

# **FATIMA COLLEGE (AUTONOMOUS)**

**Re-Accredited with “A++” Grade by NAAC (4<sup>th</sup> Cycle)**

**Maryland, Madurai- 625 018, Tamil Nadu, India**

**NAME OF THE DEPARTMENT: INFORMATION TECHNOLOGY**

**NAME OF THE PROGRAMME : M. Sc.**

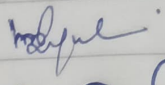

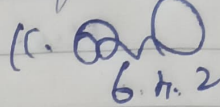

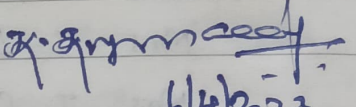

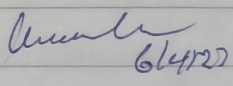

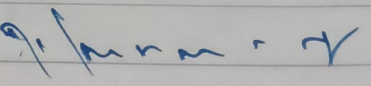

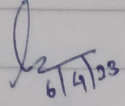

**PROGRAMME CODE : PSIT**

**ACADEMIC YEAR : 2023-24**

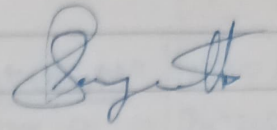

## M.Sc INFORMATION TECHNOLOGY

Minutes of the meeting of the Board of Studies  
for M.Sc IT held at Department of Information  
Technology on 6.4.23

Members present:

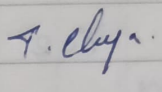

1. Mrs. V. Mageshwari, Head, Dept. of IT - 
2. Dr. K. Perumal, Prof, -   
Department of Computer Applications  
School of Information Technology,  
Madurai Kamaraj University  
Madurai. 6.4.23
3. Dr. K. Kungumaraj, -   
Head & Asst. Prof.  
PG Department of Computer Science,  
Anaimige palaniandavar college,  
Palani 6/4/2023
4. Dr. P. Joseph Charles, -   
Head & Professor,  
Department of Information Technology,  
St. Joseph college,  
Trichy. 6/4/23
5. Mr. S. Senthil Kumar, CEO, -   
Eminent Technologies Solutions,  
Madurai
6. Ms. T.G. Poominadevi, Faculty, -   
Dolphin Elite School,  
Madurai 6/4/23

7. Dr. K. Sangeetha,  
Dean of Academic Affairs (SF),  
Fatima College,  
Madurai.

8. Staff members:

\* Mrs. T. Leena Prema Kumari - 

\* Mrs. T. Charanya Nagammal - 

\* Dr. V. Jane Varamani Sulekha. - V.J.V. 

\* Dr. N. Kalaichelvi - N. K. 

\* Mrs. I. Razul Beeri - 

### I. ACTION TAKEN REPORT:

The Action Taken Report for the academic year 2022-23 was presented to the board members as,

| Suggestions   | Action Taken.  |
|---|--|
| * There are more than 10 courses are to be revised.                               | * As suggested, the topics are revised in all the courses.                 |
| * Nearly 14 courses are introduced including the major and Self-Learning courses. | * The suggested courses are introduced as major and Self-Learning courses. |

## MINUTES OF THE BOARD OF STUDIES:

### CORE COURSES INTRODUCED (PART-A).

### **VISION OF THE DEPARTMENT**

The vision is to be the center of excellence in training the students in Information Technology to excel both as a professional and as a responsible woman in the society.

### **MISSION OF THE DEPARTMENT**

- ✂ Empower women by teaching them technology and life lessons.
- ✂ Encourage students to be the change in the society.
- ✂ Educate students and prepare them in various aspects of IT industry.
- ✂ Provide leadership quality for effective strategic and tactical planning in use of technology.
- ✂ Instill the power of faith and hope so they could be the blessing to their next generation.

### **PROGRAMME EDUCATIONAL OBJECTIVES (PEO)**

A graduate of M.Sc. Information Technology programme after two years will be

|              |   |
|--------------|---|
| <b>PEO 1</b> | Our graduates will be academic, digital and information literates, creative, inquisitive, innovative and committed researchers who would be desirous for the “more” in all aspects  |
| <b>PEO 2</b> | They will be efficient individual and team performers who would deliver excellent professional service exhibiting progress, flexibility, transparency, accountability and in taking up initiatives in their professional work |
| <b>PEO 3</b> | The graduates will be effective managers of all sorts of real – life and professional circumstances, making ethical decisions, pursuing excellence within the time framework and demonstrating apt leadership skills          |

|              |  |
|--------------|--|
| <b>PEO 4</b> | They will engage locally and globally evincing social and environmental stewardship demonstrating civic responsibilities and employing right skills at the right moment. |
|--------------|--|

### GRADUATE ATTRIBUTES (GA)

Fatima College empowers her women graduates holistically. A Fatimite achieves all-round empowerment by acquiring Social, Professional and Ethical competencies. A graduate would sustain and nurture the following attributes:

| <b>I. SOCIAL COMPETENCE</b> |   |
|-----------------------------|---|
| <b>GA 1</b>                 | Deep disciplinary expertise with a wide range of academic and digital literacy  |
| <b>GA 2</b>                 | Hone creativity, passion for innovation and aspire excellence   |
| <b>GA 3</b>                 | Enthusiasm towards emancipation and empowerment of humanity   |
| <b>GA 4</b>                 | Potentials of being independent   |
| <b>GA 5</b>                 | Intellectual competence and inquisitiveness with problem solving abilities befitting the field of research  |
| <b>GA 6</b>                 | Effectiveness in different forms of communications to be employed in personal and professional environments through varied platforms  |
| <b>GA 7</b>                 | Communicative competence with civic, professional and cyber dignity and decorum   |
| <b>GA 8</b>                 | Integrity respecting the diversity and pluralism in societies, cultures and religions   |
| <b>GA 9</b>                 | All – inclusive skill sets to interpret, analyse and solve social and environmental issues in diverse environments  |
| <b>GA 10</b>                | Self awareness that would enable them to recognise their uniqueness through continuous self-assessment in order to face and make changes building on their strengths and improving their weaknesses |

|                                    |   |
|------------------------------------|---|
| <b>GA 11</b>                       | Finesse to co-operate exhibiting team-spirit while working in groups to achieve goals   |
| <b>GA 12</b>                       | Dexterity in self-management to control their selves in attaining the kind of life that they dream for                              |
| <b>GA 13</b>                       | Resilience to rise up instantly from their intimidating setbacks  |
| <b>GA 14</b>                       | Virtuosity to use their personal and intellectual autonomy in being life-long learners  |
| <b>GA 15</b>                       | Digital learning and research attributes  |
| <b>GA 16</b>                       | Cyber security competence reflecting compassion, care and concern towards the marginalised  |
| <b>GA 17</b>                       | Rectitude to use digital technology reflecting civic and social responsibilities in local, national and global scenario             |
| <b>II. PROFESSIONAL COMPETENCE</b> |   |
| <b>GA 18</b>                       | Optimism, flexibility and diligence that would make them professionally competent   |
| <b>GA 19</b>                       | Prowess to be successful entrepreneurs and become employees of trans-national societies   |
| <b>GA 20</b>                       | Excellence in Local and Global Job Markets  |
| <b>GA 21</b>                       | Effectiveness in Time Management  |
| <b>GA 22</b>                       | Efficiency in taking up Initiatives   |
| <b>GA 23</b>                       | Eagerness to deliver excellent service  |
| <b>GA 24</b>                       | Managerial Skills to Identify, Commend and tap Potentials   |
| <b>III. ETHICAL COMPETENCE</b>     |   |
| <b>GA 25</b>                       | Integrity and be disciplined in bringing stability leading a systematic life promoting good human behaviour to build better society |
| <b>GA 26</b>                       | Honesty in words and deeds  |
| <b>GA 27</b>                       | Transparency revealing one's own character as well as self-esteem to lead a genuine and authentic life                              |
| <b>GA 28</b>                       | Social and Environmental Stewardship  |

|              |   |
|--------------|---|
| <b>GA 29</b> | Readiness to make ethical decisions consistently from the galore of conflicting choices paying heed to their conscience |
| <b>GA 30</b> | Right life skills at the right moment   |

