

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

FATIMA COLLEGE (AUTONOMOUS), MADURAI – 625018

NAME OF THE PROGRAMME: M.C.A

PROGRAMME CODE: MCA

PROGRAMME OUTCOMES:

- PO 1:** Apply the knowledge of computing maths and science for the solution of problems and requirements
- PO 2:** Identify, critically analyze, formulate and develop computer applications using fundamental principles of relevant domain disciplines
- PO 3:** Design and evaluate solutions for computer based problems to meet the desired needs within realistic constraints such as safety, security and applicability
- PO 4:** Use research based knowledge to conduct experiments and interpret data to attain well-defined conclusions.
- PO 5:** Create, select and apply modern computing tools by understanding the limitations, with dexterity.
- PO6:** Demonstrate the competency in programming skills as per industry expectations.
- PO7:** Understand the impact of system solutions in societal, environmental and cultural issues within local and global contexts for sustainable development
- PO8:** Commit to professional ethics and cyber regulations, responsibilities & norms.

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

- PO9:** Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary environment to manage projects.
- PO10:** Communicate effectively with the society about computing technologies.
- PO11:** Demonstrate knowledge and understanding of the management principles and apply these to manage projects.
- PO12:** Appreciate the importance of goal setting and to recognize the need for life-long learning in the broadest context of technological change.

PROGRAMME SPECIFIC OUTCOMES:

- PSO 1:** Ability to design and develop applications in the computing discipline to meet the customer's business objectives.
- PSO 2:** Ability to Integrate various system components to provide user interactive solutions for various challenges
- PSO 3:** Ability to test and maintain the software applications with latest computing tools and technologies.
- PSO 4:** Ability to understand the evolutionary changes in the practices and strategies in software project development.
- PSO 5:** Ability to enhance teamwork and leadership skills to solve time critical problems

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

2019 - 2020

COURSE CODE	COURSE TITLE	COURSE OUTCOMES
19MCA101	Mathematical Foundation of Computer Science	<p>CO 1: Perform Logical operations and predicate calculus needed for computing skill.</p> <p>CO 2: Analyze and Compare the various techniques for solving numerical equations.</p> <p>CO 3: Apply the techniques of statistics and numerical methods to unravel problems by computers.</p> <p>CO 4: Explain the set theory logic.</p> <p>CO 5: Utilize the Knowledge of matrices for designing and solving problems</p>
19MCA102	Computer Organization and Architecture	<p>CO 1: Ability to perform arithmetic operations in various number systems.</p> <p>CO 2: Conceptualize the basics of organizational and architectural issues of a digital computer.</p> <p>CO 3: Demonstrate and perform computer arithmetic operations</p>

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<p>on integer and real numbers.</p> <p>CO 4: Identify logic for assembly language programming.</p> <p>CO 5: Analyze the performance of Reduced Instruction Set Architecture.</p>
19MCA103	Operating Systems	<p>CO 1: Identify the components and processes.</p> <p>CO 2: Analyze on scheduling algorithms and deadlocks.</p> <p>CO 3: Demonstrate the mapping between the physical memory and virtual memory.</p> <p>CO 4: Identify the secondary memory management techniques.</p> <p>CO 5: Analyze on the distributed systems and security issues.</p>
19MCA104	Programming In C	<p>CO 1: Identify the basic terminologies used in C programming.</p> <p>CO 2: Design programs involving decision structures and loops.</p> <p>CO 3: Implement code reusability with the help of user defined functions.</p> <p>CO 4: Develop advanced applications using nested structures.</p> <p>CO 5: Demonstrate the dynamics of memory by the use of</p>

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		pointers and files.
19MCA105	Lab I- Visual Programming	CO 1: Develop GUI applications. CO 2: Design and Deploy application programs. CO 3: Design and implement applications using databases.
19MCA106	Lab II - C Programming	CO 1: Develop programs using branching statements and control statements. CO 2: Create applications using arrays, functions, pointers and files. CO 3: Gain skills to handle strings and files.
19MCA 107	Skill Based Lab I – Linux	CO 1: Use Linux utilities and develop shell scripts to perform tasks. CO 2: Effectively use Linux environment to accomplish software development tasks. CO 3: Monitor system performance and network activities.
19MCA108	Soft Skills I -	CO 1: Display competence in oral and written communication.

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

	Communicative English	CO 2: Use current technology related to the communication.
19MCA201	Data Structures And Algorithms	<p>CO 1: Select appropriate data structures as applied to specified problem definition.</p> <p>CO 2: Implement operations like searching, insertion, deletion and traversing in trees.</p> <p>CO 3: Compare the data structures of advanced search trees.</p> <p>CO 4: Implement appropriate heap operations, sorting, searching techniques for a given problem.</p> <p>CO 5: Determine and analyze the complexity of graph Algorithms.</p>
19MCA202	Software Engineering	<p>CO 1: Compare the different domains and process models.</p> <p>CO 2: Identify the data, class and flow oriented modeling concepts.</p> <p>CO 3: Analyze on the design oriented concepts.</p> <p>CO 4: Identify the managerial aspects of software development.</p> <p>CO 5: Generate project schedule for different activities of software development</p>

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

19MCA203	Relational Database Management Systems	<p>CO 1: Design conceptual models of a database using ER model.</p> <p>CO 2: Outline the features of DBMS and Relational Database design.</p> <p>CO 3: Retrieve information from database by formulating complex SQL Queries.</p> <p>CO 4: Utilize PL/SQL programming to solve problems.</p> <p>CO 5: Implement Packages, Triggers for efficient retrieval of information.</p>
19MCA204	Object Oriented Programming In C++	<p>CO 1: Outline the process and mechanism of functions.</p> <p>CO 2: Identify the relation between arrays and pointers, and use them efficiently in program</p> <p>CO 3: Use C++ classes for code reusability.</p> <p>CO 4: Discuss on the concept of function and operator overloading, virtual functions and polymorphism</p> <p>CO 5: Demonstrate the power of templates for generic programming.</p>

