19H5CC9 -GREEN REVOLUTION.mkv

### What is Green Revolution??

The Green Revolution was a period when the productivity of global agriculture increased drastically as a result of new advances. During this time period, new chemical fertilizers and pesticides were created. The chemical fertilizers made it possible to supply crops with extra nutrients and, therefore, increase yield. The newly developed pesticides controlled weeds, deterred or kill insects, and prevented diseases, which also resulted in higher productivity.

ameswari Green Revolution - Dr.P.Par

0:14 / 9:36

19H6ME2.mp4

- Women's Studies is an interdisciplinary study of women and society from the standpoint of women's lived experiences.
- It provides a counterpoint to the historically established theories in the various branches of human knowledge and challenges the predominantly male centric understanding of social institutions and processes.
- In its essence, Women's Studies is both a perspective and a discipline: it challenges the notions of objectivity of knowledge.
- A body of literature that embodies the concern for women's equality and development and seeks to find explanations and remedies for the unequal position of women in the society; a set of research and analysis which enquires into the origin and basis of these discriminatory practices against women, which has come to be concisely defined as Women's Studies.

## THE RESEARCH DEPARTMENT OF ECONOMICS

### E-Content Videos

**PROPERTY INSURANCE:**

**Definition:**

Insurance that protects the physical property and equipment of a business against loss from theft, fire or other perils all risk coverage covers against all risks; named peril coverage covers against specific perils named in the policy.

**Meaning:**

Property insurance is a broad term for a series of policies that provide either property protection coverage or liability coverage for property owners. Property insurance provides financial reimbursement to the owner or renter of a structure and its contents in case there is damage or theft and to a person other than the owner or renter if that person is injured on the property.

## INDUCTIVE EFFECT

The inductive effect (I Effect) refers to the polarity produced in a molecule as a result of higher electronegativity of one atom compared to another.

Simply we can say,,

Inductive effect is defined as permanent displacement of shared electron pair in carbon chain towards more electronegative atom or group.

## DEPARTMENT OF ZOOLOGY

The department of Zoology has adopted ICT enabled teaching-learning approach. ICT-enabled teaching in the institute helps to enhance the learning experience of the students and encourages their active involvement in the learning process.

- The department has a spacious lab with **LCD projectors, high-speed internet connection, and an audio system.** Teachers use these modern pedagogy tools to deliver the course effectively.

**Dr. Antony Amala Jayaseeli delivering a lecture during the practical classes for I B.Sc students of the Zoology department.**

Teaching is done by offline as well as online mode during the beginning of the semester. Online teaching is conducted by using google meet platform.

**What Is the Purpose of Research?**

There are three purposes of research:

- **Exploratory:** As the name suggests, exploratory research is conducted to explore a group of questions. The answers and analytics may not offer a final conclusion to the perceived problem. It is conducted to handle new problem areas which haven't been explored before. This exploratory process lays the foundation for more conclusive research and data collection.
- **Descriptive:** Descriptive research focuses on expanding knowledge on current issues through a process of data collection. Descriptive studies are used to describe the behavior of a sample population. In a descriptive study, only one variable is required to conduct the study. The three main purposes of descriptive research are describing, explaining, and validating the findings. For example, a study conducted to know if top-level management leaders in the 21st century possess the moral right to receive a huge sum of money from the company profit.
- **Explanatory:** Explanatory research or causal research is conducted to understand the impact of certain changes in existing standard procedures. Conducting experiments is the most popular form of casual research. For example, a study conducted to understand the effect of rebranding on customer loyalty.

## DEPARTMENT OF BUSINESS ADMINISTRATION

### E-Contents developed

Who is an Entrepreneur?

- An entrepreneur is an individual who conceives the idea of starting a new venture, take all types of risks, not only to put the product or service into reality but also to make it an extremely demanding one.

ED - VINOTH

Correlation Analysis

Correlation deals with the association between two or more variables

- It attempts to determine the 'degree of relationship' between the variables
- Correlation is an analysis of the co variation between two or more variables

**Classification of correlation**

Positive or Negative correlation ( direction of change)

Simple and multiple correlation ( no.of variables)

Linear or non linear correlation ( rate of change between the variables)

Principles of Marketing

## Introduction

- ⊗ Promotion is a type of communication between the buyer and the seller.
- ⊗ The seller tries to persuade the buyer to purchase their goods or services through promotions
- ⊗ It helps in making the people aware of a product, service or a company.
- ⊗ It also helps to improve the public image of a company
- ⊗ This method of marketing may also create interest in buyers and can also generate loyal customers