### PROGRAMME OUTCOMES (PO)

The learners will be able to

|             |  |
|-------------|--|
| <b>PO 1</b> | Apply acquired scientific knowledge to solve major and complex issues in the society/industry.     |
| <b>PO 2</b> | Attain research skills to solve complex cultural, societal and environmental issues.               |
| <b>PO 3</b> | Employ latest and updated tools and technologies to solve complex issues.                          |
| <b>PO 4</b> | Demonstrate Professional Ethics that foster Community, Nation and Environment Building Initiatives |

### PROGRAMME SPECIFIC OUTCOMES (PSO)

On completion of M.Sc.IT programme, the graduates would be able to

|              |   |
|--------------|---|
| <b>PSO 1</b> | Understand the concepts and applications in the field of Information Technology like Web designing and development, Mobile application development, and Network communication technologies. |
| <b>PSO 2</b> | Ability to understand the structure and development methodologies of software systems.  |
| <b>PSO 3</b> | Apply the learning from the courses and develop applications for real world problems.   |

|              |   |
|--------------|---|
| <b>PSO 4</b> | Understand the technological developments in the usage of modern design and development tools to analyze and design for a variety of applications.        |
| <b>PSO 5</b> | Familiarity and practical competence with a broad range of programming language and open source platforms.  |
| <b>PSO 6</b> | Demonstrate the understanding of the principles and working of the hardware and software aspects of computer systems                                      |
| <b>PSO 7</b> | Possess professional skills and knowledge of software design process.   |
| <b>PSO 8</b> | Be acquainted with the contemporary issues, latest trends in technological development and thereby innovate new ideas and solutions to existing problems. |
| <b>PSO 9</b> | Communicate in both oral and written forms, demonstrating the practice of professional ethics and the concerns for social welfare.                        |

**COURSE DESCRIPTION**

This course introduces the Basic understanding on object oriented programming concepts.

**COURSE OBJECTIVES**

To acquire programming skills in core Python and to develop database applications in Python.

**UNITS****UNIT I: CORE PYTHON****(14Hrs)**

Introduction - Python Basics: Comments - Statements and syntax - variable Assignment - Identifiers - **Python objects:** Built-in-types - Internal types - Standard Type operators - Standard type Built-in-functions. **Numbers :** Introduction to Numbers - Integers - Floating point numbers - Complex numbers - Operators - Built-in and factory functions - Conditionals and Loops -**Sequences : Strings, Lists and Tuples(Self study)**

**UNIT II: FUNCTIONS AND FUNCTIONAL PROGRAMMING****(14Hrs)**

Mapping and set types.- Introduction - Calling functions - Creating functions - passing functions - Formal arguments - Variable - Length Arguments - Functional Programming - Variable Scope – Recursion

**UNIT III: MODULES AND OBJECT ORIENTED (14Hrs)**

**Modules:** Modules and Files – namespaces - Importing Modules - Features - Built-in functions. **Object Oriented Programming:** Introduction - Object Oriented Programming – Encapsulation Inheritance – Polymorphism - **Errors and Exceptions:** Introduction – Exceptions in Python.

**UNIT IV: GUI PROGRAMMING (14Hrs)**

Introduction – **Using Widgets:** Core widgets- Generic widget properties – Labels – Buttons – Radio Buttons – Check Buttons – Text – Entry – List Boxes – Menus – Frame – Scroll Bars – Scale

**UNIT V: DATABASE PROGRAMMING (14Hrs)**

Connecting to a database using MongoDB - Creating Tables - INSERT-UPDATE - DELETE - **READ operations (Self Study)**

**UNIT –VI DYNAMISM (Evaluation Pattern-CIA only) ( 5 Hrs)**

Current trends in implementation of Python Programming in Machine Learning Techniques.

**Recommended Text:**

**COURSE CONTENTS & LECTURE SCHEDULE:**

| Module No.  | Topic  | No. of Lectures | Teaching Pedagogy | Teaching Aids    |
|---|--|-----------------|-------------------|------------------|
| <b>UNIT -1 CORE PYTHON</b>                          |  |                 |                   |                  |
| 1.1   | Introduction - Python Basics:<br>Comments - Statements and syntax - variable Assignment - Identifiers                                | 5               | Chalk & Talk      | Black Board      |
| 1.2   | Built-in-types - Internal types - Standard Type operators - Standard type<br>Built-in-functions                                      | 6               | Chalk & Talk      | LCD              |
| 1.3   | Introduction to Numbers - Integers - Floating point numbers - Complex numbers  | 3               | Discussion        | Google Classroom |
| 1.4   | Operators - Built-in and factory functions -<br>Conditionals and Loops<br><b>-Sequences : Strings, Lists and Tuples (Self study)</b> | 3               | Chalk & Talk      | LCD              |
| <b>UNIT -2 FUNCTIONS AND FUNCTIONAL PROGRAMMING</b> |  |                 |                   |                  |

| <b>Module No.</b>                          | <b>Topic</b>  | <b>No. of Lectures</b> | <b>Teaching Pedagogy</b> | <b>Teaching Aids</b> |
|--|---|------------------------|--------------------------|----------------------|
| 2.1  | Mapping and set types.-<br>Introduction - Calling functions   | 6                      | Lecture                  | Green Board          |
| 2.2  | Functional Programming -<br>Variable Scope – Recursion  | 5                      | Chalk &Talk              | Green Board          |
| 2.3  | Functional Programming -<br>Variable Scope – Recursion  | 3                      | Discussion               | Google Classroom     |
| <b>UNIT -3 MODULES AND OBJECT ORIENTED</b> |   |                        |                          |                      |
| 3.1  | <b>Modules:</b> Modules and Files – namespaces -  | 4                      | Chalk & Talk             | Black Board          |
| 3.2  | Importing Modules - Features - Built-in functions.  | 5                      | Chalk & Talk             | LCD                  |
| 3.3  | <b>Object Oriented Programming:</b> Introduction - Object Oriented Programming – Encapsulation Inheritance – Polymorphism - | 3                      | Chalk & Talk             | Black Board          |
| 3.4  | <b>Errors and Exceptions:</b> Introduction – Exceptions in Python   | 3                      | Lecture                  | Green Board          |
| <b>UNIT -4 GUI PROGRAMMING</b>             |   |                        |                          |                      |
| 4.1  | Introduction – <b>Using Widgets:</b> Core widgets- Generic widget properties  | 3                      | Chalk & Talk             | Black Board          |
| 4.2  | Labels – Buttons – Radio Buttons – Check Buttons – Text   | 6                      | Lecture                  | Green Board          |

## CBCS Curriculum for M. Sc Information Technology

| Module No.                          | Topic  | No. of Lectures | Teaching Pedagogy | Teaching Aids     |
|-------------------------------------|--|-----------------|-------------------|-------------------|
| 4.3                                 | Entry – List Boxes – Menus – Frame – Scroll Bars – Scale                               | 3               | Chalk & Talk      | LCD               |
| <b>UNIT -5 DATABASE PROGRAMMING</b> |  |                 |                   |                   |
| 5.1                                 | Connecting to a database using MongoDB -   | 6               | Chalk & Talk      | Black Board       |
| 5.2                                 | Creating Tables - INSERT-UPDATE - DELETE - <b>READ operations (Self Study)</b>         | 4               | Discussion        | Google Classroom  |
| <b>UNIT -6 DYNAMISM</b>             |  |                 |                   |                   |
| 6.1                                 | Current trends in implementation of Python Programming in Machine Learning Techniques. | 5               | Assignments       | Google class room |

**COURSE OUTCOMES**

On the successful completion of the course, students will be able to:

| <b>SNO.</b> | <b>COURSE OUTCOMES</b>  |
|-------------|---|
| <b>CO 1</b> | Explain the basic concepts in python language.  |
| <b>CO 2</b> | Apply the various data types and identify the usage of control statements, loops, functions and modules in python for processing the data |
| <b>CO 3</b> | Analyze and solve problems using basic constructs and techniques of python.   |
| <b>CO 4</b> | Assess the approaches used in the development of interactive application.   |
| <b>CO 5</b> | To build real time programs using python  |

**Mapping of COs with PSOs**

| <b>CO/PSO</b>                                     | <b>PSO1</b> | <b>PSO2</b> | <b>PSO3</b> | <b>PSO4</b> | <b>PSO5</b> | <b>PSO6</b> |
|---|-------------|-------------|-------------|-------------|-------------|-------------|
| <b>CLO1</b>                                       | <b>3</b>    | <b>3</b>    | <b>3</b>    | <b>3</b>    | <b>2</b>    | <b>2</b>    |

**COURSE DESCRIPTION**

This course introduces the Basic implementation python programming concepts.

