Metric : 2.3.1 – Students Centric Methods - Experiential Learning, Participative Learning & Problem-Solving Methodologies

Year : 2015 - 2020

The Students of Fatima College are exposed to a variety of learning experiences. Apart from the regular classes, all departments organize sessions and programmes for students that form part of **experiential learning, participative learning and problem-solving methodologies**. Subject Experts are roped in and this gives added knowledge to the students. The joy of learning and involvement of students is evident in these kinds of learning experiences.

Women students 'take to streets' to spread road safety message

TIMES NEWS NETWORK

Madurai: Around 40 women students from a city college performed flash mobs on Monday at two major public spots in the city to create awareness about road safety and wearing helmets.

Students from Fatima College's Department of Journalism and Mass Communication performed flash mobs at Goripalayam junction and outside Madurai Railway Station

Students from Fatima College's Department of Journalism and Mass Communication performed flash mobs at Goripalayam junction and outside Madurai Railway Station, carrying the message of wearing helmets and staying safe on roads. "The inspiration for coming up with such an activity started within the college. We noticed that many students didn't wear helmets properly or they used to wear them only

SHAKING A LEG FOR ROAD SAFETY: Fatima College students performing a flash mob at Goripalayam junction

on seeing the police. It is sad to see that many of us, even after being aware of safety rules tend to ignore it. So, we did a program to make students understand the importance of road safety. Then, we had the thought of taking the message directly to the public through such an activity," said Dr Saira Banu S, Assistant Professor, Department of Journalism and Mass Communication, Fatima College.

The performances of the students reminded the public about safe practices to be followed while on road. The need for

people on two-wheelers including the pillion riders to wear helmets, the necessity for wearing seat belts and following road safety rules. Dr Saira Banu further said that the students received full support of the local police, including district Commissioner of Police, S Davidson Desirvatham. "The police stressed on the need for such awareness events. Our journalism students not only benefited from organizing the flash mob but also by covering it as budding reporters, talking to the public and police about road safety in the city," she said.

Flash mob stresses the importance of wearing helmet

STAFF REPORTER
MADURAI

Vehicle users who passed through Goripalayam junction here on Monday morning were in for a surprise as about 50 students of Fatima College performed a flash mob to raise awareness of road safety. With music booming from loudspeakers, the students danced and held placards to emphasise the importance of wearing helmet.

The students from the Department of Journalism and Mass Communication of the women's college performed a flash mob at the entrance of Madurai railway junction too. "Though it is mandatory to wear helmet, many a motorcycle rider hurriedly slaps his helmet on his head only on seeing traffic police. So many people still violate the law and do not understand that wearing helmet is for their safety only," said Sushmitha Balakrishnan, a final-year student.

Talking on mobile
Bike riders violated other rules too, said B. Dharti, a second-year student. "A lot of people speak on their cell phones while riding. We want to emphasise that even the pillion rider must

The way forward

- About 200 head injury victims come for eye treatment every month
- Imposing fine alone might force bike riders to wear helmets
- Self-realisation and behavioural change needed among people

wear a helmet," she said.

M. Panchavarnam, a traffic police officer present at the junction, lauded the students for their novel attempt. "We tell riders to wear helmets all the time, but not many follow the rule. When students themselves create an awareness of this kind, it will certainly make an impact on the youth," she said.

Loss of vision
Though not all road accidents were fatal, the victims could lose eyesight even due to a minor injury, said S. Mahesh Kumar, Head, Department of Neuro Ophthalmology, Aravind Eye Hospital.

"A small injury on the head can damage the optic nerve which may even lead to loss of eyesight," he said. On an average, about 200 head injury victims

come for treatment to our hospital every month. Most of them would not have worn the helmet. To prevent damage to vision, one must certainly wear a helmet," he said.

"There was a considerable increase in the number of motorcycle riders wearing helmet in the city," said Assistant Commissioner of Police (Traffic) Joseph Nixon. "Total compliance of helmet rule is possible only when there is self-realisation among people," he said.

60% to 80%
Deputy Commissioner of Police (Traffic) K. Sakumaran said, "In July 2019, only around 60% of the vehicle users used helmets. Now, it has risen to 80%," he said.

The police were creating awareness along with penalising violators so that every rider wore a helmet. "Though imposing fine might force bike riders to wear helmets, it is not sustainable. Spreading awareness is the solution in the long run by which we are aiming at a behavioural change," he said. "Our main focus is to create awareness among the youth. Through sustained efforts we can achieve total compliance," he said.

Year : 2015 - 2020

PROBLEM SOLVING METHODOLOGIES

Students are trained to find solution for any problem by developing coding using computer languages. This involves:

Analysis of the given problem

Design a method to solve

Writing source code

Compile and debugging the code
