ABSTRACT

This system provide the access to a Fashion Design Company which they can apply for the Sales of the Dress, Food wear and also this system help to generate the sales report, Product Report of the month according to the data or the available balance of the items(Stock) . This monthly report will update automatically. Every part has been done automatically.

As we know that our records information is traditionally paper based; they are maintained on paper. And because of that paper based record authority face lots of problem and if record will misplaced then humble of problem has been occurred. So this inventory control system will make the work of authorities bit easy.

Those features are available in ASP .NET. The work is developed with more security and powerful advanced features. ASP .NET is a powerful platform that helps in creating featured website and provides a database handling interface that is very easy to use.
