – Multi-Way Decision Statements – Conditional Expressions – Errors In Conditional Statements

Iteration :The While Statement – Definite Loops Vs. Indefinite Loops – The For Statement – Nested Loops – Abnormal Loop Termination – Infinite Loops – Iteration Examples

### **UNIT III :LISTS& FUNCTIONS**

**(15 Hrs)**

**List:**Using Lists – List Assignment and Equivalence – List Bounds – Slicing – Cloning- Nested Lists-List and functions – Prime Generation with a List - List Processing : Sorting – Flexible Sorting – Search – List Permutations – Randomly Permuting a List – Reversing a List-

**Functions** : Introduction to Functions – Defining – Calling function –Passing Arguments- Keyword Arguments- Default Arguments – Required Arguments – Variable length Arguments – Return Statement – Nesting of Passing Arguments – Anonymous Function- Recursive function – Scope of Local and Global Variables .

### **UNIT IV: OBJECT ORIENTED PROGRAMMING PRINCIPLES**

**(15 Hrs)**

Class Statement – Class Body- Objects- Class Methods – Self Variable – Class Properties and Instance Properties – Static Method – Data Hiding – Deleting an object – Constructor – Method Overriding – Inheritance – Composition Object – Abstract classes and interfaces – Metaclass- Operator overloading.–Garbage Collections.

### **UNIT V : TKINTER , EVENTS & EXCEPTIONS**

**(15 Hrs)**

**Tkinter** : Introduction – Widget – Label – Button – Check button – Entry – List box – Radio button – Scroll bar – Text- Container – Frame – Menu – Label frame – Message – Combo box – Scale – Canvas.

**Events:**Event Object – Binding Call backs to Events – Events Names – Keyboard Events – Mouse events.

**Handling Exceptions : Motivation – Exception Examples – Handling Exception in Invoked Function - Using Exceptions- Custom Exceptions (Self Study)**

### **UNIT –VI DYNAMISM (Evaluation Pattern-CIA only)**

**( 3 HRS.)**

Application development based on case study

**COURSE DESCRIPTION**

To study fundamental concepts in software testing, planning a test project, design test cases and data, conduct testing operations, manage software problems and defects, generate a testing report.

**COURSE OBJECTIVES**

- To give strong foundation in software quality assurance by teaching standards, models and measurement techniques.
- To enhance the knowledge of the students to provide innovative solutions to various quality assurances related problems.

**UNITS****UNIT I: SOFTWARE QUALITY IN GLOBAL BUSINESS CONTEXT (14 Hrs)**

Introduction, Quality Attributes, Quality Challenges in Globally Outsourced Business, importance of Quality as a Business Driver, Understanding Life cycle Models, Object Oriented Life cycle Models, **Choosing the right type of Life cycle model for software project(Self study)**

**UNIT II: SQA ROLE IN AN ORGANIZATION (14 Hrs)**

Introduction, Understanding the SQA function. Managing SQA Operations :SQA : Organizational Level Initiatives, **Defect Prevention, Quality Assurance – Important Dimensions for the QA Analyst(Self study)**.

**UNIT III: TESTING FOR QUALITY VALIDATION (14 Hrs)**

Introduction , The Purpose of Testing , Testing is not same as Inspection and Audit, Testing is not the same as Debugging , The Testing Life Cycle,

Roles and Responsibilities in Testing, **Test Artefacts, The Test Plan and Test Techniques(Self study).**

**UNIT IV: TESTING MODELS AND TECHNIQUES (14 Hrs)**

Testing Phases with the V-Model and W-Model – Testing Techniques – Risk-based Approach to Testing – **Test Process Automation and Test Tool Selection (Self study).**

**UNIT V :TESTING TOOLS (14 Hrs)**

Load Runner – Overview of LoadRunner – Creating Vuser script using Virtual User Generator – Creating Virtual Users Using Loadrunner Controller – JMeter – JMeter Overview – JDBC Test – **HTTP Test(Self study)**

**UNIT –VI DYNAMISM (Evaluation Pattern-CIA only) ( 5 Hrs)**

Tools used in real time applications and their implementations

|--------------------|----------------|--------------------------------|----------|-------------|-------------|
| PSIT               | 19PG3IT15B     | DIGITAL<br>IMAGE<br>PROCESSING | Lecture  | 4           | 4           |

**COURSE DESCRIPTION**

The course helps to create interest in image processing techniques and infuse research thirst in this area

**COURSE OBJECTIVES**

- To inculcate ideas and create interest in processing images techniques.
- To provide a research orientation inducing them to pursue research.

