

FATIMA COLLEGE (AUTONOMOUS)

**Re-Accredited with "A++" Grade by
NAAC(IV Cycle)
Maryland, Madurai- 625 018, Tamil Nadu, India**

NAME OF THE DEPARTMENT :STATISTICS

NAME OF THE PROGRAMME: B.Sc.STATISTICS

PROGRAMME CODE :USST

ACADEMIC YEAR :2022-2023

Minutes of the Annual Upgradation of Syllabus meeting in Statistics held on 15-03-2022 at 10.30 A.M.

Members :

1. Dr. E. Helena, Head, Department of Statistics, Fatima College, Madurai.
2. Dr. A. Shopia Lawrence, Assistant Professor, Department of Mathematics, Madurai Kamaraj University, Madurai
3. Dr. A. Kachi Mohideen, Assistant Professor, PG and Research Department of Statistics, Thanthai Periyar Govt. Arts and Science College, Trichy.
4. Dr. V. Sangeetha, Assistant Professor, Department of Statistics, PSG Arts and Science College, Coimbatore.
5. Ms. S. Sindhuja, Senior Statistical officer, NSSO (FOD) TN (N), Chennai R.O. Ministry of Statistics & P.I Government of India, Chennai.
6. Ms. A. Poshni, Data Analyst, Neuralnet data science, Horamavu, Bengaluru. Karnataka
7. Dr. K. Manu, Assistant Professor, Department of Statistics, Fatima College, Madurai.
8. Mrs. P. Dhanapriya, Assistant Professor, Department of Statistics, Fatima College, Madurai.
9. Dr. M. Manoprabha, Assistant Professor, Department of Statistics, Fatima College, Madurai.
10. Ms. A. Mable Jasmine Shoba, Dean of Academic Affairs

1. Action taken report for 2021 - 2022

S. NO.	Comments Suggested offered in the Previous Board	Action taken for the Academic year 2021-22
1.	Change of title for the Course: 19ST4CC7 - Statistical Inference - I	The title is changed as Estimation Theory.
2.	Self Learning Course to be introduced	Self Learning Course introduced for I UG. 1. Quantitative Aptitude and Data Interpretation

2. Updation of Open educational resources in the list of references of each Course.

S. NO.	Course Code	Course Title	Details of updation

3. Revision of Courses

S. No.	Course Code	Course Title	No. of units revised	% of revision	Relevance to				Scope for			
					L	R	N	G	EM	EN	SD	
1	19ST1CC2	Probability Theory	1	5%				✓				✓
2	22GIACST1	Calculus	2	25%				✓				✓
3	19ST2CC3	Descriptive statistics	1	15%					✓			✓
4	22ST3CC5	Continuous Probability Distributions	2	40%					✓			✓
5	22ST4CC8	Applied Statistics	3	50%				✓		✓		✓
6	19ST5CC12	Real Analysis	1	15%				✓				✓
7	19ST6CC14	Stochastic Processes	1	15%				✓				✓
8	19ST3SB1	Practical Statistics - I		15%				✓		✓		✓

4. New Courses introduced

S. No.	Course Code	Course Title	Relevance to				Scope for			Need for Introduction
			L	R	N	G	EM	EN	SD	
1	22ST4SB2	Sampling Distributions				✓			Employability	To introduce more problems on t, F, χ^2
2	22ST5ME3	Object Oriented Programming with C++				✓			Employability & Entrepreneurship	To facilitate advanced learners
3	22ST5ME4	C++ Practicals								
4	22ST6ME10	Econometrics			✓				Employability	For increased job opportunities
5	22UGIVAST1	Statistics using MS Excel				✓			Employability & Skill Development	To facilitate advanced learners
6	22ST4SL2	Differential Equations			✓				Skill Development	

The board reviewed the syllabi for I UG (I & II Semester), II UG (III & IV Semester) and III UG (V & VI Semester).

The following revisions were carried out:

19ST1CC2 - Probability Theory : The Concept Correlation is included

22G1ACST1 - Calculus : Fourier Transform is removed and basics of differentiation and integration are included

19ST2CC3 - Descriptive Statistics : Curve fitting is included.