**COURSE OBJECTIVES**

This course gives practical experience in Python basics, Object Oriented programming like Classes, Inheritance, and Polymorphism, GUI Applications and Database connection.

**UNITS - List of Programs**

1. Python Basic programs
2. Control Structures
3. Lists
4. Functions and Recursions
5. Modules
6. String Processing
7. Dictionaries and Sets
8. Classes and Objects
9. Polymorphism

10. Inheritance

11. GUI Application

12. Working with Database

***\*The best out of two will be taken into account***

### COURSE OUTCOMES

On the successful completion of the course, students will be able to:

| S.NO.       | COURSE OUTCOMES   |
|-------------|---|
| <b>CO 1</b> | Understand the significance of control statements, loops and functions in creating simple programs. |
| <b>CO 2</b> | Apply the core data structures available in python to store, process and sort the data              |
| <b>CO 3</b> | Analyze the real time problem using suitable python concepts  |
| <b>CO 4</b> | Assess the complex problems using appropriate concepts in python                                    |
| <b>CO 5</b> | Develop the real time applications using python programming language.                               |

### Mapping of COs with PSOs

| CO/PSO  | PSO1 | PSO2 | PSO3 | PSO4 | PSO5 | PSO6 |

**COURSE DESCRIPTION**

This course introduces the Basic understanding of HTML & CSS concepts along with Word Press.

**COURSE OBJECTIVES**

The primary course objective of this paper is to learn the fundamentals of basic web concepts, HTML, DHTML, JavaScript and Word Press.

**UNITS****UNIT I: INTRODUCTION****(14Hrs)**

**Introduction to HTML** - Lists - Adding Graphics to HTML Documents - Tables -Linking Documents - Frames- Developing HTML Forms

**UNIT II: DHTML & CSS****(14Hrs)**

**Dynamic HTML** - Cascading Style Sheets - Use of SPAN Tag - External Style Sheets -Use of DIV Tag - Developing Websites

**UNIT III: JAVASCRIPT****(14Hrs)**

**Introduction to JavaScript** - JavaScript in Web Pages - Advantages - Writing JavaScript into HTML - Basic Programming Techniques - Operators and Expressions- JavaScript Programming Construct: Conditional Checking,

Controlled Loops, Functions: Built-in Functions, User-Defined Functions -  
Placing Text in a Browser - Dialog Boxes.

#### **UNIT IV: DOCUMENT OBJECT MODEL (14Hrs)**

**JavaScript Document Object Model:** Introduction - Understanding Objects  
in HTML - Handling Events using JavaScript. Forms used by a Website:  
Form Object - Built-in Objects

#### **UNIT V: WORD PRESS (14Hrs)**

**Word Press:** Installation - Stetting and administration- Word press: Theming  
basics - Our First Word Press Website - Theme Foundation - Menu and  
navigation - Home page - Dynamic Sidebars and Widgets - Page - archive  
Page results - Testing and Launching

#### **UNIT –VI DYNAMISM (Evaluation Pattern-CIA only) ( 5 Hrs)**

Creating Website and Blogs.

## COURSE OUTCOMES

On the successful completion of the course, students will be able to:

| NO.         | COURSE OUTCOMES   |
|-------------|---|
| <b>CO 1</b> | Identify the tools which will be suitable for the requirement of the webpage.             |
| <b>CO 2</b> | Implement Javascript and Style Sheet effectively in the Web Pages                         |
| <b>CO 3</b> | Analyze the different tools and built-in functions available to be applied in the webpage |
| <b>CO 4</b> | Rate the design and effectiveness of the Web Pages created.                               |
| <b>CO 5</b> | Design and publish a website using Wordpress  |

**COURSE DESCRIPTION**

This course introduces Basic understanding of programming and foundational concepts in data structures.

**COURSE OBJECTIVES**

To become familiar with the various data structures and their applications and to increase the understanding of basic concepts of the design and use of algorithms.

**UNITS****UNIT I: INTRODUCTION AND OVERVIEW (14Hrs)**

Definitions – Concept of Data Structures – Overview of Data Structures – Implementation of Data Structures – Arrays: Definition – One Dimensional Array – Multidimensional Arrays: Two Dimensional Array – Sparse Matrices – Three dimensional and n-dimensional Arrays – Stacks : Introduction – Definition – Representation of Stack – Operations on Stack – Applications of Stacks: Evaluation of Arithmetic Expressions – **Implementation of Recursion - Tower of Hanoi Problem (Self study)**

**UNIT II: QUEUES & LINKED LIST (14Hrs)**

Introduction – Definition – Representation of Queues – **Various Queue Structures** : Circular Queue – Deque – Priority Queue – **Applications of Queues** : Simulation – CPU Scheduling in a Multiprogramming Environment – Round Robin Algorithm – **Linked Lists**: Single Linked List – Circular

Linked List – Double Linked List – Circular Double Linked List –

**Applications of Linked List:** Polynomial Representation

### **UNIT III: TREES (14Hrs)**

Trees: Basic Terminologies – Representation of Binary Tree: Linear Representation – Linked Representation – Operations: Traversals – Types of Binary Trees: Expression Tree – Binary Search Tree – Splay tree.

### **UNIT IV: SORTING & SEARCHING (14Hrs)**

**Sorting:** Bubble Sort, Insertion Sort, Selection Sort, Shell Sort – Quick Sort - Merge Sort - Radix Sort - Heap Sort – **Searching:** Linear Search - Binary Search

### **UNIT V: GRAPHS (14Hrs)**

**Graphs:** Introduction – Graph representation and its operations – Path Matrix – Graph Traversal - Application of DFS – Shortest Path Algorithm - **Minimum Spanning Tree** : Prim's Algorithm – Kruskal's Algorithm - Greedy – Knapsack – Back Tracking – 8 Queens **(Self Study)**

### **UNIT –VI DYNAMISM (Evaluation Pattern-CIA only) ( 5 Hrs)**

Real Time Applications using Data Structures

## COURSE OUTCOMES

On the successful completion of the course, students will be able to:

| NO.         | COURSE OUTCOMES  |
|-------------|--|
| <b>CO 1</b> | Outline the basic data structures                            |
| <b>CO 2</b> | Identify the different operations and memory representations |
| <b>CO 3</b> | Interpret different techniques with their complexities       |

| NO.         | COURSE OUTCOMES  |
|-------------|--|
| <b>CO 4</b> | Compare the applications of various data structures                            |
| <b>CO 5</b> | Choose an algorithm to solve simple problems suited for appropriate situations |

**Mapping of COs with PSOs**

| CO/PSO  | PSO1 | PSO2 | PSO3 | PSO4 | PSO5 | PSO6 |
|---|------|------|------|------|------|------|
| <b>CLO1</b>                                       | 3    | 1    | 2    | 2    | 1    | 2    |

This course introduces the basic understanding of of natural language and linguistics

**COURSE OBJECTIVES**

To learn the fundamentals of natural language processing and to understand the role of CFG, semantics of sentences and pragmatics.