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

19MCA205	Lab III – RDBMS	<p>CO 1: Enhance Programming skills and techniques.</p> <p>CO 2: Formulate complex queries using SQL</p> <p>CO 3: Use the PL/SQL code constructs of IF-THEN-ELSE and LOOP types as well as syntax and command functions.</p>
19MCA206	Lab IV - C++ Programming	<p>CO 1: Develop programs in object oriented paradigm.</p> <p>CO 2: Analyze, use, and create different types of functions and classes.</p> <p>CO 3: Design programs to implement various data structure concepts</p>
19MCA207	Skill Based Lab II – HTML & CSS	<p>CO 1: Design and develop attractive WebPages.</p> <p>CO 2: Implement a variety of presentation effects in html documents using CSS.</p> <p>CO 3: Write valid standards-conformant html documents using variety of form elements</p>
19MCA208	Soft Skills II – Colloquium	<p>CO 1: Identify the communication differences in working environment with different cultural styles.</p>

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<p>CO 2: Practice the skills and behaviours required to facilitate a group.</p> <p>CO 3: Demonstrate an effective presentation in a meeting.</p>
19MCA301	Graph Theory	<ul style="list-style-type: none"> • Write precise & accurate mathematical definitions of graph theory • Apply the principles and concepts of graph theory in practical situations. • Solve the problems using the concepts of Graphs and trees. • Validate and critically assess a mathematical proof. • Explore the modern applications of graph theory
19MCA302	Data Communication And Networking	<ul style="list-style-type: none"> • Identify the functionalities of Networking layers of both OSI and TCP/IP reference models. • Analyze the design issues of Data link layer and techniques to resolve it. • Compare the principles of Switching and Routing algorithm. • Predict the TCP and UDP related procedures.

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<ul style="list-style-type: none"> Outline the Application layer protocols.
19MCA303	Programming In Java	<ul style="list-style-type: none"> Apply the basic Java constructs to develop solutions to real time problems. Analyze the hierarchy of java classes to develop object oriented programs. Design software in Java using Packages and Threads. Implement Concepts of AWT for creating GUI. Design a Software using JDBC.
19MCA304	Lab V – PHP & MYSQL	<ul style="list-style-type: none"> Design WebPages using server side scripting. Use PHP built-in functions and custom functions for processing. Create various interactive and dynamic websites
19MCA305	Lab VI – Java Programming	<ul style="list-style-type: none"> Apply the basic Java constructs to develop solutions to real time problems. Analyze the hierarchy of java classes to develop object oriented

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<p>programs.</p> <ul style="list-style-type: none"> • Design software in Java using Packages and Threads. • Implement Concepts of AWT for creating GUI. • Design a Software using JDBC.
19MCA306	Networking Tools	<ul style="list-style-type: none"> • To implement wired and wireless networks. • To analyze various protocols in wired and wireless environment
19MCA307	Quantitative Aptitude	<ul style="list-style-type: none"> • Apply quantitative techniques to solve variety of problems. • Perform statistical analysis to interpret information
19MCA401	Compiler Design	<ul style="list-style-type: none"> • To analyze the basic concepts and applications of Compiler Design • To compare various lexical analyzers and grammars • To formulate the conversion process between finite automata, regular grammars with the transition and transformation methods • To demonstrate the knowledge of formal connection and

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<p>relationship to expressions and languages</p> <ul style="list-style-type: none"> To identify if a language is regular, context-free, unambiguous after reducing it to normal forms
19MCA402	Mobile Communication & Application Development	<ul style="list-style-type: none"> Identify, Predict and Evaluate Wireless Communication Protocols Compare and analyze various multiplexing techniques in mobile environment. Demonstrate the architectures, challenges and solutions of Wireless communication. Assess the role of Wireless Networks in shaping the future internet. Design and develop apps for mobiles using Android. Apply Location Based Services of Android for ensuring women's safety and security
19MCA403	Programming In Python	<ul style="list-style-type: none"> Predict the basics of Python programming. Solve problems requiring the writing of well-documented programs in the Python language, including use of the logical constructs of that language.

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<ul style="list-style-type: none"> • Use and manipulate Lists and python exception handling model to develop robust programs. • Formulate solutions for String, tuples and File operations. • Apply object-oriented programming concepts to develop dynamic interactive Python applications
19MCA404	Lab VII - Mobile Application Development	<ul style="list-style-type: none"> • Install and configure Android application development tools. • Design and develop user Interfaces for the Android platform. • Apply Java programming concepts to Android application development. • Familiar with technology and business trends impacting mobile applications.
19MCA405	Lab VIII – Python Programming	<ul style="list-style-type: none"> • Implement Math functions, Strings, List and Tuple in Python programs. • Express different Decision Making statements and Functions. • Interpret Object oriented programming in Python & File handling operations

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

19MCA406	Software Testing Tools	<ul style="list-style-type: none"> Finding defects in the programs while developing the software. Able to write test cases and test scenarios. Develop the scripts for finding the defects and preventing them. Understand the automated testing tools available
19MCA407	Technical Aptitude	<ul style="list-style-type: none"> Enhance the technical skills for employability. Improve the proficiency of participation in competitive examinations
19MCADS01	Big Data Analytics	<ul style="list-style-type: none"> Work with big data platform and Understand the fundamentals of various big data analysis techniques Analyze the big data analytic techniques for useful business applications. Design efficient algorithms for mining the data from large volumes. Examine the HADOOP and Map Reduce technologies associated with big data analytics