**UNITS****UNIT I : INTRODUCTION****(14 Hrs)**

Introduction- What is Digital Image Processing- The Origins of Digital Image Processing – Examples of Fields that Use Digital Image Processing – Fundamental Steps in Digital Image Processing – **Components of an Image Processing System(Self Study).**

**UNIT II : DIGITAL IMAGE FUNDAMENTALS****(14 Hrs)**

Elements of Visual Perception – Light and the Electromagnetic Spectrum – Image Sensing and Acquisition – Image Sampling and Quantization – image interpolation - Some Basic Relationships between Pixels – **An Introduction to the Mathematical Tools Used in Digital Image Processing. (Self Study)**

**UNIT III: INTENSITY TRANSFORMATIONS AND SPATIAL FILTERING**

**(14 Hrs)**

Background-Some Basic Intensity Transformation Functions - Histogram Processing – Fundamentals of Spatial Filtering – Smoothing Spatial Filters – Sharpening Spatial Filters – **Combining Spatial Enhancement Methods.(Self Study)**

**UNIT IV: IMAGE RESTORATION AND RECONSTRUCTION (14 Hrs)**

A Model of the Image Degradation/Restoration Process-Noise Models - Restoration in the Presence of Noise Only-Spatial Filtering.**Color Image Processing: Color Fundamentals – Color Models(Self Study)**

**UNIT V: IMAGE COMPRESSION AND SEGMENTATION (14 Hrs)**

Fundamentals – Huffman coding – Golomb coding- Arithmetic coding – LZW coding- Runlength coding - **Segmentation Fundamentals - Point, Line and Edge Detection(Self Study)**

**UNIT –VI DYNAMISM (Evaluation Pattern-CIA only) (5 Hrs)**

Image processing tools in current real time problems

**COURSE DESCRIPTION**

Linux shell programming describes about the commands used to develop the concept of shell programming.

**COURSE OBJECTIVES**

To learn basics of shell programming and to develop programs that access files, to use signals, processes and threads

**UNITS****UNIT I :SHELL PROGRAMMING: (14 Hrs)**

In Introduction to Unix, Linux and GNU - Programming Linux - Shell – Pipes and Redirection – **The Shell as a Programming Language – Shell Syntax(Self Study)**

**UNIT II WORKING WITH FILES: (14 Hrs)**

Linux File Structure-System calls and Device Drivers-Library Functions-Low Level File Access-Standard I/O Library-Formatted Input and Output-File and Directory Maintenance-scanning Directories-Errors-**The /proc File System (Self Study)**

**UNIT III :LINUX ENVIRONMENT & PROCESS AND SIGNALS (14 Hrs)**

Program Arguments-Environment Variables-Time and Date-Temporary Files-User Information-Host Information-Logging-Resources and Limits-Process- Process Structure-**Starting New Processes – Signals(Self Study)**

**UNIT IV: TERMINALS AND POSIX THREADS : (14 Hrs)**

Reading from and Writing to the Terminal-Talking to the Terminal-The Terminal Driver and the General Terminal Interface-The Termios Structure-Terminal Output-Detecting Keystrokes- Thread - Advantages and Drawbacks of Thread- A First Threads Program-Simultaneous Execution-Synchronization -Thread Attributes-**Canceling a Thread-Threads in Abundance (Self Study)**

**UNIT V : MANAGING TEXT-BASED SCREENS WITH CURSES: (14 Hrs)**

Compiling with curses-Curses Terminology and Concepts - The Screen - The Keyboard-Windows - Sub windows - The Keypad - Using Color – Pads - **The CD Collection Application (Self Study)**