**UNITS****UNIT I: INTRODUCTION****(14Hrs)**

Origins and challenges of NLP – Language Modeling: Grammar-based LM, Statistical LM - Regular Expressions, Finite-State Automata – English Morphology, Transducers for lexicon and rules, Tokenization, Detecting and Correcting Spelling Errors, **Minimum Edit Distance (Self study)**

**UNIT II: WORD LEVEL ANALYSIS****(14Hrs)**

Unsmoothed N-grams, Evaluating N-grams, Smoothing, Interpolation and Backoff – Word Classes, Part-of-Speech Tagging, Rulebased, Stochastic and Transformation-based tagging, Issues in PoS tagging – Hidden Markov and Maximum Entropy models

**UNIT III: SYNTACTIC ANALYSIS****(14Hrs)**

Context-Free Grammars, Grammar rules for English, Treebanks, Normal Forms for grammar – Dependency Grammar – Syntactic Parsing, Ambiguity, Dynamic Programming parsing – Shallow parsing – Probabilistic CFG, Probabilistic CYK, Probabilistic Lexicalized CFGs - Feature structures, Unification of feature structures.

**UNIT IV: SEMANTICS AND PRAGMATICS (14Hrs)**

Requirements for representation, FirstOrder Logic, Description Logics – Syntax-Driven Semantic analysis, Semantic attachments – Word Senses, Relations between Senses, Thematic Roles, selection restrictions – Word Sense Disambiguation, WSD using Supervised, Dictionary & Thesaurus, Bootstrapping methods – Word Similarity using Thesaurus and Distributional methods

**UNIT V: DISCOURSE ANALYSIS AND LEXICAL RESOURCES (14Hrs)**

Discourse segmentation, Coherence – Reference Phenomena, Anaphora Resolution using Hobbs and Centering Algorithm – Coreference Resolution – Resources: Porter Stemmer, Lemmatizer, Penn Treebank, Brill's Tagger, WordNet, PropBank, FrameNet, Brown Corpus, British National Corpus (BNC) **(Self Study)**

**UNIT –VI DYNAMISM (Evaluation Pattern-CIA only) ( 5 Hrs)**

To perform the large scale analysis and Stream line process

### COURSE CONTENTS & LECTURE SCHEDULE:

| Module No.                  | Topic   | No. of Lectures | Teaching Pedagogy | Teaching Aids    |
|-----------------------------|---|-----------------|-------------------|------------------|
| <b>UNIT -1 INTRODUCTION</b> |   |                 |                   |                  |
| 1.1                         | Origins and challenges of NLP – Language Modeling: Grammar-based LM | 5               | Chalk & Talk      | Black Board      |
| 1.2                         | Statistical LM - Regular Expressions, Finite-State Automata         | 6               | Chalk & Talk      | LCD              |
| 1.3                         | English Morphology, Transducers for lexicon and rules, Tokenization | 3               | Discussion        | Google Classroom |

| <b>Module No.</b>                  | <b>Topic</b>  | <b>No. of Lectures</b> | <b>Teaching Pedagogy</b> | <b>Teaching Aids</b> |
|------------------------------------|---|------------------------|--------------------------|----------------------|
| 1.4                                | Detecting and Correcting Spelling Errors, <b>Minimum Edit Distance</b>                                | 3                      | Chalk & Talk             | LCD                  |
| <b>UNIT -2 WORD LEVEL ANALYSIS</b> |   |                        |                          |                      |
| 2.1                                | Unsmoothed N-grams, Evaluating N-grams, Smoothing, Interpolation and Backoff – Word Classes,          | 6                      | Lecture                  | Green Board          |
| 2.2                                | Part-of-Speech Tagging, Rulebased, Stochastic and Transformation-based tagging, Issues in PoS tagging | 5                      | Chalk &Talk              | Green Board          |
| 2.3                                | Hidden Markov and Maximum Entropy models  | 3                      | Discussion               | Google Classroom     |
| <b>UNIT -3 SYNTACTIC ANALYSIS</b>  |   |                        |                          |                      |
| 3.1                                | Context-Free Grammars, Grammar rules for English, Treebanks, Normal Forms for grammar                 | 4                      | Chalk & Talk             | Black Board          |
| 3.2                                | Dependency Grammar Syntactic Parsing, Ambiguity, Dynamic Programming parsing – Shallow parsing –      | 5                      | Chalk & Talk             | LCD                  |
| 3.3                                | Probabilistic CFG, Probabilistic CYK, Probabilistic Lexicalized CFGs                                  | 3                      | Chalk & Talk             | Black Board          |
| 3.4                                | Feature structures, Unification of feature structures.  | 3                      | Lecture                  | Green Board          |

| Module No.  | Topic  | No. of Lectures | Teaching Pedagogy | Teaching Aids    |
|---|--|-----------------|-------------------|------------------|
|   |  |                 |                   |                  |
| <b>UNIT -4 SEMANTICS AND PRAGMATICS</b>                 |  |                 |                   |                  |
| 4.1   | Requirements for representation, FirstOrder Logic, Description Logics – Syntax-Driven Semantic analysis, Semantic attachments.                           | 3               | Chalk & Talk      | Black Board      |
| 4.2   | Word Senses, Relations between Senses, Thematic Roles, selection restrictions – Word Sense Disambiguation, WSD using Supervised, Dictionary & Thesaurus. | 6               | Lecture           | Green Board      |
| 4.3   | Bootstrapping methods – Word Similarity using Thesaurus and Distributional methods.  | 3               | Chalk & Talk      | LCD              |
| <b>UNIT -5 DISCOURSE ANALYSIS AND LEXICAL RESOURCES</b> |  |                 |                   |                  |
| 5.1   | Discourse segmentation, Coherence – Reference Phenomena  | 5               | Chalk & Talk      | Black Board      |
| 5.2   | Anaphora Resolution using Hobbs and Centering Algorithm – Coreference  | 5               | Discussion        | Google Classroom |
| 5.3   | Resolution – Resources: Porter Stemmer, Lemmatizer, Penn Treebank, Brill's Tagger, WordNet, PropBank, FrameNet,  | 4               | Discussion        | Google Classroom |

| Module No.              | Topic  | No. of Lectures | Teaching Pedagogy | Teaching Aids     |
|-------------------------|--|-----------------|-------------------|-------------------|
|                         | Brown Corpus, British National Corpus (BNC)                  |                 |                   |                   |
| <b>UNIT -6 DYNAMISM</b> |  |                 |                   |                   |
| 6.1                     | To perform the large scale analysis and Stream line process. | 5               | Assignments       | Google class room |

● **PG CIA Components**

|           |                      | Nos |   |        |
|-----------|----------------------|-----|---|--------|
| <b>C1</b> | - Test (CIA 1)       | 1   | - | 10 Mks |
| <b>C2</b> | - Test (CIA 2)       | 1   | - | 10 Mks |
| <b>C3</b> | - Assignment         | 2 * | - | 5 Mks  |
| <b>C4</b> | - Open Book Test/PPT | 2 * | - | 5 Mks  |
| <b>C5</b> | - Seminar            | 1   | - | 5 Mks  |
| <b>C6</b> | - Attendance         |     | - | 5 Mks  |

***\*The best out of two will be taken into account***

**COURSE OUTCOMES**

On the successful completion of the course, students will be able to:

| S.NO.       | COURSE OUTCOMES   |
|-------------|---|
| <b>CO 1</b> | Describe the concepts of morphology, syntax, semantics, discourse & pragmatics of natural language    |
| <b>CO 2</b> | Identify various linguistic and statistical features relevant to the basic NLP task, namely, spelling |

## CBCS Curriculum for M. Sc Information Technology

| S.NO.       | COURSE OUTCOMES   |
|-------------|---|
|             | correction, morphological analysis, parsing and semantic analysis   |
| <b>CO 3</b> | Classify the text into an organized group using a set of handcraft linguistic rules with appropriate NLP processes and algorithms |
| <b>CO 4</b> | Analyze the system with various language analysis methods and interpret the results   |
| <b>CO 5</b> | Assess NLP systems, identify and suggest solutions for the shortcomings   |

## Mapping of COs with PSOs

| CO/PSO  | PSO1      | PSO2      | PSO3      | PSO4      | PSO5      | PSO6      |
|---|-----------|-----------|-----------|-----------|-----------|-----------|
| <b>CLO1</b>                                       | <b>3</b>  | <b>2</b>  | <b>2</b>  | <b>2</b>  | <b>2</b>  | <b>2</b>  |
| <b>CLO2</b>                                       | <b>3</b>  | <b>2</b>  | <b>2</b>  | <b>2</b>  | <b>2</b>  | <b>2</b>  |
| <b>CLO3</b>                                       | <b>3</b>  | <b>2</b>  | <b>2</b>  | <b>3</b>  | <b>2</b>  | <b>3</b>  |
| <b>CLO4</b>                                       | <b>3</b>  | <b>2</b>  | <b>2</b>  | <b>3</b>  | <b>2</b>  | <b>3</b>  |
| <b>CLO5</b>                                       | <b>3</b>  | <b>2</b>  | <b>2</b>  | <b>3</b>  | <b>3</b>  | <b>3</b>  |

**COURSE DESCRIPTION**

This course introduces the Basic understanding of working principles of computer and about hardware and software components.