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<ul style="list-style-type: none"> Explore the applications of Big Data
19MCADS02	Big Data Security	<ul style="list-style-type: none"> Identify the need for security and best practices in a big data environment Analyze the steps to secure big data Build security in hadoop eco system Assess the sensitivity of data in Hadoop Outline data security and event logging
19MCADS03	Data Analytics Using Pig And Hive	<ul style="list-style-type: none"> Outline the programming constructs of Pig and database management using HiveQL Write scripts using Pig latin and perform various HiveQLqueries by applying RDBMS concepts Apply the concepts of Pig and Hive in simple tasks Formulate and analyse different databases for different situations Create real time applications
19MCANW01	Cryptography And Network Security	<ul style="list-style-type: none"> Evaluate the fundamentals of networks security, security architecture, threats and vulnerabilities.

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<ul style="list-style-type: none"> • Compare Stream ciphers and block ciphers. • Apply the different cryptographic operations of public key cryptography. • Pertain the various Authentication schemes to simulate different applications. • Analyze various Security practices and System security standards
19MCANW02	Wireless Sensor Networks	<ul style="list-style-type: none"> • Formulate the basic standardization of wireless networks. • Analyze the implementation of technologies related to WSN. • Identify and understand the security issues in ad hoc and sensor networks. • Compare the protocols and to promote the research work in this area. • Apply and solve problems in the applications of Wireless Networking Area.
19MCANW03	High Speed Networks	<ul style="list-style-type: none"> • Identify the building blocks and operation of high speed networking and ATM. • Analyze the cause of congestion, traffic slow down and

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<p>related factors for Quality of Service Identify.</p> <ul style="list-style-type: none"> • Apply the concepts learnt in this course to optimize performance of high-speed networks using Flow Control. • Compare the different architectures used for HSN. • Describe the protocols that are used to design high speed networks.
19MCAAD01	Web Programming Techniques	<ul style="list-style-type: none"> • Understand the basics of HTML tags. • Analyze the advanced features of HTML5. • Implement the use of internal and external Cascading Style Sheets (CSS) to format elements on single or group of pages. • Compose programs for the web and other contexts using the JavaScript programming language. • Apply various ECMA Script 6 methods in building interactive websites.
19MCAAD02	Internet Programming Frameworks	<ul style="list-style-type: none"> • Analyze React Components, the building blocks and its interaction with other web applications. • Design websites using various Angular features including

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<p>directives, components and services.</p> <ul style="list-style-type: none"> • Compute and build applications using Node.JS along with the combination of Bootstrap. • Apply the concepts of MongoDB & MySQL, the back-end databases. • Utilize the conceptual and practical aspects of CSS Pre-processors and JSON
19MCAAD03	Software Development Frameworks	<ul style="list-style-type: none"> • Explain the fundamental principles and practices of the agile development methods. • Analyze the planning and execution of the agile manifesto • Monitor the management to achieve complete product development. • Practice the integration of development and operations in software projects. • Present the software project by following the principles that best fit the technical and market demands
19MCAGE01	Resource Management Techniques	<ul style="list-style-type: none"> • Identify the applications of Operations Research and methods to solve business problems.

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<ul style="list-style-type: none"> • Apply linear programming to solve operational problem with constraints. • Apply transportation and assignment models to find optimal solution in warehousing and Travelling, • Prepare project scheduling using PERT and CPM. • Use optimization concepts in real world problems
19MCAGE02	Financial Management And Accounting	<ul style="list-style-type: none"> • Preparation and analysis of balance sheet. • Predict the Classification of Costing. • Decide the budget preparation and control of a company. • Analyze the flow of funds. • Use Tally to implement the needs of financial accounting
19MCAGE03	Management Information Systems	<ul style="list-style-type: none"> • Analyze and synthesize business information needs to facilitate evaluation of strategic alternatives. • Apply MIS knowledge and skills learned to facilitate development, deployment and management of information systems. • Predict the use of information technology for business processes.

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<ul style="list-style-type: none"> Assess the use of technology of Information Systems for effective management. Identify the security features and global issues in organization and society
19MCAGE04	E-Commerce	<ul style="list-style-type: none"> Gain a comprehensive understanding of the E-Commerce landscape, current and emerging technology and infrastructure underpinnings of the business. Analyze the impact of E-commerce on business models and strategy. Develop an understanding on how internet can help business grow/ Describe the infrastructure for E-commerce Assess electronic payment systems Gain an understanding on the importance of security, privacy, and ethical issues as they relate to E-Commerce.
19MCAGE05	Cyber Forensics	<ul style="list-style-type: none"> Predict the forensics fundamentals and the various technologies used to avoid computer crimes. Illustrate different methods to collect and preserve digital evidence and Digital Crime Scene.

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<ul style="list-style-type: none"> Identify and Analyze Forensic Technical Surveillance Devices. Evaluate the Various tools and tactics followed in military. Demonstrate the Usage of surveillance tools for tracking cyber criminals
19MCAGE06	Ethics In Computing	<ul style="list-style-type: none"> Predict the relationship between the law, ethics and computer technology. Outline the philosophical and ethical debates with the ideas and the nature of intellectual creativity. Design the impact of computer technology on free speech. Formulate the ethical and legal issues of the impact that computing technologies had on workplace. Develop a personal standpoint in relation to DataBase society and the usage of biometric data.
19MCAGE07	Entrepreneurship Development	<ul style="list-style-type: none"> Highlight the salient characteristics of successful entrepreneur Enumerate the competencies relevant for Entrepreneurial development. Delineate the growth of women Entrepreneurship in India. Identify the major problems faced in conducting EDPs.

