2.3. SOLID & LIQUID WASTE MANAGEMENT

The Solid waste management is taken care at the root level. The segregation of the dry and wet wastes is done. The students are made to deposit waste in colored bins labelled as dry and wet wastes. Further segregation if needed will be done by the sub staff.

The dry wastes will be accumulated in the vermicomposting pit. The wet waste is used as manure for plants or sent to the bio digester of the biogas plant.

The sanitary napkins are put in incinerators approved by the corporation and the smoke chimney is fixed at the stipulated height. Electric incinerators are installed in the wash rooms of the students and the staff.

The Liquid waste management will be in full capacity by the year 2023. As of now the output of the RO plant is accumulated in a tank and used for gardening.

2.4. E-WASTE MANAGEMENT

The college follows the concept of reduce, reuse and recycle

- To keep the campus ecofriendly the college will not stock obsolete and unusable electronic devices.
- The very old electronic goods will be sold to contribute towards purchase of new equipments.
- Instead of frequently buying new computers, the computers exceeding their lifetime will be upgraded to meet the current needs.
- The used but functional laptops and desktops will be donated to the sister concerns.
- The buy back policy of the retailers will be utilized for purchase of new computers and batteries for out dated/modelled computers and old batteries.
- In a phased-out manner, batteries that doesn't need refilling of distilled water will be used.