**UNIT –VI DYNAMISM (Evaluation Pattern-CIA only) ( 5 Hrs.)**

Case study in latest Commands in Linux

**COURSE CONTENTS & LECTURE SCHEDULE:**

| <b>Module No.</b>  | <b>Topic</b>   | <b>No. of Lectures</b> | <b>Teaching Pedagogy</b> | <b>Teaching Aids</b> |
|--|--|------------------------|--------------------------|----------------------|
| <b>UNIT -1 SHELL PROGRAMMING</b>                           |  |                        |                          |                      |
| 1.1  | In Introduction to Unix, Linux and GNU                                 | 3                      | Chalk & Talk             | Black Board          |
| 1.2  | Programming Linux - Shell – Pipes and Redirection                      | 4                      | Chalk & Talk             | LCD                  |
| 1.3  | The Shell as a Programming Language – Shell Syntax(Self Study)         | 7                      | Discussion               | Google classroom     |
| <b>UNIT -2 WORKING WITH FILES</b>                          |  |                        |                          |                      |
| 2.1  | Linux File Structure-System calls and Device Drivers-Library Functions | 3                      | Lecture                  | Smart Board          |
| 2.2  | Low Level File Access-Standard I/O Library-                            | 3                      | Lecture                  | Black Board          |
| 2.3  | Formatted Input and Output-File and Directory Maintenance-             | 4                      | Chalk & Talk             | Black Board          |
| 2.4  | scanning Directories-Errors-   | 3                      | Lecture                  | Smart Board          |
| 2.5  | The /proc File System (Self Study)                                     | 1                      | Discussion               | Google classroom     |
| <b>UNIT -3 LINUX ENVIRONMENT &amp; PROCESS AND SIGNALS</b> |  |                        |                          |                      |
| 3.1  | Program Arguments-Environment  | 4                      | Chalk & Talk             | Green Board          |

| <b>Module No.</b>                                      | <b>Topic</b>   | <b>No. of Lectures</b> | <b>Teaching Pedagogy</b> | <b>Teaching Aids</b>  |
|--|--|------------------------|--------------------------|-----------------------|
|  | Variables-Time and Date-Temporary Files  |                        |                          |                       |
| 3.2  | User Information-Host Information-Logging-Resources and Limits-                              | 4                      | Discussion               | Black Board           |
| 3.3  | Process- Process Structure   | 3                      | Lecture                  | Green Board<br>Charts |
| 3.4  | Starting New Processes – Signals<br>(Self Study)   | 3                      | Discussion               | Google classroom      |
| <b>UNIT -4 TERMINALS AND POSIX THREADS</b>             |  |                        |                          |                       |
| 4.1  | Reading from and Writing to the Terminal-Talking to the Terminal                             | 4                      | Chalk & Talk             | Green Board           |
| 4.2  | The Terminal Driver and the General Terminal Interface-The Termios Structure-Terminal Output | 3                      | Chalk & Talk             | Green Board           |
| 4.3  | Detecting Keystrokes- Thread - Advantages and Drawbacks of Thread- A First Threads Program   | 3                      | Lecture                  | Smart Board           |
| 4.4  | Simultaneous Execution-Synchronization -Thread Attributes                                    | 3                      | Chalk & Talk             | Green Board           |
| 4.5  | Canceling a Thread-Threads in Abundance(Self Study)  | 1                      | Discussion               | Google classroom      |
| <b>UNIT -5 MANAGING TEXT-BASED SCREENS WITH CURSES</b> |  |                        |                          |                       |
| 5.1  | Compiling with curses-Curses Terminology and Concepts  | 3                      | Lecture                  | Smart Board           |

## COURSE OUTCOMES

On the successful completion of the course, students will be able to:

| NO.         | COURSE OUTCOMES  | KNOWLEDGE LEVEL<br>(ACCORDING TO REVISED BLOOM'S TAXONOMY) | PSOs ADDRESSED |
|-------------|--|--|----------------|
| <b>CO 1</b> | Understand the fundamental concept of Shell Programming              | K2   | PSO1, PSO2     |
| <b>CO 2</b> | Analyze the concepts of file management in Linux                     | K2, K3   | PSO2, PSO3     |
| <b>CO 3</b> | To learn the linux environment, process and signal                   | K2, K3   | PSO4, PSO5     |
| <b>CO 4</b> | Identify the types of POSIX threads and terminals                    | K3, K4   | PSO3, PSO9     |
| <b>CO 5</b> | Utilize the facilities provided in the concept of text based screens | K3, K5   | PSO8, PSO9     |

## Mapping of COs with PSOs

| CO / PSO    | PSO1 | PSO2 | PSO3 | PSO4 | PSO5 | PSO6 | PSO7 | PSO8 | PSO9 |
|-------------|------|------|------|------|------|------|------|------|------|
| <b>CO 1</b> | 3    | 3    | 1    | 2    | 2    | 1    | 2    | 1    | 1    |

|             |   |   |   |   |   |   |   |   |   |
|-------------|---|---|---|---|---|---|---|---|---|
| <b>CO 2</b> | 1 | 3 | 3 | 2 | 1 | 2 | 1 | 1 | 2 |
| <b>CO 3</b> | 2 | 2 | 2 | 3 | 3 | 2 | 1 | 2 | 1 |

**COURSE DESCRIPTION**

Big Data Analytics includes Introduction to Big Data, Big Data Analytics, The Big Data Technology, Introduction to MAPREDUCE Programming: and Introduction to Recommendation Engines.