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<ul style="list-style-type: none"> Discuss the methods of project appraisal used for small scale enterprises
19MCAGE21	Research Methodology	<ul style="list-style-type: none"> Predict the different stages of research process. Apply methods to collect best data. Assess the suitable research design & work. Compare categorical and continuous measures. Analyze the process of various reports writing.
19MCAGE22	Data Mining And Data Warehousing	<ul style="list-style-type: none"> Practice the pre-processing operations of data. Compare & contrast OLTP, OLAP and Data mining as techniques for extracting knowledge from a Data Warehouse. Perform Association Rule Mining for Market Basket Analysis. Design & deploy the appropriate Classification and Clustering techniques. Explore the recent trends in data mining.
19MCAGE23	Digital Image Processing	<ul style="list-style-type: none"> To review the fundamental concepts of a digital image processing system. To examine various types of images, their intensity

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<p>transformations and spatial filtering.</p> <ul style="list-style-type: none"> • To analyze the different types of noises and the filters used to restore and reconstruct the images. • To create colour images and pseudo images with smoothening and sharpening techniques. • To compare the various lossy and lossless compression mechanisms.
19MCAGE24	Artificial Intelligence & Expert Systems	<ul style="list-style-type: none"> • Identify problems that are amenable to solution by AI methods. • Formulate search problems and implement search algorithms using admissible heuristics. • Design and carry out an empirical evaluation of different algorithms on a predicate logic and state the conclusions that the evaluation supports. • Analyze games playing as adversarial search problems and implement optimal and efficient solutions. • Apply the concepts of Expert Systems in machine learning
19MCAGE25	Soft Computing	<ul style="list-style-type: none"> • Explore the functional components of artificial neural networks.

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<ul style="list-style-type: none"> • Examine the principles of back propagation networks. • Expose the students to the concepts of predicting the functionalities of ART. • Analyze the logic principle of classical sets and fuzzy set operations in fuzzy set theory. • Identify the concept of fuzzification and defuzzification involved in various systems
19MCAGE26	Cloud Computing	<ul style="list-style-type: none"> • Compare the strengths and limitations of cloud computing. • Identify the architecture, infrastructure and delivery models of cloud computing. • Apply suitable virtualization concept. • Choose the appropriate Cloud player, Programming Models and approach. • Address the core issues of cloud computing such as security, privacy and interoperability
19MCAGE27	Advanced Dbms Techniques	<ul style="list-style-type: none"> • Design the basic concepts of the advanced database design and dependencies. • Compare the different data models.

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<ul style="list-style-type: none"> • Compile the implementation concepts of storage structures. • Analyze on the advanced transaction management techniques. • Discuss on the advanced databases
COURSE CODE	COURSE TITLE	COURSE OBJECTIVES
MCA545	Cloud Computing	<ul style="list-style-type: none"> • Compare the strengths and limitations of cloud computing. • Identify the architecture, infrastructure and delivery models of cloud computing. • Apply suitable virtualization concept. • Choose the appropriate Cloud player, Programming Models and approach. • Address the core issues of cloud computing such as security, privacy and interoperability
MCA546E1	Digital Image Processing	<ul style="list-style-type: none"> • To review the fundamental concepts of a digital image processing system. • To examine various types of images, their intensity transformations and spatial filtering. • To analyze the different types of noises and the filters used to

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<ul style="list-style-type: none"> Identify and Analyze Forensic Technical Surveillance Devices. Evaluate the Various tools and tactics followed in military. Demonstrate the Usage of surveillance tools for tracking cyber criminals
MCA546E4	High Speed Networks	<ul style="list-style-type: none"> Identify the building blocks and operation of high speed networking and ATM. Analyze the cause of congestion, traffic slow down and related factors for Quality of Service Identify. Apply the concepts learnt in this course to optimize performance of high-speed networks using Flow Control. Compare the different architectures used for HSN. Describe the protocols that are used to design high speed networks.
MCA547E1	Soft Computing	<ul style="list-style-type: none"> Explore the functional components of artificial neural networks. Examine the principles of back propagation networks. Expose the students to the concepts of predicting the functionalities of ART.

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<ul style="list-style-type: none"> Analyze the logic principle of classical sets and fuzzy set operations in fuzzy set theory. Identify the concept of fuzzification and defuzzification involved in various systems
MCA547E2	Wireless Sensor Networks	<ul style="list-style-type: none"> Formulate the basic standardization of wireless networks. Analyze the implementation of technologies related to WSN. Identify and understand the security issues in ad hoc and sensor networks. Compare the protocols and to promote the research work in this area. Apply and solve problems in the applications of Wireless Networking Area.
MCA547E3	Software Project Management	<ul style="list-style-type: none"> Deliver successful software projects that support organization's strategic goals Match organizational needs to the most effective software development model Plan and manage projects at each stage of the software development life cycle

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<ul style="list-style-type: none"> • Create project plans that address real-world management challenges • Develop the skills for tracking and controlling software deliverables • Predict the behaviour of people working in teams and to explore the ways of Managing people in Software Environments.
MCA547E4	Service Oriented Architecture	<ul style="list-style-type: none"> • The creation of SOA compliant web service using various technologies • Predict the various service oriented analysis techniques • CO 3 : Apply the knowledge on advanced concepts of service composition, Orchestration and Choreography. • Understand web service framework with respect to SOA. • Understand various open standards available for developing SOA compliant web services.
MCA548	Internet Programming Using J2ee	<ul style="list-style-type: none"> • Create dynamic web pages, using Servlets and JSP. • Make a reusable software component, using Java Bean. • invoke the remote methods in an application using Remote

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<p>Method Invocation (RMI)</p> <ul style="list-style-type: none"> understand the multi-tier architecture of web-based enterprise applications using Enterprise JavaBeans (EJB)
MCA549	. Net Programming	<ul style="list-style-type: none"> Know about multi-tier application development. Create user interactive web pages using ASP.Net. Create simple data binding applications using ADO.Net connectivity. Performing Database operations for Windows Form and web applications. Develop web services.
MCA550	Lab IX- J2ee Programming	<ul style="list-style-type: none"> Design and develop Web applications Designing Enterprise based applications by encapsulating an application's business logic. Designing applications using pre-built frameworks.
MCA551	Lab X- . Net Programming	<ul style="list-style-type: none"> .Create user interactive web pages using ASP.Net. CO Create simple data binding applications using ADO.Net connectivity.