22ST3CC5 - Continuous Probability Distributions : More Problems on Normal, Beta, gamma distributions are included, Sampling distribution is removed

22ST4CC8 - Applied Statistics : More Content on time Series, National Income Estimate is included. Curve fitting, Interpolation & Extrapolation and vital statistics are removed and included in Descriptive Statistics, Numerical methods and Demography.

19ST5CC12 - Real Analysis : The Content Connectedness, Completeness and Compactness are removed.

19ST6CC14 - Stochastic Processes : Few Concept in Markov chain is included.

19ST3SB1 - Practical Statistics - I : More Problems on Binomial, Poisson and Sampling theory are included.

I Semester

19ST1CC1 - Basic Statistics

19ST1CC2 - Probability Theory.

22G1ACST1 - Calculus

21ST1MHE - Fundamentals of Statistics.

ii Semester

- 19ST2CC3 - Descriptive Statistics
- 19ST2CC4 - Discrete Probability Distributions
- 19G2ACST2 - Algebra
- 21ST2NME - Fundamentals of Statistics

iii Semester

- 22ST3CC5 - Continuous Probability Distributions
- 19ST3CC6 - Sampling Theory
- 19G3ACST3 - Linear Programming
- 19ST3SB1 - Practical Statistics - I

iv Semester

- 19ST4CC7 - Estimation Theory
- 22ST4CC8 - Applied Statistics
- 19G4ACST4 - Linear Algebra
- 22ST4SB2 - Sampling Distributions

v Semester

- 19ST5CC9 - Testing of Hypotheses
- 19ST5CC10 - Design of Experiments
- 19ST5CC11 - Demography
- 19ST5CC12 - Real Analysis
- 19ST5ME1 & - Computer Programming in C
- 19ST5ME2 - C - Practicals
- 22ST5ME3 & - Object Oriented Programming with C++
- 22ST5ME4 - C++ Practicals
- 19ST5SB3 - Practical Statistics - iii
- 19ST5SB4 - Statistical Software: SPSS

vi Semester

- 19ST6CC13 - Statistical Quality Control

- 19ST6CC14 - Stochastic Processes.
- 19ST6CC15 - Actuarial Statistics.
- 19ST6ME51 - Numerical methods /
- 19ST6ME61 - Multivariate Analysis /
- 19ST6ME7 - Regression Analysis
- 19ST6ME81 - Operations Research /
- 19ST6ME91 - Industrial Statistics /
- 22ST6ME10 - Econometrics.

The board also reviewed the Allied Core Syllabus for I B. Com: 19A1AC1 - Statistical Methods & for I B. Com with Computer Applications; 22K2AC2 - Business Statistics and Maths.

15/3/2022

VISION OF THE DEPARTMENT

To empower women by developing human capabilities through quality education in the field of Statistics

MISSION OF THE DEPARTMENT

To develop statistical and probabilistic theories and techniques and to propagate statistical knowledge through teaching and outreach programmes, in order to serve the needs of the society.

PROGRAMME EDUCATIONAL OBJECTIVES (PEO)

A graduate of B.Sc. STATISTICS programme after five years will be

PE O1	Our graduates will be academic, digital and information literates, creative, inquisitive, innovative and desirous for the “more” in all aspects
PE O2	They will be efficient individual and team performers, exhibiting progress, flexibility, transparency and accountability in their professional work
PE O3	The graduates will be effective managers of all sorts of real-life and professional circumstances, making ethical decisions, pursuing excellence within the time framework and demonstrating apt leadership skills
PE O4	They will engage locally and globally evincing social and environmental stewardship demonstrating civic responsibilities and employing right skills at the right moment.