**COURSE OBJECTIVES**

- To understand Characteristics and challenges of Big Data
- To interpret Big Data Analytics and Big Data Technologies
- To demonstrate MAPREDUCE Programming and Recommendation Systems

**UNITS****UNIT I: INTRODUCTION****(14 Hrs)**

Introduction to Big Data: Characteristics of Data – Evolution of Big Data – Definition of Big Data – Challenges with Big Data – What is Big Data – Other Characteristics of Data Which are not Definitional Traits of Big Data – Why Big Data – Are we just an Information Consumer or Do we also Produce Information – Traditional Business Intelligence(BI) versus Big Data – A Typical Data warehouse Environment – **A Typical Hadoop Environment – What is New Today – What is Changing in the Realms of Big Data(Self study).**

**UNIT II :BIG DATA ANALYTICS****(14 Hrs)**

Big Data Analytics: Classification of Analytics – Greatest Challenges that Prevent Businesses from Capitalizing on Big Data – Top Challenges Facing Big Data – Why is Big Data Analytics Important – What kind of Technologies are we Looking Toward to Help Meet the Challenges Posed by Big Data – Data Science – Data Scientist Your New Best Friend - **Terminologies Used in Big Data Environments – Basically Available Soft State Eventual Consistency – Few Top Analytics Tools(Self study).**

### **UNIT III: THE BIG DATA TECHNOLOGY**

**(14 Hrs)**

The Big Data Technology Landscape:- Hadoop. Features of Hadoop. Key advantages of Hadoop, Version of Hadoop- Overview of hadoop Ecosystems- Hadoop distributios- Hadoop versus SQL – Integrated Hadoop System Offered by Leading Markers Vendors- Cloud – based Hadoop Solutions. Introduction to Hadoop: Introducing Hadoop – Why Hadoop – Why not RDBMS – RDBMS versus Hadoop – Distributed Computing Challenges – History of Hadoop – Hadoop Overview – Use Case of Hadoop – Hadoop Distributors – HDFS (Hadoop Distributed File System) – **Processing Data with Hadoop – Managing Resources and Applications with Hadoop YARN (Yet Another Resource Negotiator) – Interacting with Hadoop Ecosystem(Self study).**

### **UNIT IV :INTRODUCTION TO MAP REDUCE PROGRAMMING (14 Hrs)**

Introduction to MAP REDUCE Programming: Introduction – Mapper – Reducer – Combiner – Partitioner – Searching – Sorting – Compression. Introduction to Machine Learning: Introduction to Machine Learning – Machine Learning Algorithm-Regression Model- Linear Regression- Clustering- Collaboration filtering- Association Rule Mining- **Decision Tree(Self study).**

**UNIT V: RECOMMENDATION ENGINES****(14 Hrs)**

Introduction to Recommendation Engines: Recommendation engine definition – Need for Recommender Systems – Big Data Driving the Recommender Systems – Types of Recommender Systems – Evolution of Recommender Systems with Technology. Evolution of Recommendation Engines Explained: Evolution of Recommendation Engines – Nearest Neighborhood-based **Recommendation Engines – Content-based Recommender Systems – Hybrid Recommender Systems – Model-based Recommender Systems.**(Self study)

**UNIT –VI DYNAMISM (Evaluation Pattern-CIA only)****( 5 HRS.)**

Current scenario in Big Data Analytical technologies

## COURSE OUTCOMES

On the successful completion of the course, students will be able to:

| NO.         | COURSE OUTCOMES  | KNOWLEDGE LEVEL<br>(ACCORDING TO REVISED BLOOM'S TAXONOMY) | PSOs ADDRESSED |
|-------------|--|--|----------------|
| <b>CO 1</b> | Understand the Characteristics and challenges of Big Data          | K2   | PSO1& PSO2     |
| <b>CO 2</b> | Describe the concepts of Big Data Analytics                        | K2   | PSO4           |
| <b>CO 3</b> | Utilize Hadoop for Big Data Technologies                           | K3, K4   | PSO5, PSO6     |
| <b>CO 4</b> | Demonstrate MAPREDUCE Programming                                  | K3, K4   | PSO3, PSO9     |
| <b>CO 5</b> | Describe types of Recommendation Systems using Big Data Analytics. | K4, K5   | PSO6, PSO8     |