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<ul style="list-style-type: none"> Performing Database operations for Windows Form and web applications.
MCA552	Skill Based Lab V- Domain Study	<ul style="list-style-type: none"> Identify the domain to be analyzed Prepare an in depth study on the recent trends in the chosen domain Present the various analysis using various tools Create a model on the analysis done Create a research paper from the analysis and findings
MCA553	Soft Skills V- Interpersonal Skill For Corporate Readiness	<ul style="list-style-type: none"> Outline the roles played in workgroups and teams Describe how good communication influences working relationship.
MCA554	Open Source Lab– Iii – Netbeans	<ul style="list-style-type: none"> Starts with Java development with Maven in NetBeans IDE Describe the complete Java development workflow, including testing

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

2018 - 2019

COURSE CODE	COURSE TITLE	COURSE OBJECTIVES
MCA101	Mathematical Foundation of Computer Science	<ul style="list-style-type: none"> • Perform Logical operations and predicate calculus needed for computing skill. • Analyze and Compare the various techniques for solving numerical equations. • Apply the techniques of statistics and numerical methods to unravel problems by computers. • Explain the set theory logic. • Utilize the Knowledge of matrices for designing and solving problems
MCA102	Computer Organization and Architecture	<ul style="list-style-type: none"> • Ability to perform arithmetic operations in various number systems. • Conceptualize the basics of organizational and architectural issues of a digital computer. • Demonstrate and perform computer arithmetic operations on integer and real numbers. • Identify logic for assembly language programming.

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<ul style="list-style-type: none"> Analyze the performance of Reduced Instruction Set Architecture.
MCA103	Operating Systems	<ul style="list-style-type: none"> Identify the components and processes. Analyze on scheduling algorithms and deadlocks. Demonstrate the mapping between the physical memory and virtual memory. Identify the secondary memory management techniques. Analyze on the distributed systems and security issues.
MCA104	Data Structures and Algorithms	<ul style="list-style-type: none"> Select appropriate data structures as applied to specified problem definition. Implement operations like searching, insertion, deletion and traversing in trees. Compare the data structures of advanced search trees. Implement appropriate heap operations, sorting, searching techniques for a given problem. Determine and analyze the complexity of graph Algorithms.
MCA105	Programming in C	<ul style="list-style-type: none"> Identify the basic terminologies used in C programming.

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<ul style="list-style-type: none"> • Design programs involving decision structures and loops. • Implement code reusability with the help of user defined functions. • Develop advanced applications using nested structures. • Demonstrate the dynamics of memory by the use of pointers and files.
MCA106	Lab I – Visual Programming	<ul style="list-style-type: none"> • Develop GUI applications. • Design and Deploy application programs. • Design and implement applications using databases.
MCA107	Lab II- C Programming	<ul style="list-style-type: none"> • Develop programs using branching statements and control statements. • Create applications using arrays, functions, pointers and files. • Gain skills to handle strings and files.
MCA108	Skill Based lab I –Linux	<ul style="list-style-type: none"> • Use Linux utilities and develop shell scripts to perform tasks. • Effectively use Linux environment to accomplish software development tasks. • Monitor system performance and network activities.

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

MCA109	Soft Skills I - Communicative English	<ul style="list-style-type: none"> • Display competence in oral and written communication. • Use current technology related to the communication.
MCA110	Open Source Lab I– Libre Office	<ul style="list-style-type: none"> • Recognize when to use each of the Libre Office programs to create professional and academic documents. • Use Libre Office programs to create personal, academic and business documents following current professional and/or industry standards.
MCA212	Financial Management and Accounting	<ul style="list-style-type: none"> • Preparation and analysis of balance sheet. • Predict the Classification of Costing. • Decide the budget preparation and control of a company. • Analyze the flow of funds. • Use Tally to implement the needs of financial accounting
MCA213	Software Engineering	<ul style="list-style-type: none"> • Compare the different domains and process models. • Identify the data, class and flow oriented modelling concepts. • Analyze on the design oriented concepts. • Identify the managerial aspects of software development. • Generate project schedule for different activities of software

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		development
MCA214	Management Information Systems	<ul style="list-style-type: none"> Analyze and synthesize business information needs to facilitate evaluation of strategic alternatives. Apply MIS knowledge and skills learned to facilitate development, deployment and management of information systems. Predict the use of information technology for business processes. Assess the use of technology of Information Systems for effective management. Identify the security features and global issues in organization and society. Interpret how to use information technology to solve business problems.
MCA215	Relational Database Management Systems	<ul style="list-style-type: none"> Design conceptual models of a database using ER model. Outline the features of DBMS and Relational Database design. Retrieve information from database by formulating complex SQL Queries. Utilize PL/SQL programming to solve problems.