GRADUATE ATTRIBUTES (GA)

Fatima College empowers her women graduates holistically. A Fatimite achieves all-round empowerment by acquiring Social, Professional and Ethical competencies. A graduate would sustain and nurture the following attributes:

I. SOCIAL COMPETENCE	
GA1	Deep disciplinary expertise with a wider range of academic and digital literacy
GA2	Have creativity, passion for innovation and aspire excellence
GA3	Enthusiasm toward emancipation and empowerment of humanity
GA4	Potentials of being independent
GA5	Intellectual competence and inquisitiveness with problemsolving abilities befitting the field of research
GA6	Effectiveness in different forms of communication to be employed in personal and professional environments through varied platforms
GA7	Communicative competence with civic, professional and cyberdignity and decorum
GA8	Integrity respecting the diversity and pluralism in societies, cultures and religions
GA9	All-inclusive skillset to interpret, analyse and solve social and environmental issues in diverse environments
GA10	Self-awareness that would enable them to recognise their uniqueness through continuous self-assessment in order to face and make changes building on their strengths and improving their weaknesses
GA11	Finesse to co-operate exhibiting team-spirit while

	workinggroupstoachievegoals
GA12	Dexterityinself-managementtocontroltheirselvesinattainingthekindoflifethattheydreamfor
GA13	Resiliencetoriseupinstantlyfromtheirintimidatingsetbacks
GA14	Virtuosity to use their personal and intellectualautonomyinbeinglife-longlearners
GA15	Digitallearningandresearchattributes
GA16	Cybersecuritycompetencereflectingcompassion,careandconcerntowardsthemarginalised
GA17	Rectitudetousedigitaltechnologyreflectingcivicandsocialresponsibilitiesinlocal,nationalandglobalscenario
II. PROFESSIONALCOMPETENCE	
GA18	Optimism,flexibilityanddiligencethatwouldmaketheprofessionallycompetent
GA19	Prowesstobesuccessfulentrepreneursandbecomeemployeesoftrans-nationalsocieties
GA20	ExcellenceinLocalandGlobalJobMarkets
GA21	EffectivenessinTimeManagement
GA22	EfficiencyintakingupInitiatives
GA23	Eagernesstodeliverexcellentservice
GA24	ManagerialSkillstoIdentify,CommendandtapPotentials
III. ETHICALCOMPETENCE	
GA25	Integrity and be disciplined in bringing stabilityleadingasystematiclifepromotinggoodhumanbehaviourtobuildbetersociety

GA26	Honesty in words and deeds
GA27	Transparency revealing one's own character as well as self-esteem to lead a genuine and authentic life
GA28	Social and Environmental Stewardship
GA29	Readiness to make ethical decisions consistently from the glare of conflicting choices paying heed to their conscience
GA30	Right life skills at the right moment

PROGRAMME OUTCOMES (PO)

On completion (after three years) of B.Sc. Statistics programme, the graduates would be able to

P01	Apply acquired scientific knowledge to solve complex issues
P02	Attain analytical skills to solve complex cultural, societal and environmental issues
P03	Employ latest and updated tools and technologies to analyse complex issues
P04	Demonstrate Professional Ethics that foster Community, Nation and Environment Building Initiatives

PROGRAMME SPECIFIC OUTCOMES (PSO)

On completion (after three years) of B.Sc. Statistics programme, the graduates would be able to

PSO1	Apply the knowledge of Statistics, Mathematics and Computer science to become competent professionals at global level
PSO2	Apply statistical knowledge to analyze and solve complex problems using appropriate statistical methodology and interpret results in a variety of settings
PSO3	Demonstrate the ability of critical observation, logical, analytical and problem-solving skills
PSO4	Write code to extract and reformat real data and to utilize statistical programming environments
PSO5	Effectively present statistical findings to an audience lacking statistical expertise and work collaboratively
PSO6	Excel as socially committed statistics student having mutual respect, effective communications skills, high ethical values and empathy for the needs of society

PROGRAMME CODE	COURSE CODE	COURSE TITLE	CATEGORY	HRS/WEEK	CREDITS
USST	22ST4SB2	Sampling Distribution	Lecture	2	2

COURSE DESCRIPTION

The course provides an application related to the concepts of sampling distribution for large & small samples.

COURSE OBJECTIVES

To expose the students analyze the statistical techniques in real life situations

UNIT – I CHI-SQUARE DISTRIBUTION (6 HRS.)

Introduction – derivation of the χ^2 distribution – moment generating function of the χ^2 distribution –

UNIT – II CHI-SQUARE DISTRIBUTION CONT.(6 HRS.)