**COURSE OBJECTIVES**

To develop fundamental knowledge of Operating systems, to become familiar with CPU Scheduling, memory and file management concepts, to learn concepts and programming techniques of Linux.

**UNITS****UNIT I: INTRODUCTION****(14Hrs)**

Evolution of Operating System - Structure - Processes - The Process Concepts - Inter Process Communication - IPC Problems - Scheduling Levels - Preemptive Vs Non- Preemptive Scheduling - **Scheduling Algorithms:** First Come First Served - Shortest Job First - Shortest Remaining Time Next - Three Level Scheduling - Round Robin Scheduling - Priority Scheduling - Multiple Queues - Shortest Process Next - Guaranteed Scheduling - Lottery Scheduling - Fair-Share Scheduling - **Thread Scheduling (Self study)**

**UNIT II: MEMORY MANAGEMENT****(14Hrs)**

Swapping - Virtual Memory - Page Replacement Algorithm - Segmentation

**UNIT III: DEADLOCK****(14Hrs)**

**Deadlock** - Examples of Deadlock - Detection - Recovery - Avoidance - Prevention – Semaphore -Shared Memory.

**UNIT IV: FILE SYSTEM (14Hrs)**

**File System** - Files - Directories - I/O Management - Disks - Disk Arm Scheduling Algorithm.

**UNIT V: LINUX (14Hrs)**

**Introduction to Linux:** Introducing Shell Programming - Linux File Systems - Linux File system calls - Implementation of Linux File systems - Linux Commands - Directory Oriented Commands - File Oriented Commands - Communication Oriented Commands- General Purpose Commands **(Self Study)**

**UNIT –VI DYNAMISM (Evaluation Pattern-CIA only) ( 5 Hrs)**

Processing the operating systems with some real time applications

### **COURSE OUTCOMES**

On the successful completion of the course, students will be able to:

| <b>NO.</b>  | <b>COURSE OUTCOMES</b>  |
|-------------|---|
| <b>CO 1</b> | Outline the fundamental concepts of an OS and their respective functionality            |
| <b>CO 2</b> | Demonstrate the importance of open-source operating system commands                     |
| <b>CO 3</b> | Identify and stimulate management activities of operating system                        |
| <b>CO 4</b> | Analyze the various services provided by the operating system                           |
| <b>CO 5</b> | Interpret different problems related to process, scheduling, deadlock, memory and files |

### **Mapping of COs with PSOs**

## CBCS Curriculum for M. Sc Information Technology

| CO/PSO  | PSO1      | PSO2      | PSO3      | PSO4      | PSO5      | PSO6      |

**COURSE DESCRIPTION**

This course introduces the basic understanding of the impact of human factors and Computer Science fundamentals.

**COURSE OBJECTIVES**

To think constructively and analytically in designing and evaluating interactive technologies.

**UNITS****UNIT I: INTRODUCTION****(14Hrs)**

Foundations: The Human: Introduction-Input-Output Channels- Memory.  
 The Computer: Introduction- Text Entry Devices- Display Devices- Memory.  
 The Interaction: Introduction – Models of Interaction-Frameworks and HCI  
 Ergonomics-Interaction Styles-Elements of the WIMP Interface-Interactivity -  
**The Context of the Interactions (Self study)**

**UNIT II: DESIGN PROCESS****(14Hrs)**

Design Basics- Introduction - Process- User Focus-Scenarios- Navigation  
 Design- Screen Design and Layout-Interaction and Prototyping. Design  
 Rules-Introduction- Principles to Support Usability-Guidelines-Golden Rules  
 and Heuristics-HCI Patterns

**UNIT III: IMPLEMENTATION SUPPORT****(14Hrs)**

Introduction - Elements of Windowing Systems - Programming the Application- Using Toolkits-User Interface Management Systems. Evaluation Techniques: What is an Evaluation- Goal of Evaluation-Evaluation Through Expert Analysis-Choosing an Evaluation Method.

**UNIT IV: UNIVERSAL DESIGN (14Hrs)**

Introduction - Universal Design Principles-Designing for Diversity. User Support: Introduction-Requirements of User Support-Approaches to User Support-Adaptive Help Systems-Designing User Support Systems.

**UNIT V: MODELS (14Hrs)**

Cognitive Models: Introduction-Goals and Task-Linguistic Models- Challenge of Display Based System-Physical and Device Models - Cognitive Architectures(**Self Study**)

**UNIT –VI DYNAMISM (Evaluation Pattern-CIA only) ( 5 Hrs)**

Identification of interaction tasks between Human and Computer System

**Recommended Text:**

### COURSE OUTCOMES

On the successful completion of the course, students will be able to:

| NO.         | COURSE OUTCOMES  |
|-------------|--|
| <b>CO 1</b> | Describe typical human-computer interaction (HCI) models, styles, and various historic HCI paradigms |
| <b>CO 2</b> | Identify the usability and the beneficiary factors of User support systems                           |
| <b>CO 3</b> | Analyze the core theories, models and methodologies in the field of HCI                              |
| <b>CO 4</b> | Evaluate interactive systems based on the human factor theories                                      |
| <b>CO 5</b> | Elaborate an interactive system based on the design principles, standards and guidelines             |

### Mapping of COs with PSOs

**COURSE DESCRIPTION**

This course content is enables other disciplined students to strengthen and increase the understanding of basis Image editing and Animation software like Photoshop and Alice3.

**COURSE OBJECTIVES**

The objective of this course is to provide the necessary knowledge and to impart, practical knowledge on various editing techniques in Photoshop and animation techniques in Alice3

**UNITS****UNIT 1: PHOTOSHOP TOOLS****(6 HRS.)**

Marquee Tool-Crop Tool-Lasso Tool-Move Tool, Rubber/clone Stamp tool-Eraser Tool-Paint Brush Tool-Art History/History Brush Tool-Text Tool.

**UNIT II: TRANSFORMATION AND FILTERS****(6 HRS)**

Resizing: Resizing an image- Resizing a canvas- Resizing a selection  
 Rotating: Rotate 180 degrees and 90 degrees clockwise or counter clockwise-  
 Rotate by degrees- Rotate a selection Sharpen Filters: Sharpen, Sharpen  
 more, Blur Filters: Blur, Blur-more, Distort Filters: Pinch(Squeezing,

bulging), Pixellate Filters: crystallize, Extracting an part of image from background image.

### **UNIT III: EXPLORING THE INTERFACE (6 HRS)**

Introduction to Alice - download and install Alice 3.1-A brief tour of the Alice 3 IDE -A brief tour of the Menu Bar- Set Preferences -Touring the Gallery- Adding an object to a scene- set object properties in the Scene editor- set special effects in a scene-Marking - position and resize an object in the Scene editor.

### **Unit IV: LEARNING TO PROGRAM THROUGH ALICE (6 HRS)**

Sequential & Parallel Execution - Do in order - Do together- Further nesting- Branching & Looping-Conditional execution-Relational Operators-Randomness-Repetition-While loops- Lists

### **Unit V: EVENT HANDLING & 3D ANIMATION (6 HRS)**

Interactive programming & event handling - Control of flow- Events- Event handing method - Create 3D Text- Billboards- Creating a Sound- Adding a Sound - Posting on YouTube.