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<ul style="list-style-type: none"> Implement Packages, Triggers for efficient retrieval of information.
MCA216	Object Oriented Programming in C++	<ul style="list-style-type: none"> Outline the process and mechanism of functions. Identify the relation between arrays and pointers, and use them efficiently in program Use C++ classes for code reusability. Discuss on the concept of function and operator overloading, virtual functions and polymorphism Demonstrate the power of templates for generic programming.
MCA217	Lab III- RDBMS	<ul style="list-style-type: none"> Enhance Programming skills and techniques. Formulate complex queries using SQL Use the PL/SQL code constructs of IF-THEN-ELSE and LOOP types as well as syntax and command functions.
MCA218	Lab IV- C++ Programming	<ul style="list-style-type: none"> Develop programs in object oriented paradigm. Analyze, use, and create different types of functions and classes. Design programs to implement various data structure concepts

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

MCA219	Skill Based Lab II -Tally	<ul style="list-style-type: none"> • Use accounting and business terminology • explain the objective of financial reporting and related key accounting assumptions and principles. • Create company, enter accounting voucher entries including advance voucher entries. • Do reconcile bank statement, do accrual adjustments, and also print financial statements. • Generate reports
MCA220	Soft Skills II –Colloquium	<ul style="list-style-type: none"> • Identify the communication differences in working environment with different cultural styles. • Practice the skills and behaviors required to facilitate a group. • Demonstrate an effective presentation in a meeting.
MCA221	Open Source Lab II – Blender	<ul style="list-style-type: none"> • Learn to Use Blender to Create Beautiful 3D Models From Zero. • create valid and complete 3D meshes for use in visualisation, games design, and 3D printing.
MCA321	System Software	<ul style="list-style-type: none"> • Understand the basics of system programs like editors, compiler, assembler, linker, loader, interpreter and debugger.

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<ul style="list-style-type: none"> Describe the various concepts of assemblers and macro-processors. Understand the various phases of compiler and compare its working with assembler.
MCA322	Data Communication And Networking	<ul style="list-style-type: none"> Identify the functionalities of Networking layers of both OSI and TCP/IP reference models. Analyze the design issues of Datalink layer and techniques to resolve it. Compare the principles of Switching and Routing algorithm. Predict the TCP and UDP related procedures. Outline the Application layer protocols.
MCA323E1	E-Commerce	<ul style="list-style-type: none"> Gain a comprehensive understanding of the E-Commerce landscape, current and emerging technology and infrastructure underpinnings of the business. Analyze the impact of E-commerce on business models and strategy. Develop an understanding on how internet can help business grow/ Describe the infrastructure for E-commerce

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<ul style="list-style-type: none"> Assess electronic payment systems Gain an understanding on the importance of security, privacy, and ethical issues as they relate to E-Commerce.
MCA323E2	Distributed Operating System	<ul style="list-style-type: none"> To learn the fundamentals of Distributed Operating Systems. To learn the mechanisms involved in memory management in Distributed OS Analyze the various device and resource management techniques for timesharing and distributed systems Understand the Mutual exclusion, Deadlock detection and agreement protocols of Distributed operating system Interpret the mechanisms adopted for file sharing in distributed Applications
MCA323E3	Theory of Computation	<ul style="list-style-type: none"> Discuss key notions of computation, such as algorithm, computability, decidability, reducibility, and complexity, through problem solving. Explain the models of computation, including formal languages, grammars and automata, and their connections. State and explain the Church-Turing thesis and its significance.

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<ul style="list-style-type: none"> Analyze and design finite automata, pushdown automata, Turing machines, formal languages, and grammars. Solve computational problems regarding their computability and complexity and prove the basic results of the theory of computation.
MCA323E4	Embedded Systems	<ul style="list-style-type: none"> Understand hardware and software design requirements of embedded systems. Analyze the embedded systems' specification and develop software programs. Evaluate the requirements of programming Embedded Systems, related software architectures and tool chain for Embedded Systems.
MCA324	Advanced Programming Principles	<ul style="list-style-type: none"> Design, implement, test and debug programs that use loops and arrays. Design, implement, test and debug programs that use functions. Design, implement, test and debug programs that use arrays for character strings and that use pointers for character strings.

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<ul style="list-style-type: none"> • Use if-else statements and switch-case statements to write programs in Python to tackle any decision-making scenario. • Master Object-oriented programming to create an entire Python project using objects and classes. • Store and retrieve information using variables
MCA325	Programming in JAVA	<ul style="list-style-type: none"> • Apply the basic Java constructs to develop solutions to real time problems. • Analyze the hierarchy of java classes to develop object oriented programs. • Design software in Java using Packages and Threads. • Implement Concepts of AWT for creating GUI. • Design a Software using JDBC.
MCA326	Lab – V- Advanced C & Python Programming	<ul style="list-style-type: none"> • Understand basic data structures such as arrays, linked lists, stack using pointers • Describe the Python language syntax including control statements, loops and functions to write programs • Examine the core data structures like lists, dictionaries, tuples and sets in Python to store, process and sort the data

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

MCA327	Lab – VI- JAVA Programming	<ul style="list-style-type: none"> • Apply the basic Java constructs to develop solutions to real time problems. • Analyze the hierarchy of java classes to develop object oriented programs. • Design software in Java using Packages and Threads. • Implement Concepts of AWT for creating GUI. • Design a Software using JDBC.
MCA328	Skill Based Lab III-HTML, CSS.	<ul style="list-style-type: none"> • Design and develop attractive WebPages. • Implement a variety of presentation effects in html documents using CSS. • Write valid standards-conformant html documents using variety of form elements
MCA329	Soft skills III – Quantitative Aptitude	<ul style="list-style-type: none"> • Apply quantitative techniques to solve variety of problems. • Perform statistical analysis to interpret information
MCA330	Open Source Lab– I Blender	<ul style="list-style-type: none"> • Learn to Use Blender to Create Beautiful 3D Models From Zero. • create valid and complete 3D meshes for use in visualization, games design, and 3D printing.

