## **CHAPTER-1**

### **ABSTRACT**

Nowadays in this world, information is the essence of success. In the last two decades or so, man has made several advances in the field of information technology. The computer is one such device that can harness this power, combined with the information technology. This system, which allows companies to make and implement their strategies in online. This is tree Algorithm based employee recruitment system. Here all the employee recruitment activities are automated by using the system. If an employee is selected under any references. Then that employee will get bonus amount. Referral person is selected another employee means then both the employees will get credit. This is graphical based part of the global system, accessible to any person or organization anywhere in the world. The system has all the options to manage the member who is all joining the organization and manage member chain. It is a robust web-based software system with all the necessary features.