Some theorems on χ^2 distribution – linear transformation – applications of χ^2 distribution.

UNIT – III t - DISTRIBUTION (6 HRS.)

Introduction – student's 't' distribution – applications of 't' distribution – distribution of sample correlation coefficient when population correlation coefficient $\rho=0$ -

UNIT -IV F - DISTRIBUTION (6 HRS.)

f distribution – applications of f distribution – relation between t and f distributions – relation between f and χ^2 distribution.

UNIT -V F - DISTRIBUTION CONT. (6 HRS.)

Relation between t and f distributions – relation between f and χ^2 distribution.

SEMESTER -V

For those who joined in 2021 onwards

Skill Development-100%

PROGRAMME CODE	COURSE CODE	COURSE TITLE	CATEGORY	HRS/WEEK	CREDIT
USST	22ST5ME3	Object Oriented Programming with C++	Lecture	3	3

COURSE DESCRIPTION

This course introduces the student to object-oriented programming through a study of the concepts of program specification and design, algorithm development.

COURSE OBJECTIVES

In the expanding field of computer education, one of the fastest growing, versatile and much sought after languages is C++. This course enables the students to understand the fundamentals of the language, the concepts related to the syntax of the language.

UNIT -I BEGINNING WITH C++, TOKENS, EXPRESSIONS AND CONTROL STRUCTURES, FUNCTIONS IN C++ (9 HRS.)

What is C++ - Applications of C++ - A simple C++ program - More C++ statements - Structure of C++ program - **Tokens - Keywords - Identifiers - Variables - Operators - Manipulators - Expressions - Control structures.** Introduction - The main function - **Function prototyping** - Call by reference - Return by reference - Return by reference - Inline function - Default arguments - Const arguments - Function overloading - Friend and virtual functions - Math library functions.

UNIT -II CLASSES AND OBJECTS (9 HRS.)

Introduction - C structures revisited - Specifying a class - Defining member functions - A C++ program with class - Making an outside function inline - Nesting of member functions - Private member functions - Arrays within a class - Memory allocation for objects - Static data members - Static member functions -

Arrays of objects – Objects as function arguments – Friendly functions – Returning objects – Const member functions – Pointers to members – Local classes.

UNIT – III CONSTRUCTORS, DESTRUCTORS AND OPERATOR OVERLOADING
(9 HRS.)

Introduction – Constructors and destructors - Defining operator overloading – Overloading unary operators - Overloading binary operators - Overloading binary operators using friends – Manipulation of strings using operators – Rules for overloading operators – Type conversions.

UNIT – IV INHERITANCE **(9 HRS.)**

Introduction – Defining derived classes – Single inheritance – Making a private member inheritable – Multilevel inheritance – Multiple inheritance – Hierarchical inheritance – Hybrid inheritance – Virtual base classes – Abstract classes – Constructors in derived classes – Member classes: Nesting of classes.

UNIT –V POINTERS, VIRTUAL FUNCTIONS AND POLYMORPHISM

(9 HRS.)

Introduction – Pointers – Pointers to objects –this pointer – Pointers to derived classes – Virtual functions – Pure virtual functions – Polymorphism.

TEXT BOOK:

1. E. Balagurusamy - *Object Oriented Programming with C++*, Tata McGraw-Hill Publishing Company Limited – Fourth Edition - 2007.

UNIT I : Chapter 2- 2.1 to 2.4, 2.6, Chapter 3- 3.2 to 3.24

Chapters 4- 4.1 to 4.11

UNIT II : Chapter 5- 5.1 to 5.19,

UNIT III: Chapter 6-6.1 to 6.11 Chapter 7- 7.1 to 7.8,

UNIT IV: Chapter 8-8.1 to 8.12

UNIT V : Chapter 9- 9.1 to 9.7

COURSE CONTENTS & LECTURE SCHEDULE:

Module No.	Topic	No. of Lectures	Teaching Pedagogy	Teaching Aids
UNIT -1 BEGINNING WITH C++, TOKENS, EXPRESSIONS AND CONTROL STRUCTURES, FUNCTIONS IN C++				
1.1	What is C++, Applications of C++, A simple C++ program, More C++ statements, Structure of C++ program and example programs.	2	Chalk & Talk	Black Board
1.2	Tokens, Keywords, Identifiers, Variables, Operators, Manipulators Expressions, Control structures. (self study)	1	Discussion	Black Board
1.3	Introduction, The main function, Function prototyping (self study) Call by reference, Return by reference	4	Chalk & Talk	Black Board
1.4	Inline function, Default arguments, Const arguments and example programs.	1	Chalk & Talk	Black Board
1.5	Function overloading, Friend and virtual functions, library functions and example programs.	1	Chalk & Talk	Black Board
UNIT -2 CLASSES AND OBJECTS				
2.1	Introduction, C structures revisited , Specifying a class, Defining member functions	1	Chalk & Talk	Black Board
2.2	A C++ program with class , Making an outside function inline ,Nesting of member functions , Private member functions, programs	1	Chalk & Talk	Black Board

2.3	Arrays within a class, Memory allocation for objects, Static data members, Static member functions, programs.	3	Chalk & Talk	Black Board
2.4	Arrays of objects, Objects as function arguments, Friendly functions , Returning objects, programs.	2	Chalk & Talk	Black Board
2.4	Const member functions , Pointers to members , Local classes, programs.	2	Chalk & Talk	Black Board

UNIT -3 CONSTRUCTORS, DESTRUCTORS AND OPERATOR OVERLOADING

3.1	Introduction, Constructors and destructors, programs.	1	Chalk & Talk	Black Board
3.2	Defining operator overloading , Overloading unary operators , Overloading binary operators , Overloading binary operators using friends, programs	2	Chalk & Talk	Black Board
3.3	Manipulation of strings using operators , Rules for overloading operators, programs	4	Chalk & Talk	Black Board
3.4	Type conversions, programs	2	Chalk & Talk	Black Board

UNIT -4 INHERITANCE

4.1	Introduction , Defining derived classes and programs.	1	Chalk & Talk	Black Board
4.2	Single inheritance , Making a private member inheritable , Multilevel inheritance and programs	4	Chalk & Talk	Black Board
4.3	Multiple inheritance , Hierarchical inheritance , Hybrid inheritance and programs	2	Chalk & Talk	Black Board
4.4	Virtual base classes , Abstract classes, Constructors in derived classes, Member classes: Nesting of classes and programs.	2	Chalk & Talk	Black Board

UNIT -5 POINTERS, VIRTUAL FUNCTIONS AND POLYMORPHISM

5.1	Introduction , Pointers , Pointers to objects and programs.	2	Chalk & Talk	Black Board
5.2	this pointer , Pointers to derived classes and programs.	3	Chalk & Talk	Black Board
5.3	Virtual functions , Pure virtual functions and programs.	2	Chalk & Talk	Black Board
5.4	Polymorphism and programs.	2	Chalk & Talk	Black Board

PROGRAMME CODE	COURSE CODE	COURSE TITLE	CATEGORY	HRS/WEEK	CREDITS
USST	22ST5ME4	C++ Practicals	Practical	2	2

1. To find the area of a square
2. To find the area of a circle
3. To find the area of a triangle
4. To find Simple interest
5. Solving Quadratic equations
6. Checking primes
7. Arranging numbers in ascending order
8. Reversing digits of a number
9. Finding the values of n and r .
10. Palindrome
11. Matrix addition
12. Matrix multiplication
13. Transpose of a matrix
14. Trace of a matrix
15. Alphabetizing names
16. Mean and Standard deviation
17. To find Correlation Coefficient
18. Straight line fitting by the method of least squares
19. To print n th Fibonacci number
20. To read a series of words from a terminal

III B.Sc. STATISTICS

For those who joined in 2020 onwards

PROGRAMME CODE	COURSE CODE	COURSE TITLE	CATEGORY	HRS/WEEK	CREDITS
USST	22ST6ME10	Econometrics	Lecture	5	5

COURSE DESCRIPTION

This course provides the basic principles of econometric models

COURSE OBJECTIVES

This course enables the students to use economic methods in several areas like engineering sciences, biological sciences, medical sciences, geo-sciences, agriculture sciences etc