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

MCA433	Graph Theory	<ul style="list-style-type: none"> • Write precise & accurate mathematical definitions of graph theory • Apply the principles and concepts of graph theory in practical situations. • Solve the problems using the concepts of Graphs and trees. • Validate and critically assess a mathematical proof. • Explore the modern applications of graph theory
MCA434E1	Computer Graphics	<ul style="list-style-type: none"> • To list the basic concepts used in computer graphics. • To implement various algorithms to scan, convert the basic geometrical primitives, transformations, Area filling, clipping. • To describe the importance of 2 dimensional and 3 dimensional transformations. • To define the fundamentals of multimedia systems and compression. • To understand different standards of file format and multimedia Input/ Output technologies.
MCA434E2	Data Mining & Data	<ul style="list-style-type: none"> • Practice the pre-processing operations of data. • Compare & contrast OLTP, OLAP and Data mining as

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

	Warehousing	<p>techniques for extracting knowledge from a Data Warehouse.</p> <ul style="list-style-type: none"> • Perform Association Rule Mining for Market Basket Analysis. • Design & deploy the appropriate Classification and Clustering techniques. • Explore the recent trends in data mining.
MCA434E3	Compiler Design	<ul style="list-style-type: none"> • To analyze the basic concepts and applications of Compiler Design • To compare various lexical analyzers and grammars • To formulate the conversion process between finite automata, regular grammars with the transition and transformation methods • To demonstrate the knowledge of formal connection and relationship to expressions and languages • To identify if a language is regular, context-free, unambiguous after reducing it to normal forms
MCA434E4	Network Security and Cryptography	<ul style="list-style-type: none"> • Evaluate the fundamentals of networks security, security architecture, threats and vulnerabilities. • Compare Stream ciphers and block ciphers.

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<ul style="list-style-type: none"> • Apply the different cryptographic operations of public key cryptography. • Pertain the various Authentication schemes to simulate different applications. • Analyze various Security practices and System security standards
MCA435E1	Software Testing	<ul style="list-style-type: none"> • List a range of different software testing techniques and strategies and be able to apply specific(automated) unit testing method to the projects. • Distinguish characteristics of structural testing methods. • Demonstrate the integration testing which aims to uncover interaction and compatibility problems as early as possible. • Discuss about the functional and system testing methods. • Demonstrate various issues for object oriented testing.
MCA435E2	OOAD & UML	<ul style="list-style-type: none"> • Describe the three pillars of object-orientation and explain the benefits of each. • Create use case documents that capture requirements for a software system.

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<ul style="list-style-type: none"> • Create class diagrams that model both the domain model and design model of a software system. • Create interaction diagrams that model the dynamic aspects of a software system. • Explain the facets of the Unified Process approach to designing and building a software system. • Describe how design patterns facilitate development and list several of the most popular patterns.
MCA435E3	Ethics in Computing	<ul style="list-style-type: none"> • Predict the relationship between the law, ethics and computer technology. • Outline the philosophical and ethical debates with the ideas and the nature of intellectual creativity. • Design the impact of computer technology on free speech. • Formulate the ethical and legal issues of the impact that computing technologies had on workplace. • Develop a personal standpoint in relation to Database society and the usage of biometric data.
MCA435E4	Client/ Server Computing	<ul style="list-style-type: none"> • Understand fundamental concepts of Client Server systems,

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<p>system models of distributed systems, networks that distributed systems run on.</p> <ul style="list-style-type: none"> • Explore communication protocols between processes in distributed systems, Middleware, Enterprise Application integration, and Web Services Security • Gain Exposure on most common used servers. • Understand the concept of client-server development and learn problem solving skills through design scenarios for network environment. • Develop a client –server based application.
MCA436	Mobile communication & Application Development	<ul style="list-style-type: none"> • Identify, Predict and Evaluate Wireless Communication Protocols • Compare and analyze various multiplexing techniques in mobile environment. • Demonstrate the architectures, challenges and solutions of Wireless communication. • Assess the role of Wireless Networks in shaping the future internet. • Design and develop apps for mobiles using Android.

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<ul style="list-style-type: none"> • Apply Location Based Services of Android for ensuring women's safety and security
MCA437	Web Based Programming	<ul style="list-style-type: none"> • Develop a dynamic webpage by the use of java script and DHTML. • Connect with a DBMS and perform insert, update and delete operations on DBMS table. • Write a server side program • Perform various MySQL database queries
MCA438	Lab – VII – Mobile Application Development	<ul style="list-style-type: none"> • Install and configure Android application development tools. • Design and develop user Interfaces for the Android platform. • Apply Java programming concepts to Android application development. • Familiar with technology and business trends impacting mobile applications.
MCA439	Lab – VIII- PHP & MYSQL Lab	<ul style="list-style-type: none"> • Create a PHP web page that is unique to each visitor • Validate user input • Create, back up and restore a MySQL database

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<ul style="list-style-type: none"> Perform various MySQL database queries
MCA440	Skill Based Lab IV- Software Testing Tools Lab	<ul style="list-style-type: none"> Finding defects in the programs while developing the software. Able to write test cases and test scenarios. Develop the scripts for finding the defects and preventing them. Understand the automated testing tools available
MCA441	Soft skills IV- Technical Aptitude	<ul style="list-style-type: none"> Enhance the technical skills for employability. Improve the proficiency of participation in competitive examinations
MCA442	Open Source Lab– II GIMP	<ul style="list-style-type: none"> Demonstrate working with images. Demonstrate working with selections, layers, and painting tools. Demonstrate methods for photo retouching. Demonstrate methods for making color corrections. Demonstrate using masks and the quick mask mode
MCA545	Cloud Computing	<ul style="list-style-type: none"> Compare the strengths and limitations of cloud computing. Identify the architecture, infrastructure and delivery models of

