# ABSTRACT

The project entitled "NGO Trust Portal Service Using Payment Gateway" aims to address the educational and medical needs of beneficiary students and underprivileged communities. This project leverages an online platform to connect donors with students requiring financial assistance for educational expenses. Through the portal, beneficiaries can submit their educational requirements, such as uniform, scholarship, books, and equipment, while donors can contribute securely through the integrated payment gateway.

Additionally, the project facilitates medical camps for both beneficiaries and the broader community, offering essential healthcare services such as general check-ups, blood donation, and thyroid screenings. By combining education support and medical outreach, this initiative strives to uplift disadvantaged individuals and promote holistic well-being within the community.