UNIT – I THE SIMPLE REGRESSION MODEL

Model with one explanatory variable: Definition, scope and objectives of Econometrics. Linear model with one independent variable - Least squares estimators of regression coefficients, properties of least squares estimators - analysis of variance to regression model

UNIT – II MULTIPLE REGRESSION ANALYSIS: INFERENCE

Model with more variables: Linear model with more than one explanatory variables – assumptions – estimation of model parameter - Least squares estimators and their properties. Hypothesis testing – test the overall significance of the regression – Testing the individual regression coefficients

UNIT – III RESIDUAL ANALYSIS

Adequacy of Model: Model adequacy checking – residual analysis – residuals – standardized residuals – residual plot – normal probability plot – plot of residuals against estimated response. A formal test for lack of fit of the model

UNIT – IV MULTICOLLINEARITY

Multicollinearity: Meaning and sources – consequences of multicollinearity. Test for detecting multicollinearity – Examining the correlation matrix – Variance Inflation factor – Eigen values of $X'X$.

UNIT – V AUTOCORRELATION

Autocorrelation: Meaning of serial independence – sources of autocorrelation – first order autoregressive scheme – consequences of autocorrelation – Durbin – Watson test –

analysing the model in the presence of autocorrelation

DEPARTMENT OF STATISTICS

For those who joined in 2021 onwards

COURSE DESCRIPTION

This course is designed to make the students learn the concept of Differentiation

COURSE OBJECTIVES

PROGRAMME CODE	COURSE CODE	COURSE TITLE	CATEGORY	HRS/WEEK	CREDITS
USST	22ST4SL2	Differential Equations			2

To enable the students understand the mathematical concepts required to learn statistics

UNIT-I: DIFFERENTIAL EQUATIONS OF FIRST ORDER FIRST DEGREE

(6 Hrs.)

Variable Separable - Homogeneous equations – Non homogeneous equations of the first degree in x and y

UNIT-II: DIFFERENTIAL EQUATIONS OF FIRST ORDER - I (6 Hrs.)

Linear equations – Bernoulli's equation – Exact differential equation

UNIT III: DIFFERENTIAL EQUATIONS OF FIRST ORDER - II (6 Hrs.)

Linear equations with constant coefficient with terms of the form e^{ax} V on RHS – Linear equations with variable coefficients

UNIT-IV: PARTIAL DIFFERENTIAL EQUATIONS (6 Hrs.)

Formation of Partial Differential equations – First order Partial Differential Equations – Some standard forms

UNIT-V: APPLICATIONS (6 Hrs.)

Applications of first order equations: Growth, decay and chemical reactions.

PROGRAMME CODE	COURSE CODE	COURSE TITLE	CATEGORY	HRS/WEEK	CREDITS
USST	22UGVAST1	Statistics Using MS Excel	-	-	

COURSE DESCRIPTION

This paper gives an idea about various methods in which Statistics are being collected in different sectors Goal

COURSE OBJECTIVES

To enable the students to understand how the statistics are collected, recorded and published using MS Excel.

UNIT-I: Basics of Statistics

Collection of data – Classification of data – Tabulation – Presentation – Simple Bar & Multiple Bar charts, Pie chart, Histogram, Polygon

UNIT-II: Measures of Central Tendency & Dispersion

Mean, Median and Mode – Range, Standard deviation and Variance – ungrouped and grouped data with simple problems.

Moments – First four Central & Non-Central – simple problems Skewness & Kurtosis using moments

UNIT-III: Correlation & Regression Analysis

Simple, rank, multiple and partial correlations – Regression equations

UNIT-IV

MS Excel – Charts (Simple Bar & Multiple Bar charts, Pie chart), Pivot tables, formulae and Unit – II & III topics

Text Books

1. **Fundamentals of Statistics** – S.C. Srivastava & Sangya Srivastava
2. **Statistical Analysis: Microsoft Excel 2013** – Conard Carlberg

Reference Books

1. S.P Gupta **Statistical Methods**, Sultan Chand & Sons (2007).

I B.Sc STATISTICS

SEMESTER –I

For those who joined in 2022 onwards

PROGRAMME CODE	COURSE CODE	COURSE TITLE	CATEGORY	HRS/WEEK	CREDITS
USST	22G1ACST1	Calculus	Lecture	5	5

COURSE DESCRIPTION

This course covers differentiation and integration of functions of one variable.