### **PROGRAM LIST**

1. Program for Creation of Image Web gallery
2. Program for Creation of Brochure
3. Program for Visiting card creation
4. Program for how to remove redeye & hotspot in the image
5. Program for Catalogue creation.
6. Alice Interface
7. Alice Objects
8. Alice Scene
9. Sequential and Parallel Execution
10. Branching and Looping
11. Event Handling

12. Methods

13. 3D text

**COURSE DESCRIPTION**

Fundamental computer knowledge that includes the hardware and memory storage.

**COURSE OBJECTIVES**

To understand the basic DBMS models, architecture, query and to normalize the database. To Learn Transaction Processing, Recovery and Distributed Database.

**UNITS****UNIT I:****(14Hrs)**

**Introduction:** Database System Applications-Purpose of Database Systems-View of Data-Database Users and Administrators. **Relational Database:** Structure of Relational Databases-Databases Schema-Keys-Schema Diagrams-**Formal Relational Query Languages:** Relational Algebra-Tuple Relational Calculus

**UNIT-II : Database Design :****(14Hrs)**

Overview of Design Process-The Entity Relationship Model-Constraints-Removing Redundant Attributes in Entity Sets-Entity-Relationship Diagrams-Reduction to Relational Schemas-Extended E-R features-Alternative Notations for Modeling Data. **Relational Database Design:** Features of Good Relational Design-Functional Dependency-**Normalization:** 1NF, 2NF, 3NF, BCNF, 4NF, 5NF- Functional Dependency Theory

**UNIT II: FUNCTIONS AND FUNCTIONAL PROGRAMMING (14Hrs)**

Mapping and set types.- Introduction - Calling functions - Creating functions - passing functions - Formal arguments - Variable - Length Arguments - Functional Programming - Variable Scope – Recursion

**UNIT-III : (14Hrs)**

**Transaction Management:** Transaction Concept-Simple Transaction Model-Storage

Structure-Transaction Atomicity and Durability-Transaction Isolation-Serializability.

**Concurrency Control:** Lock Based Protocols-Locks-Granting of Locks-Two Phase Locking Protocol-Time Stamp Based Protocol -

**Recovery System:** Failure Classification-**Recovery and Atomicity:** Log Records-Database Modification-Concurrency Control and Recovery-Recovery Algorithm

**UNIT-IV : Distributed Database: (14Hrs)**

Homogeneous and Heterogeneous Databases-Distributed Data storage-Distributed Transactions-Commit Protocols-Concurrency Control in Distributed Databases-Distributed Query Processing.Casestudy: Mongo DB

**UNIT-V: SQL (14Hrs)**

Table Fundamentals - Viewing Data - Inserting - Deleting - Updating - Modifying -Constraints-Functions

-Grouping-Subqueries-Joins-Views.**PL/SQL:** Introduction-PL/SQL Block-Data Types And Variables-Control Structure-Cursors - PL/SQL Security - Locks.

PL/SQL Database Objects: Exception Handling- Packages -Procedures and Functions-Database Triggers

**COURSE DESCRIPTION**

Basic understanding of SQL queries

**COURSE OBJECTIVES**

The primary Course Objective of this paper is to learn and implement SQL & PL/SQL.

**UNITS - List of Programs**

1. DDLCommands
2. DMLCommands
3. DCLCommands
4. UsageofSub QueriesinDMLand Create-SQL
5. Solvingqueries usingbuilt-in functions
6. Simpleprograms inPL/SQLblock
7. ExceptionHandlinginPL/SQL
8. ProgramsusingImplicitCursors
9. ProgramsusingExplicitCursors
10. Procedures &User-definedfunctions
11. CreationofTriggers

**Recommended Text:**

## **COURSE OUTCOMES**

On the successful completion of the course, students will be able to:

| NO.  | COURSE OUTCOMES   |
|------|---|
| CO 1 | Understand the significance of control statements, loops and functions in creating simple programs. |
| CO 2 | Apply the core data structures available in SQL to store, process and sort the data                 |
| CO 3 | Analyze the real time problem using suitable SQL concepts   |
| CO 4 | Assess the complex problems using appropriate concepts in SQL                                       |
| CO 5 | Develop the real time applications using programming language.                                      |

**Mapping of COs with PSOs**

| CO/PSO                                     | PSO1 | PSO2 | PSO3 | PSO4 | PSO5 | PSO6 |
|--|------|------|------|------|------|------|

**COURSE DESCRIPTION**

Basic understanding of computer programming, Internet and HTML/XHTML

**COURSE OBJECTIVES**

To learn the efficiency of Open Source Technology and to train to have a good practical knowledge of how to write successful PHP and Ruby code and utilizing a database using PHP.

**UNIT I: PHP****(14Hrs)**

**PHP:** Introduction – Creating a PHP page– Running PHP page –HTML and PHP – Printing Text – Comment Statements – Working with variables – Storing data in variables – Interpolating strings – Constants – Understanding Internal Data types – Operators – Flow Control – Strings: String Functions - Converting to and from strings -Formatting text strings - Working with numbers.

**UNIT II: Date and Time****(14Hrs)**

Date and Time-Create an Array-Use an Associative Array-Functions to Work with Arrays-Work with Arrays of Arrays-Create and Use Functions

**UNIT III: Reading Data in web pages****(14Hrs)**

Reading Data in web pages: Handling various controls - PHP Browser-Handling power: Data Validation - File Handling : Opening a file – Reading Text from a file – Closing a file- Working with Databases: Creating ,

Inserting , Accessing , Updating , Deleting and Sorting Database - Work with Cookies and Sessions

**UNIT IV: Ruby (14Hrs)**

Ruby: Getting Started with Ruby – Working with Numbers and Strings – Variables – Constants– Operators – Conditionals and Loops

**UNIT V: Classes and Objects (14Hrs)**

Arrays - Hashes - Methods - Blocks : Classes and Objects : Creating a Class and an Object- Exception Handling – File Handling

**UNIT –VI DYNAMISM (Evaluation Pattern-CIA only) ( 5 Hrs)**

Current trends in implementation of OPEN SOURCE tools

|------------------------------------|---|-----------------|-------------------|-------------------|
| 4.3                                | Constants– Operators – Conditionals and Loops         | 3               | Chalk & Talk      | LCD               |
| <b>UNIT -5 Classes and Objects</b> |   |                 |                   |                   |
| 5.1                                | Classes and Objects : Creating a Class and an Object  | 6               | Chalk & Talk      | Black Board       |
| 5.2                                | Exception Handling – File Handling                    | 4               | Discussion        | Google Classroom  |
| <b>UNIT -6 DYNAMISM</b>            |   |                 |                   |                   |
| 6.1                                | Current trends in implementation of open source tools | 5               | Assignments       | Google class room |

## EVALUATION PATTERN

### ● PG CIA Components

|           |                      | Nos |          |
|-----------|----------------------|-----|----------|
| <b>C1</b> | - Test (CIA 1)       | 1   | - 10 Mks |
| <b>C2</b> | - Test (CIA 2)       | 1   | - 10 Mks |
| <b>C3</b> | - Assignment         | 2 * | - 5 Mks  |
| <b>C4</b> | - Open Book Test/PPT | 2 * | - 5 Mks  |
| <b>C5</b> | - Seminar            | 1   | - 5 Mks  |
| <b>C6</b> | - Attendance         |     | - 5 Mks  |

***\*The best out of two will be taken into account***

**COURSE OUTCOMES**

On the successful completion of the course, students will be able to:

| NO.         | COURSE OUTCOMES  |
|-------------|--|
| <b>CO 1</b> | Demonstrate the setup and configuration of development environment to write PHP and Ruby Scripts   |
| <b>CO 2</b> | Select the appropriate language fundamentals and techniques to write and compile PHP and Ruby programs                                     |
| <b>CO 3</b> | Examine the bugs and analyze how to prevent and remove the bugs  |
| <b>CO 4</b> | Test and debug the application with sample inputs to check the correctness and consistency of the scripts                                  |
| <b>CO 5</b> | Create simple programs that make use of various PHP and Ruby features and functions and solve web application and database tasks using PHP |

