ABSTRACT

A system allowing individuals to perform hospital activities at home, via the Internet. "Hospital Management System" helps to perform all routine transaction, such as Online Shopping, Appointment, Find a Doctor etc. We can get the help from anytime, day or night, and can be done from any where.

Appointment Module allows to get the appointment from home via internet. A person on entering the registration form can book their stay in the hospital online.

Online pharmacy modules just have some categories in our website offering medicine available for immediate online ordering.

Details of various doctors have been listed out. It provides very helpful information to the patients who are in search process.

Administrator may also view the contents of his pharmacy management/Order Status may also add or delete items as needed. Doctor can check out the sales information using pharmacy management.

Doctor can checkout, the order status including the buyer's name, address and billing instruction.