## Mapping of COs with PSOs

| CO / PSO    | PS O1 | PSO 2 | PSO 3 | PSO 4 | PSO 5 | PSO 6 | PSO 7 | PSO 8 | PSO 9 |
|-------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| <b>CO 1</b> | 3     | 3     | 1     | 2     | 2     | 1     | 2     | 1     | 1     |

|             |   |   |   |   |   |   |   |   |   |
|-------------|---|---|---|---|---|---|---|---|---|
| <b>CO 2</b> | 1 | 1 | 2 | 3 | 1 | 2 | 1 | 1 | 2 |
| <b>CO 3</b> | 2 | 2 | 2 | 2 | 3 | 3 | 1 | 2 | 1 |
| <b>CO 4</b> | 1 | 2 | 3 | 2 | 2 | 1 | 2 | 1 | 3 |
| <b>CO 5</b> | 2 | 2 | 1 | 2 | 2 | 3 | 2 | 3 | 2 |

### Mapping of COs with POs

| <b>CO/<br/>PSO</b> | <b>PO1</b> | <b>PO2</b> | <b>PO3</b> | <b>PO4</b> |
|--------------------|------------|------------|------------|------------|
| <b>CO1</b>         | 3          | 2          | 2          | 1          |
| <b>CO2</b>         | 2          | 1          | 3          | 2          |
| <b>CO3</b>         | 3          | 1          | 2          | 1          |
| <b>CO4</b>         | 2          | 2          | 3          | 2          |
| <b>CO5</b>         | 2          | 2          | 2          | 2          |

**Note:** ♦ Strongly Correlated – 3      ♦ Moderately Correlated – 2  
 ♦ Weakly Correlated -1

| <b>PSIT</b>        | <b>19PG3IT16B</b> | <b>INTERNET OF<br/>THINGS</b> | <b>Lecture</b> | <b>5</b>     | <b>5</b>    |

**COURSE DESCRIPTION**

This Course provides knowledge of development cycle of IoT systems with sample systems. And explains the different sources needed with the integration process to build IoT systems

**COURSE OBJECTIVES**

- To understand the fundamentals of Internet of Things.
- To apply the concept of Internet of Things in the real world scenario.

**UNITS****UNIT I : INTRODUCTION TO INTERNET OF THINGS (14 Hrs)**

Introduction – Physical Design of IoT –Logical Design of IoT – IoT Enabling Technologies – **IoT Levels & Deployment Templates(Self Study)**

**UNIT II :DOMAIN SPECIFIC IOTS (14 Hrs)**

Introduction – Home Automation – Cities – Environment – Energy – Retail – Logistics – Agriculture – Industry – **Health & Lifestyle (Self Study)**

**UNIT III IOT AND M2M (14 Hrs)**

Introduction – M2M- Difference between IoT and M2M – SDN and NFV for IoT .IoT System Management with NETCONF-YANG :Need for IoT Systems

Management – **Simple Network Management Protocol(SNMP) – Network Operator Requirements(Self Study)**

**UNIT IV: IOT PLATFORMS DESIGN METHODOLOGY (14 Hrs)**

Introduction –IoT Design Methodology .IoT Physical Devices &Endpoints:

What is an IoT Device – Exemplary Device : Raspberry Pi- About the Board – **Linux on Raspberry Pi – Raspberry Pi Interfaces(Self Study)**

**UNIT V CASE STUDIES ILLUSTRATING IOT DESIGN (14 Hrs)**

Introduction – Home Automation – Cities – Environment – Agriculture – **Productivity Applications.(Self Study)**

**UNIT –VI DYNAMISM (Evaluation Pattern-CIA only) (5 HRS.)**

Current scenario in IOT technologies

**COURSE DESCRIPTION**

Mobile communication deals with the protocol and system to perform the data transfer through mobile devices.

**COURSE OBJECTIVES**

- To understand the fundamentals of Mobile communication
- To apply various protocols and algorithms for the real world scenario

**UNITS****UNIT I :INTRODUCTION****(14 Hrs)**

Applications-A Short History of Wireless Communication-A Market For Mobile Communication-A Simplified Reference Model.

