ABSTRACT

College Management System is a comprehensive software solution designed to cater to the administrative and academic needs of educational institutions. This system caters to the needs of colleges and universities, offering functionalities for managing student information, academic records, faculty details, course scheduling, fee management, and more.

College management system is helpful for students as well as the colleges. In the existing system all the activities are done manually. It is very time consuming. It manage the college information, student information, Admission management, Attendance management and various different types of event going on in our college. In our proposed system, The data will be stored in the college server. To store the data SQL server will be used. The Admin, Faculty or the student should be a register user.

College Management System that is of importance to either an educational institution or a college. This system may be used for monitoring for the college. Staffs logging in may also access or can be search any of the information regarding college. Staff and students as well as marks of the students will be updated by staff. This College Management System is being developed for an college to maintain and facilitate easy access to information. For this the users must be registered with the system after which they can access as well as modify data as per the permissions given to them. This system can be used as a knowledge/information management system for the college. For a given student/staff (teaching/ Non- teaching Staffs) can access the system to some information from the Database.