**Mapping of COs with PSOs**

| CO/PSO  | PSO1 | PSO2 | PSO3 | PSO4 | PSO5 | PSO6 |
|---|------|------|------|------|------|------|
| <b>CLO1</b>                                       | 3    | 3    | 3    | 3    | 2    | 2    |
| <b>CLO2</b>                                       | 3    | 3    | 3    | 3    | 3    | 2    |
| <b>CLO3</b>                                       | 3    | 2    | 3    | 3    | 3    | 3    |
| <b>CLO4</b>                                       | 3    | 3    | 3    | 3    | 3    | 3    |
| <b>CLO5</b>                                       | 3    | 3    | 3    | 3    | 3    | 3    |
| <b>Weightage of course contribute to each PSO</b> | 15   | 13   | 15   | 15   | 13   | 15   |

**COURSE DESCRIPTION**

Basic knowledge about computer networks

**COURSE OBJECTIVES**

To understand the importance of networking and the basic model followed in network design and to understand necessary approaches and techniques to build protection mechanisms in order to secure computer networks

**UNITS****UNIT I: Introduction (14Hrs)**

Uses of Computer Networks – Network Hardware – Line Configuration – Topology – Transmission Modes – Reference Models: OSI Reference Model – TCP/IP Reference Model – Physical Layer: Guided Transmission Media – Wireless Transmission – Communication Satellites – Public Switched Telephone Network: Local Loop – Multiplexing – Switching

**UNIT II: Design Issues (14Hrs)**

Data Link Layer: Design Issues - Error Detection and Correction - Network Layer : Design Issues – Routing Algorithms : Shortest Path Routing – Distance Vector Routing – Link State Routing – Broadcast Routing – Multicast Routing – Congestion Control

**UNIT III: Layers (14Hrs)**

Network Layer in the Internet: IP Addresses –Transport Layer: Elements of Transport Protocols: Addressing – Connection Establishment – Connection

Release – Application Layer: Domain Name System – Email: Architecture and Services

**UNIT IV: Network Security: (14Hrs)**

Introduction to Cryptography - Symmetric - Key Cryptography - Asymmetric- key Cryptography – Security Services: Message Confidentiality - Message Integrity - Message Authentication - Digital Signature - Entity Authentication – Security in the Internet: IPSecurity - SSL/TLS: SSL services - SSL Protocols - Firewalls

**UNIT V: Security (14Hrs)**

Security for Wireless Networks: Introduction – Protecting the wireless networks – Physical Security – Authentication and access control- Smartphone Security: Security Threats - Steps to smartphone security -Websites and Web application Security: Definition – Available Technologies - Threats - Strategies.

**UNIT –VI DYNAMISM (Evaluation Pattern-CIA only) ( 5 Hrs)**

To study recent Wi -Fi and Smartphone technologies

**Recommended Text:**

**COURSE DESCRIPTION**

This course introduces the Basic knowledge of computer vision and cyber security concepts

**COURSE OBJECTIVES**

To understand various physiological and behavioural biometrics and its applications.

**UNITS****UNIT I: INTRODUCTION****(14Hrs)**

Introduction: Biometric Fundamentals - Biometrics Vs Traditional Techniques - Benefits of Biometrics in Identification Systems - Key Biometric Terms and Processes: Verification, Identification and Biometric Matching - Accuracy in Biometric Systems: False Match Rate, False Non-Match Rate, Failure to Enroll Rate, **Derived Metrics (Self Study)**

**UNIT II: PHYSIOLOGICAL BIOMETRICS****(14Hrs)**

Finger Scan: Components-How it works-Competing Technologies-Deployments-Strengths and Weaknesses. Facial Scan: Components- How it Works-Competing Technologies-Deployments-Strengths and Weaknesses

**UNIT III: OTHER PHYSIOLOGICAL BIOMETRICS****(14Hrs)**

Iris Scan: Components- How it Works-Competing Technologies-Deployments-Strengths and Weaknesses. Voice Scan: How it Works-Competing Technologies-Deployments-Strengths and Weaknesses. Other Physiological Biometrics: Hand Scan and Retina Scan.

**UNIT IV: BEHAVIOURAL BIOMETRICS (14Hrs)**

Signature Scan and Keystroke Scan: How it Works-Competing Technologies-Deployments-Strengths and Weaknesses. Esoteric Biometrics: Vein Pattern- Facial Thermography-DNA- Sweat Pores- Hand Grip- Finger Nail Bed- Body Odor- Ear-Gait- Skin Luminescence- Brain Wave Pattern- Foot Print and Foot Dynamics

**UNIT V: BIOMETRIC APPLICATIONS (14Hrs)**

Categorizing Biometric Applications - Application Areas: Criminal and Citizen Identification, Surveillance, PC/Network Access, E-Commerce/Telephony and Retail/ATM - Costs to Deploy -Issues in Deployment- Biometric Standards

**UNIT –VI DYNAMISM (Evaluation Pattern-CIA only) ( 5 Hrs)**

Security in identification access control and authentication

**COURSE DESCRIPTION**

This course introduces Basic understanding of one of the object-oriented programs

**COURSE OBJECTIVES**

The primary objective is to understand the principles & requirements and apply the UML (Unified Modeling Language) and tools for OOA and Design

**UNIT I: OBJECT BASICS (14Hrs)**

Object- oriented Philosophy – Object – Object State, Behaviours and Methods. Encapsulation and Information Hiding – Class Hierarchy – Polymorphism, Aggregation, Object Containment, Meta Classes

**UNIT II: OBJECT ORIENTED METHODOLOGIES (14Hrs)**

Object Oriented Methodologies: Rumbaugh Object Model, Booch Methodology- Jacobson Methodology, Patterns, Frameworks and Unified Approach..

**UNIT III: OBJECT ORIENTED ANALYSIS (14Hrs)**

Business Object Analysis– Use Case Driven Approach – Use Case Model. Object Analysis – Noun Phrase Approach – CRC – Identifying Object Relationships and Methods.

**UNIT IV: OBJECT ORIENTED DESIGN (14Hrs)**

The Design Process – Design Axioms – Corollaries – Design Patterns – Designing Classes. Software Quality: Tests- Testing Strategies – Test Cases – Test Plan – Continuous Testing – Mier"s Debugging Principles.

**UNIT V: UML AND PROGRAMMING (14Hrs)**

Introduction – State and Dynamic Models – UML Diagrams – Class Diagrams – Use Case Diagrams- UML Dynamic Modeling

**UNIT –VI DYNAMISM (Evaluation Pattern-CIA only) ( 5 Hrs)**

To study recent tools on analysis and design

**Recommended Text:**

**COURSE CONTENTS & LECTURE SCHEDULE:**

| <b>Module No.</b>                            | <b>Topic</b>   | <b>No. of Lectures</b> | <b>Teaching Pedagogy</b> | <b>Teaching Aids</b> |
|--|--|------------------------|--------------------------|----------------------|
| <b>UNIT -1 OBJECT BASICS</b>                 |  |                        |                          |                      |
| 1.1  | Object- oriented Philosophy – Object – Object State.                           | 5                      | Chalk & Talk             | Black Board          |
| 1.2  | Behaviours and Methods. Encapsulation and Information Hiding – Class Hierarchy | 6                      | Chalk & Talk             | LCD                  |
| 1.3  | Polymorphism, Aggregation, Object Containment, Meta Classes                    | 3                      | Discussion               | Google Classroom     |
| <b>UNIT -2 OBJECT ORIENTED METHODOLOGIES</b> |  |                        |                          |                      |
| 2.1  | Object Oriented Methodologies: Rumbaugh Object Model, Booch Methodology-       | 6                      | Lecture                  | Green Board          |
| 2.2  | Jacobson Methodology, Patterns, Frameworks and Unified Approach..              | 6                      | Chalk &Talk              | Green Board          |
| <b>UNIT -3 OBJECT ORIENTED ANALYSIS</b>      |  |                        |                          |                      |
| 3.1  | Business Object Analysis– Use Case Driven Approach –                           | 4                      | Chalk & Talk             | Black Board          |
| 3.2  | Use Case Model.  | 5                      | Chalk & Talk             | LCD                  |
| 3.3  | Object Analysis – Noun Phrase Approach – CRC                                   | 3                      | Chalk & Talk             | Black Board          |
| 3.4  | Identifying Object Relationships and Methods                                   | 3                      | Lecture                  | Green Board          |