WIRELESS TRANSMISSION: Frequencies for Radio  
Transmission-Signals-Antenna-Signal  
Propagation-Multiplexing-Modulation-**Spread Spectrum-Cellular  
System(Self Study).**

**UNIT II: MEDIUM ACCESS CONTROL:****(14 Hrs)**

Motivation for Specialized  
MAC-SDMA-FDMA-TDMA-CDMA.**Telecommunication System: GSM(Self  
Study)..**

**UNIT III :SATELLITE SYSTEM: (14 Hrs)**

Application-Basics-Routing-Localization-Handover.

Broadcast System:Digital Audio Broadcasting-Digital Video  
Broadcasting-**Convergence of Broadcasting and Mobile  
Communication(Self Study).**

**UNIT IV :WIRELESS LAN: (14 Hrs)**

InfraredVs Radio Transmission- Infrastructure and  
ad-Hoc-Network-HIPERLAN-**Bluetooth.(Self Study).**

**UNIT V: SUPPORT FOR MOBILITY (14 Hrs)**

World wide web: Hypertext Transfer protocol – System Architecture

Wireless Application Protocol: - Architecture- Wireless datagram protocol-  
Wireless Transport layer security- Wireless transaction protocol – Wireless  
session protocol – **Wireless Markup language- WML Script(Self  
Study).**Wireless telephony application.

**UNIT –VI DYNAMISM (Evaluation Pattern-CIA only) (5 HRS.)**

Current scenario in mobile communication technologies

**COURSE DESCRIPTION**

Data Mining and Data Warehousing consists of introduction about data mining, data warehousing, data pre-processing, :mining frequent pattern, association, classification and cluster analysis and applications of data mining.

**COURSE OBJECTIVES**

- To assess data preprocessing steps involved in different datasets
- To evaluate classification algorithms using Weka tool with sample data.
- To evaluate clusters algorithms using Weka tool with sample data .

**DATA MINING AND DATA WAREHOUSE PROGRAM - WEKA TOOL**

1. Rules for identifying attributes.
2. Listing of categorical attributes and the real-valued attributes separately.
3. Demonstration of preprocessing on dataset student.arff
4. Demonstration of Association rule process on dataset test.arff using apriori algorithm
5. Training a decision tree algorithm.
6. Test on classification of decision tree.
7. Demonstration of classification rule process on dataset employee.arff using j48 algorithm.

8. Demonstration of classification rule process on dataset employee.arff using id3 algorithm
9. Demonstration of classification rule process on dataset employee.arff using naïve bayes algorithm
10. Demonstration of clustering rule process on dataset student.arff using simple k-m

### **COURSE DESCRIPTION**

This course content plays a vital role in building the basic programming skill in Python.

### **COURSE OBJECTIVES**

The focus of the lab is to provide students with an introduction to visualize the real time problems using the Python programming language as a practical session. The goal of this course is to train the students to face the industrial requirements.

### **PROGRAM LIST**

1. Program using String
2. Program using List
3. Program using Dictionary
4. Program using Tuple
5. Program using Sets
6. Program using Array
7. Program using Condition Statements and Loops
8. Program using Functions

9. Program using Date Time
10. Program using Class
11. Program using Data Structure
12. Program using Search and Sorting
13. Program using Recursion
14. Program using Math
- 15. Program using File I/O**

**COURSE DESCRIPTION :**

It is a summer training programme undertaken by the students in a company of their choice. This is aimed to help them have an experience of the real time environment. It will act as a platform for the future placement.

The students are mandated to complete one online course in the area of their interest.

The students have to submit a report after the internship. This report will be assessed through a viva-voce internal exam.

**COURSE OUTCOMES**

On the successful completion of the course, students will be able to:

| NO.  | COURSE OUTCOMES  | KNOWLEDGE<br>LEVEL<br>(ACCORDING<br>TO REVISED<br>BLOOM'S<br>TAXONOMY) | PSOs<br>ADDRESSE<br>D |

| PSIT               | 19PG4ITPR      | PROJECT         | PG Core      | 1            | 6           |

**COURSE DESCRIPTION**

The project will be of one semester duration. The students will be sent to different organizations involved in IT as per the interest and specialization of students, mostly located in the place of the study. They will have to carry out a project related to the area of interest and submit a project report at the end of the semester. The students shall defend their dissertation in front of a panel of experts during the Viva-Voce examination.

**PROJECT PLAN**

- ❖ Facilitates experiential learning
- ❖ Students are offered career training as part of the curriculum through this Project.
- ❖ This project work motivates them and also gives insights about Software Development.
- ❖ Encouraged to do Real time projects.
- ❖ At the end of the semester the project is evaluated by conducting viva-voce with presentation of the report.

