CHAPTER 1

ABSTRACT

This project is aimed at developing a software for a hospital for pregnancy health check forum for pregnant ladies. Which will be easy for them to use from the place where they are. it will be easy for the pregnant woman to avoid unnecessary travel to know the scan details, reports and to get appointment.

In this product there will be two users such as admin and the public, whereas patient is the pregnant woman who need to access the hospital. in this software a pregnant woman can use this to know their periodical checkup date, scan date and report and to get the doctor's appointment.

Here in this software the patient has to enter their details such as their name, weight, date, due date, pressure etc. the admin will accept their request and add their details. once it is added the patient can fix dates for scan and their scan reports can be sent through their login. the user can also book appointments for checkup through this.