| Module No.                            | Topic   | No. of Lectures | Teaching Pedagogy | Teaching Aids    |
|---------------------------------------|---|-----------------|-------------------|------------------|
| <b>UNIT -4 OBJECT ORIENTED DESIGN</b> |   |                 |                   |                  |
| 4.1                                   | The Design Process – Design Axioms – Corollaries – Design Patterns – Designing Classes. | 3               | Chalk & Talk      | Black Board      |
| 4.2                                   | Software Quality: Tests- Testing Strategies – Test Cases – Test Plan –                  | 6               | Lecture           | Green Board      |
| 4.3                                   | Continuous Testing – Mier"s Debugging Principles  | 3               | Chalk & Talk      | LCD              |
| <b>UNIT -5 UML AND PROGRAMMING</b>    |   |                 |                   |                  |
| 5.1                                   | Introduction – State and Dynamic Models –   | 6               | Chalk & Talk      | Black Board      |
| 5.2                                   | UML Diagrams – Class Diagrams –   | 4               | Discussion        | Google Classroom |
| 5.3                                   | Use Case Diagrams- UML Dynamic Modeling   | 4               | Discussion        | Google Classroom |
| <b>UNIT -6 DYNAMISM</b>               |   |                 |                   |                  |
| 6.1                                   | To study recent tools on analysis and design  | 5               | Assignments       | Google classroom |

### COURSE OUTCOMES

On the successful completion of the course, students will be able to:

| CO's        | Course Outcomes   |
|-------------|---|
| <b>CLO1</b> | Recognize the concepts and principles of object-oriented analysis, design and Testing   |
| <b>CLO2</b> | Demonstrate the importance of system development process using various approaches and choose the relevant technique for a system in each phases of SDLC |
| <b>CLO3</b> | Differentiate various object-oriented analysis, design and testing methods and models.  |
| <b>CLO4</b> | Assess various analysis, design and testing strategies appropriate to build high-performance object-oriented system                                     |
| <b>CLO5</b> | Design Object oriented systems using object modelling techniques and analyze them for correctness and quality   |

### Mapping of COs with PSOs

**COURSE DESCRIPTION**

Basic knowledge about the fundamentals of software project development

**COURSE OBJECTIVES**

The primary objective is to define and highlight importance of software project management and to become familiarize in formulating software management metrics & strategy in managing projects

**UNIT I: Introduction (14Hrs)**

Introduction to Competencies - Product Development Techniques - Management Skills - Product Development Life Cycle - Software Development Process and models - The SEI CMM - International Organization for Standardization

**UNIT II: Domain Processes (14Hrs)**

Managing Domain Processes - Project Selection Models - Project Portfolio Management - Financial Processes - Selecting a Project Team - Goal and Scope of the Software Project -Project Planning - Creating the Work Breakdown Structure - Approaches to Building a WBS - Project Milestones - Work Packages - Building a WBS for Software.

**UNIT III: Tasks and Activities (14Hrs)**

Tasks and Activities - Software Size and Reuse Estimating - The SEI CMM - Problems and Risks - Cost Estimation - Effort Measures - COCOMO: A

Regression Model - COCOMO II - SLIM: A Mathematical Model - Organizational Planning - Project Roles and Skills Needed.

**UNIT IV: Resource Activities (14Hrs)**

Project Management Resource Activities - Organizational Form and Structure - Software Development Dependencies - Brainstorming - Scheduling Fundamentals - PERT and CPM - Leveling Resource Assignments - Map the Schedule to a Real Calendar - Critical Chain Scheduling

**UNIT V: Quality: (14Hrs)**

Quality: Requirements – The SEI CMM - Guidelines - Challenges - Quality Function Deployment - Building the Software Quality Assurance - Plan - Software Configuration Management: Principles - Requirements - Planning and Organizing - Tools - Benefits - Legal Issues in Software

**UNIT –VI DYNAMISM (Evaluation Pattern-CIA only) ( 5 Hrs)**

To study recent tools on software project management tools

***\*The best out of two will be taken into account***

**COURSE OUTCOMES**

On the successful completion of the course, students will be able to:

| <b>CO's</b> | <b>Course Outcomes</b>   |
|-------------|--|
| <b>CLO1</b> | Understanding of project management fundamentals such as project planning, risk management and quality assurance   |
| <b>CLO2</b> | Choose the appropriate scheduling and testing techniques to build a quality product  |
| <b>CLO3</b> | Apply different cost estimation techniques and quality measures for software development   |
| <b>CLO4</b> | Differentiate various software development models and methodologies, planning activities and scheduling methods  |
| <b>CLO5</b> | Asses the importance of software project documentation and identify the methods to create project documentation, including requirements documents, design documents, and project plans |

**Mapping of COs with PSOs**

| <b>CO/PSO</b>                                     | <b>PSO1</b> | <b>PSO2</b> | <b>PSO3</b> | <b>PSO4</b> | <b>PSO5</b> | <b>PSO6</b> |

**COURSE DESCRIPTION**

This is a Web scripting language PHP able to build dynamic Web applications. Semantics and syntax of the PHP language, including discussion on the practical problems that PHP solves.

**COURSE OBJECTIVES**

The objective of this course is to provide the necessary knowledge to design and develop dynamic, database-driven web applications using PHP.

**UNITS****Unit 1: Introduction to E-Commerce****(6 HRS)**

Welcome to Electronic Commerce: Electronic commerce Framework –  
Electronic Commerce and Media Convergence – The Anatomy of  
E-commerce- Electronic Commerce Consumer Applications

**Electronic Commerce and World Wide Web:** Architectural Framework for Electronic Commerce – World Wide Web as the Architecture – Web Background: Hypertext Publishing – Technology behind the web.

**Unit II: Cascading Style Sheets& JavaScripts (6 HRS)**

CSS introduction - CSS properties - Controlling Fonts, Text formatting - Text- pseudo classes, Selectors, Links, Backgrounds, Lists - Introduction to Java Script - Functions and events - Popup boxes-alert, prompt, conform box - Built-in objects, writing JavaScript form validation

**Unit III: Introduction to PHP (6 HRS)**

Introduction - Server side scripting - Role of web server software - PHP comments, variables - echo and print - PHP operators, data types - Branching statements - Loops – Arrays

**Unit IV: PHP functions, Cookie, Error Handling (6 HRS)**

PHP functions - PHP form - Passing information between pages, \$\_GET, \$\_POST, \$\_REQUEST. - String functions - session and cookie management -Error handling in PHP

**Unit V: PHP with MYSQL (6 HRS)**

Functions for MySQL connectivity and operation- mysql\_connect, mysql\_select\_db, mysql\_query - mysql\_fetch\_row, mysql\_fetch\_array, mysql\_result, mysql\_list\_fields, mysql\_num\_fields, insertion - Updation and deletion of data using PHP - Displaying data from MySQL in webpage

## COURSE OUTCOMES

On the successful completion of the course, students will be able to:

| NO.  | COURSE OUTCOMES  | KNOWLEDGE LEVEL<br>(ACCORDING TO REVISED BLOOM'S TAXONOMY) | PSOs ADDRESSED    |
|------|--|--|-------------------|
| CO 1 | Describe fundamentals of web. Introduce the creation of static webpage using HTML. | K2 & K3  | PSO1 & PSO2       |
| CO 2 | Describe the importance of CSS in web development                                  | K2 & K3  | PSO2 & PSO3       |
| CO 3 | Describe the function of JavaScript as a dynamic webpage creating tool             | K2 & K3  | PSO2, PSO3 & PSO7 |
| CO 4 | Distinguish PHP as a server side programming language                              | K2 & K3  | PSO2, PSO3 & PSO7 |
| CO 5 | Outline the principles behind using MySQL as a backend DBMS with PHP               | K3 & K4  | PSO7 & PSO8       |

### Mapping of COs with PSOs