COURSE OBJECTIVES

To enable the students to understand higher derivatives, curvature, singular points, envelopes, asymptotes, reduction formula, multiple integrals in calculus.

UNIT –I DIFFERENTIATION

(15 HRS.)

Differentiability –Algebra of Derivatives – Derivatives of Standard Functions –The Chain Rule – Differentiation of Inverse Functions – Differentiation by Transformation – Logarithmic Parametric Differentiation – Differentiation of Functions with respect to Functions- Differentiation of Implicit Function

UNIT – II HIGHER DERIVATIVES AND CURVATURE

(15 HRS.)

Higher Derivatives - n^{th} Derivative of some standard functions- Leibnitz theorem- p-r equations – Curvature , centre and radius of curvature

UNIT –III EVALUATION OF INTEGRALS (15 HRS.)

Some simple integrals – Method of Substitution – Integration of : Rational , Irrational and Trigonometric Functions – Evaluation of Definite Integrals – Integration by Parts

UNIT –IV REDUCTION FORMULA

(15 HRS.)

Reduction formula for $\sin^n x$, $\cos^n x$, $\tan^n x$, $\cot^n x$, $\operatorname{cosec}^n x$, $\sec^n x$, and $\sin^m x \cos^n x$.

UNIT –V MULTIPLE INTEGRALS

(15 HRS.)

Jacobian - (Self Study) – Double and Triple integrals

SEMESTER III

For those who joined in 2019 onwards
Skill Development-100%

PROGRAMME CODE	COURSE CODE	COURSE TITLE	CATEGORY	HRS/WEEK	CREDITS
USST	19ST3CC5	Continuous Probability Distribution	Lecture	6	4

COURSE DESCRIPTION

This course is designed to expose the students various important continuous probability models

COURSE OBJECTIVES

To enable the students understand the continuous probability distribution and real life situations where these distributions provide appropriate models.

UNIT-I NORMAL DISTRIBUTION

(18 HRS.)

Normal distribution as a limiting form of binomial distribution- chief characteristics of the normal distribution- mode, median, moment generating function of normal distribution- cumulant generating function of normal distribution - moments of normal distribution - a linear combination of independent normal variates - points of inflexion of normal curves - mean deviation about mean for normal distribution- area property- error function - importance of normal distributions- fitting of normal distribution

UNIT-II RECTANGULAR, BETA AND GAMMA DISTRIBUTIONS (18 HRS.)

Moments of rectangular distribution- m.g.f of rectangular distribution - characteristics function of rectangular distribution - mean deviation about mean of rectangular distribution - m.g.f of gamma distribution - cumulant generating function of gamma distribution - additive function of gamma distribution- beta distribution of first kind - beta distribution of second kind.

UNIT-III EXPONENTIAL AND CAUCHY DISTRIBUTIONS (18 HRS.)

Moment generating function of exponential distribution -
characteristic function of Cauchy distribution -
moments of Cauchy distribution - (Self Study).

UNIT-IV SAMPLING DISTRIBUTION (CHI-SQUARE) (18 HRS.)

Introduction - derivation of the χ^2 distribution - moment generating
 function of the χ^2 distribution - some theorems on χ^2 distribution - linear
 transformation - applications of χ^2 distribution.

UNIT-V SAMPLING DISTRIBUTION (t, F) (18 HRS.)

Introduction - student's t distribution - applications of t distribution
 - distribution of sample correlation coefficient when population correlation
 coefficient $\rho=0$ - f distribution - applications of f distribution - relation
 between t and f distributions - relation between f and χ^2 distribution.

