ZOOLOGY

Title : Webinar on Stem Cell Biology

Date : 9.05.2022

Resource Person : 1. Dr. I.R. Oviya
Assistant Professor
Department of Sciences
Amrita VishwaVidyapeetham
Chennai Campus
(Alumna Batch 2003-2006)

2. Dr. S. Gracy Jenifer
Assistant Professor
Department of Biotechnology
School of Bio & Chemical Engineering
Sathyabama Institute of Science &
Technology, Chennai
(Alumna Batch 2009-2012)

No. of Participants : 140

Focus on : Research Methodology

Outcome : Through this program students are motivated to do research.

Report : Dr. I.R. Oviya, Department of Sciences, Amrita VishwaVidyapeetham, Assistant Professor, Chennai Campus highlighted the Computational Approaches in Stem Cell Biology and Dr. S. Gracy Jenifer, Assistant Professor, Department of Biotechnology, School of Bio & Chemical Engineering, Sathyabama Institute of Science & Technology, Chennai, spoke on Targeting Cancer Stem Cells to overcome Therapeutic Resistance. They also motivated students to take up research on Stem Cell.

FATIMA COLLEGE

Affiliated to Madurai Kamaraj University

Re-Accredited with 'A++' (CGPA 3.61) by NAAC (Cycle - IV)

Mary Land, Madurai - 625018, Tamil Nadu

INVITATION

FATIMA COLLEGE
(Autonomous)
Re-Accredited with 'A++' by NAAC (Cycle- IV)
Mary Land, Madurai - 625018.

PG Department of Zoology

Organizes a Webinar on
STEM CELL BIOLOGY

May 9, 2022

Session I
Time: 3.00 p.m – 4.00 p.m
Computational Approaches
in Stem Cell Biology

Session II
Time: 4.00 p.m – 5.00 p.m
Targeting Cancer Stem Cells to
overcome Therapeutic Resistance

Resource Person
Dr. I.R. Oviya
Assistant Professor
Department of Sciences
Amrita Vishwa Vidyapeetham
Chennai Campus
(Alumna Batch 2003-2006)

Resource Person
Dr. S. Gracy Jenifer
Assistant Professor
Department of Biotechnology
School of Bio & Chemical Engineering
Sathyabama Institute of Science &
Technology, Chennai
(Alumna Batch 2009-2012)

Patrons
Dr. Sr. M. Francisca Flora
Secretary

Dr. Sr. G. Celine Sahaya Mary
Principal

Convenor
Dr. A. Tamil Selvi
Assistant Professor & Head
Department of Zoology

Organizing Committee
Dr. Antony Amala Jayaseeli
Dr. N. Malathi
Dr. Sr. Bijji Cyriac
Dr. V. Bharathy
Dr. N. Nagarani
Dr. S. Barathy
Ms. J. Thelma
Ms. T. Rino
Dr. K. Manimegalai

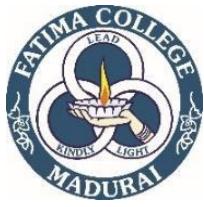

No Registration Fee
E Certificate will be provided

Meeting ID:
[http://meet.google.com/ymx-pzqq-kns](https://meet.google.com/ymx-pzqq-kns)

Mary Land, Madurai - 625018, Tamil Nadu

Photo with caption

Dr. I. R. OVIYA is presenting

- ▶ Embryonic stem cell Cells derived from very early in development, usually the inner cell mass of a developing blastocyst. These cells are self-renewing (can replicate themselves) and pluripotent (can form all cell types found in the body).
- ▶ Pluripotent stem cells Stem cells that can become all the cell types that are found in an implanted embryo, fetus or developed organism. Embryonic stem cells are pluripotent stem cells
- ▶ Induced pluripotent stem (iPS) cell Induced pluripotent cells (iPS cells) are stem cells that were engineered ("induced") from non-pluripotent cells to become pluripotent. In other words, a cell with a specialized function (for example, a skin cell) that has been "reprogrammed" to an unspecialized state similar to that of an embryonic stem cell
- ▶ Mesenchymal stem cells Mesenchymal stem cells were originally discovered in the bone marrow, but have since been found throughout the body and can give rise to a large number of connective tissue types such as bone, cartilage and fat.
- ▶ Multipotent stem cells Stem cells that can give rise to several different types of specialized cells, but in contrast to a pluripotent stem cell, are restricted to a certain organ or tissue types. For example, blood stem cells are multipotent cells that can produce all the different cell types that make up the blood but not the cells of other organs such as the liver or brain.

Dr. I. R. OVIYA is presenting

Lineage potential

Totipotent cell: Capable of giving rise to all cell types of body and extra-embryonic tissues

Pluripotent cell: Capable of giving rise to all cell types of body

Multipotent cell: Capable of giving rise to all cell types of a particular tissue or organ

Nullipotent cell: Not capable of giving rise to other cell types

Stem cell potency

Stem cell Gene Therapy

- Gene therapy is the use of nucleic acid polymers as a drug to treat disease by therapeutic delivery into a patient's cells, where they are either expressed as proteins, interfere with the expression of proteins, or possibly even correct genetic mutations.
- The most common form of gene therapy involves using DNA that encodes a functional, therapeutic gene to replace a mutated gene. In gene therapy, the nucleic acid molecule is packaged within a "vector", which is used to get the molecule inside cells within the body.
- Specific surface markers allow the identification and enrichment of hematopoietic stem cells from a mixed population of bone marrow or peripheral blood cells.