**Phase – I**

- Students get acceptance letter to do project in any IT company in and around Madurai
- Problem identification in various IT, Academical, Societal, Commercial and Environmental applications
- Requirements gathering and analysis for selecting tool
- Separate modules individually

**Phase – II**

- Design UI
- Develop programs module level, test and debug individually

**Phase – III**

- Integrate the modules and show individual DEMO
- Test the app with the users, improve accordingly and conclude the results
- Document the above process as a report

## EVALUATION PATTERN

| MARKS    |          |     |     |       |

**COURSE DESCRIPTION**

This Course provides knowledge of R- Programming and explains the different statements and functions used in R- Programming.

**COURSE OBJECTIVES**

- To understand the fundamentals of R-Programming
- To apply the concept of R- Programming in the real world scenario.

**UNITS****UNIT –I :INTRODUCTION**

R Data Types, Arithmetic & Logical Operators - R Matrix Tutorial: Create, Print, add Column, Slice - Factor in R: Categorical & Continuous Variables

**UNIT –II : STATEMENTS**

IF, ELSE, ELSE IF Statement - For Loop - While Loop

**UNIT –III FUNCTIONS**

apply(), lapply(), sapply(), tapply() Function

**UNIT –IV IMPORTING& EXPORTING**

Import Data into R: Read CSV, Excel, SPSS, Stata, SAS Files - R Exporting Data to Excel, CSV, SAS, STATA, Text File

**UNIT –V AGGREGATE FUNCTIONS**

Summarise & Group\_by() - R Select(), Filter(), Arrange(), Pipeline

### UNIT –VI DYNAMISM (Evaluation Pattern-CIA only)

R Data Frame: Create, Append, Select, Subset - R Vs Python - SAS Vs R

### Digital Open Educational Resources (DOER) :

<https://www.atnyla.com/syllabus/r-programming-language/7>

## COURSE OUTCOMES

On the successful completion of the course, students will be able to:

| NO.  | COURSE OUTCOMES   | KNOWLEDGE LEVEL<br>(ACCORDING TO REVISED BLOOM'S TAXONOMY) | PSOs ADDRESSED |
|------|---|--|----------------|
| CO 1 | To understand the basic concepts in R- Programming.           | K2   | PSO1, PSO2     |
| CO 2 | Illustrate various statements used in R-Programming           | K2, K3   | PSO3, PSO5     |
| CO 3 | Analyze various techniques to import and export the data set. | K3, K4   | PSO5, PSO6     |
| CO 4 | To know about the aggregate functions.                        | K4, K5   | PSO6, PSO7     |
| CO 5 | Implementation of R-Programming in current scenario           | K4, K5   | PSO8, PSO9     |

### Mapping of COs with PSOs

| CO/<br>PSO | PS<br>O1 | PSO<br>2 | PSO<br>3 | PSO<br>4 | PSO<br>5 | PSO<br>6 | PSO<br>7 | PSO<br>8 | PSO<br>9 |
|------------|----------|----------|----------|----------|----------|----------|----------|----------|----------|
| CO1        | 3        | 3        | 1        | 1        | 1        | 1        | 1        | 1        | 1        |
| CO2        | 1        | 1        | 3        | 1        | 3        | 1        | 1        | 1        | 1        |

|            |          |          |          |          |          |          |          |          |          |
|------------|----------|----------|----------|----------|----------|----------|----------|----------|----------|
| <b>CO3</b> | <b>2</b> | <b>1</b> | <b>1</b> | <b>1</b> | <b>3</b> | <b>3</b> | <b>1</b> | <b>1</b> | <b>1</b> |
| <b>CO4</b> | <b>1</b> | <b>1</b> | <b>1</b> | <b>2</b> | <b>1</b> | <b>3</b> | <b>3</b> | <b>1</b> | <b>1</b> |
| <b>CO5</b> | <b>1</b> | <b>1</b> | <b>2</b> | <b>1</b> | <b>2</b> | <b>1</b> | <b>1</b> | <b>3</b> | <b>3</b> |