COURSE CONTENTS & LECTURE SCHEDULE:

Module No.	Topic	No. of Lectures	Teaching Pedagogy	Teaching Aids
UNIT-1 NORMAL DISTRIBUTION				
1.1	Normal distribution as a limiting form of binomial distribution - chief characteristics of the normal distribution	4	Chalk & Talk	Black Board
1.2	Mode, median, moment generating function of normal distribution - cumulant generating function of normal distribution	5	Chalk & Talk	Black Board
1.3	Linear combination of independent normal variates	1	Chalk & Talk	Black Board
1.4	Mean deviation about mean for normal distribution - area property	3	Chalk & Talk	Black Board
1.5	Importance of normal distributions	2	Chalk & Talk	Black Board
1.6	Fitting of normal distribution	3	Chalk & Talk	Black Board
UNIT 2 RECTANGULAR, BETA AND GAMMA DISTRIBUTIONS				
2.1	Moments of rectangular distribution	4	Chalk & Talk	Black Board
2.2	m.g.f. of rectangular distribution - characteristics function of rectangular distribution	4	Chalk & Talk	Black Board
2.3	m.g.f. of gamma distribution - cumulant generating function of gamma distribution	4	Chalk & Talk	Black Board
2.4	beta distribution of first kind	3	Chalk & Talk	Black Board

Module No.	Topic	No. of Lectures	Teaching Pedagogy	Teaching Aids
2.5	Beta distribution of second kind.	3	Chalk & Talk	Black Board
UNIT-3 EXPONENTIAL AND CAUCHY DISTRIBUTIONS				
3.1	Moment generating function of exponential distribution	6	Chalk & Talk	Black Board
3.2	characteristic function of Cauchy distribution	6	Discussion	Black Board
3.3	Moments of Cauchy distribution.	6	Discussion	Black Board
UNIT-4 SAMPLING DISTRIBUTION (CHI-SQUARE)				
4.1	Derivation of the χ^2 distribution	4	Chalk & Talk	Black Board
4.2	Moment generating function of the χ^2 distribution	4	Chalk & Talk	Black Board
4.3	Linear transformation	4	Chalk & Talk	Black Board
4.4	Applications of χ^2 distribution.	6	Chalk & Talk	Black Board
UNIT-5 SAMPLING DISTRIBUTION (t, F)				
5.1	student's, t distribution	3	Chalk & Talk	Black Board
5.2	applications of, t distribution	4	Chalk & Talk	Black Board
5.3	application of f distribution	4	Chalk & Talk	Black Board
5.4	relation between t and f distributions	3	Chalk & Talk	Black Board
5.5	Relation between f and χ^2 distribution.	4	Chalk & Talk	Black Board

II B.Sc STATISTICS

SEMESTER -IV

For those who joined in 2021 onwards

Employability-60%

Skill Development-40%

PROGRAMME CODE	COURSE CODE	COURSE TITLE	CATEGORY	HRS/WEEK	CREDITS
USST	22ST4CC8	Applied statistics	Lecture	6	4

COURSE DESCRIPTION

This course provides some of the applications of statistics which includes topics such as time series, index numbers and national income.

COURSE OBJECTIVES

To enable the students understand and appreciate the applications of Statistics

UNIT -I TIME SERIES (18 HRS.)

Concepts of Time series-Components of Time series-Uses-Additive and Multiplicative Models-Measurement of Trend-Least Square Method-Fitting of Linear Trend- Method of Moving Averages

UNIT -II ANALYSIS OF TIME SERIES (18 HRS.)

Seasonal Variations-Simple Average, Ratio to Moving Average, Ratio to Trend, Link relative Method- Cyclical fluctuations-Residual method only-Random Components-Variate difference Method.

UNIT -III INDEX NUMBERS (18 HRS.)

Classification and methods-Tests of adequacy- Chain index numbers - **consumer price index numbers**- (Self Study).

UNIT -IV INDEX NUMBERS CONT. (18 HRS.)

Laspeyer's , Paasche's, Fisher's Kelly's and Marshall Edgeworth Index numbers- Tests for ideal index numbers. Cost of Living index number-Construction and uses.

UNIT -V NATIONAL INCOME (18 HRS.)

National Income-Estimation methods-Uses of National Income Estimate-Computational

difficulties in India.