### Mapping of COs with POs

| <b>CO/ PSO</b> | <b>PO1</b> | <b>PO2</b> | <b>PO3</b> | <b>PO4</b> |
|----------------|------------|------------|------------|------------|
| <b>CO1</b>     | <b>3</b>   | <b>2</b>   | <b>1</b>   | <b>1</b>   |
| <b>CO2</b>     | <b>3</b>   | <b>2</b>   | <b>1</b>   | <b>1</b>   |
| <b>CO3</b>     | <b>3</b>   | <b>2</b>   | <b>1</b>   | <b>1</b>   |
| <b>CO4</b>     | <b>3</b>   | <b>2</b>   | <b>1</b>   | <b>1</b>   |
| <b>CO5</b>     | <b>3</b>   | <b>2</b>   | <b>1</b>   | <b>1</b>   |

**Note:** ♦ Strongly Correlated – **3**      ♦ Moderately Correlated – **2**  
 ♦ Weakly Correlated – **1**

**COURSE OBJECTIVES**

To create awareness about the supply chain activities taken in order to deliver the goods

**UNIT -I**

Supply Chain Management – Global Optimization – importance – key issues – Inventory management – economic lot size model. Supply contracts – centralized vs. decentralized system

**UNIT -II**

Supply chain Integrates- Push, Pull strategies – Demand driven strategies – Impact on grocery industry – retail industry – distribution strategies

**UNIT -III**

Strategic Alliances: Frame work for strategic alliances – 3PL – merits and demerits – retailer – supplier partnership – advantages and disadvantages of RSP – distributor Integration

**UNIT -IV**

Procurement and Outsourcing: Outsourcing – benefits and risks – framework for make/buy decision – e-procurement – frame work of e-procurement

**UNIT -V**

Dimension of customer Value – conformance of requirement – product selection – price and brand – value added services – strategic pricing – smart pricing – customer value measures

### TEXT BOOK:

1. Rushton, A., Oxley, J & Croucher, P, “Handbook of Logistics and Distribution Management”, Kogan Page, 2<sup>nd</sup> Edition, 2007.

### REFERENCE BOOKS:

1. Simchi-Levi, David, Kamisnky, Philip, and Simchi-Levi, Edith, “Designing and Managing the supply chain concepts, strategies and case studies”, 3<sup>rd</sup> Edition, 2008.
2. Irwin, “Designing and Managing the Supply Chain: Concepts, Strategies and Case Studies”, McGraw Hill. 2006.
3. R.B. Handfield and E.L. Nichols, “Introduction to Supply Chain Management”, Prentice Hall, 2006.

### COURSE OUTCOMES

On the successful completion of the course, students will be able to:

| NO.  | COURSE OUTCOMES  | KNOWLEDGE LEVEL<br>(ACCORDING TO REVISED BLOOM'S TAXONOMY) | PSOs ADDRESSED            |
|------|--|--|---------------------------|
| CO 1 | Explain the recent developments in the Indian financial system.                    | K2   | PSO1, PSO2 & PSO 3        |
| CO 2 | Understand the fundamental concepts and working of financial service institutions. | K2, K3   | PSO1, PSO2, PSO3 & PSO 4  |
| CO 3 | Illustrate valuation of companies by venture capitalist.                           | K2, K4   | PSO1, PSO2, PSO 3 & PSO 6 |
| CO 4 | provide knowledge about the management of <i>mutual funds</i>                      | K2, K3 & K4  | PSO1, PSO2, & PSO 6       |
| CO 5 | Learn about stock market with Basics of Financial Markets                          | K3 & K5  | PSO1, PSO3, & PSO5        |

**Mapping COs Consistency with PSOs**

| CO/<br>PSO | PS<br>O1 | PSO<br>2 | PSO<br>3 | PSO<br>4 | PSO<br>5 | PSO<br>6 |
|------------|----------|----------|----------|----------|----------|----------|
| CO1        | 3        | 3        | 3        | 2        | 2        | 2        |
| CO2        | 3        | 3        | 3        | 3        | 2        | 2        |
| CO3        | 3        | 3        | 3        | 2        | 2        | 3        |
| CO4        | 3        | 3        | 2        | 2        | 2        | 3        |
| CO5        | 3        | 3        | 3        | 2        | 2        | 3        |

**Mapping COs Consistency with POs**

| CO/<br>PO | PO1 | PO2 | PO3 | PO4 |
|-----------|-----|-----|-----|-----|
| CO1       | 3   | 3   | 2   | 2   |
| CO2       | 3   | 3   | 2   | 2   |
| CO3       | 3   | 3   | 2   | 2   |
| CO4       | 3   | 3   | 2   | 2   |
| CO5       | 3   | 3   | 2   | 2   |