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<p>cloud computing.</p> <ul style="list-style-type: none"> • Apply suitable virtualization concept. • Choose the appropriate Cloud player, Programming Models and approach. • Address the core issues of cloud computing such as security, privacy and interoperability
MCA546E1	Digital Image Processing	<ul style="list-style-type: none"> • To review the fundamental concepts of a digital image processing system. • To examine various types of images, their intensity transformations and spatial filtering. • To analyze the different types of noises and the filters used to restore and reconstruct the images. • To create color images and pseudo images with smoothening and sharpening techniques. • To compare the various lossy and lossless compression mechanisms.
MCA546E2	Big Data Analytics	<ul style="list-style-type: none"> • Work with big data platform and Understand the fundamentals of various big data analysis techniques

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<ul style="list-style-type: none"> Analyze the big data analytic techniques for useful business applications. Design efficient algorithms for mining the data from large volumes. Examine the HADOOP and Map Reduce technologies associated with big data analytics Explore the applications of Big Data
MCA546E3	Cyber Forensics	<ul style="list-style-type: none"> Predict the forensics fundamentals and the various technologies used to avoid computer crimes. Illustrate different methods to collect and preserve digital evidence and Digital Crime Scene. Identify and Analyze Forensic Technical Surveillance Devices. Evaluate the Various tools and tactics followed in military. Demonstrate the Usage of surveillance tools for tracking cyber criminals
MCA546E4	High Speed Networks	<ul style="list-style-type: none"> Identify the building blocks and operation of high speed networking and ATM. Analyze the cause of congestion, traffic slow down and related

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<p>factors for Quality of Service Identify.</p> <ul style="list-style-type: none"> • Apply the concepts learnt in this course to optimize performance of high-speed networks using Flow Control. • Compare the different architectures used for HSN. • Describe the protocols that are used to design high speed networks.
MCA547E1	Soft Computing	<ul style="list-style-type: none"> • Explore the functional components of artificial neural networks. • Examine the principles of back propagation networks. • Expose the students to the concepts of predicting the functionalities of ART. • Analyze the logic principle of classical sets and fuzzy set operations in fuzzy set theory. • Identify the concept of fuzzification and defuzzification involved in various systems
MCA547E2	Wireless Sensor Networks	<ul style="list-style-type: none"> • Formulate the basic standardization of wireless networks. • Analyze the implementation of technologies related to WSN. • Identify and understand the security issues in ad hoc and sensor networks.

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<ul style="list-style-type: none"> • Compare the protocols and to promote the research work in this area. • Apply and solve problems in the applications of Wireless Networking Area.
MCA547E3	Software Project Management	<ul style="list-style-type: none"> • Deliver successful software projects that support organization's strategic goals • Match organizational needs to the most effective software development model • Plan and manage projects at each stage of the software development life cycle • Create project plans that address real-world management challenges • Develop the skills for tracking and controlling software deliverables • Predict the behaviour of people working in teams and to explore the ways of Managing people in Software Environments.
MCA547E4	Service Oriented Architecture	<ul style="list-style-type: none"> • The creation of SOA compliant web service using various technologies

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<ul style="list-style-type: none"> • Predict the various service oriented analysis techniques • Apply the knowledge on advanced concepts of service composition, Orchestration and Choreography. • Understand web service framework with respect to SOA. • Understand various open standards available for developing SOA compliant web services.
MCA548	Internet Programming using J2EE	<ul style="list-style-type: none"> • Create dynamic web pages, using Servlets and JSP. Make a reusable software component, using Java Bean. • invoke the remote methods in an application using Remote Method Invocation (RMI) • understand the multi-tier architecture of web-based enterprise applications using Enterprise JavaBeans (EJB)
MCA549	. NET Programming	<ul style="list-style-type: none"> • Know about multi-tier application development. • Create user interactive web pages using ASP.Net. • Create simple data binding applications using ADO.Net connectivity. • Performing Database operations for Windows Form and web applications.

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<ul style="list-style-type: none"> Develop web services.
MCA550	Lab IX- J2EE Programming	<ul style="list-style-type: none"> Design and develop Web applications Designing Enterprise based applications by encapsulating an application's business logic. Designing applications using pre-built frameworks.
MCA551	Lab X- . Net Programming	<ul style="list-style-type: none"> Create user interactive web pages using ASP.Net. CO Create simple data binding applications using ADO.Net connectivity. Performing Database operations for Windows Form and web applications.
MCA552	Skill Based Lab V- Domain Study	<ul style="list-style-type: none"> Identify the domain to be analyzed Prepare an in depth study on the recent trends in the chosen domain Present the various analysis using various tools Create a model on the analysis done Create a research paper from the analysis and findings
MCA553	Soft skills V- Interpersonal Skill for	<ul style="list-style-type: none"> Outline the roles played in workgroups and teams Describe how good communication influences working

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

	Corporate Readiness	relationship.
MCA554	Open Source Lab– III – Netbeans	<ul style="list-style-type: none"> Starts with Java development with Maven in NetBeans IDE Describe the complete Java development workflow, including testing

2017 – 2018

COURSE CODE	COURSE TITLE	COURSE OBJECTIVES
MCA101	Mathematical Foundation of Computer Science	<ul style="list-style-type: none"> Perform Logical operations and predicate calculus needed for computing skill . Analyze and Compare the various techniques for solving numerical equations. Apply the techniques of statistics and numerical methods to unravel problems by computers. Explain the set theory logic. Utilize the Knowledge of matrices for designing and solving

		<ul style="list-style-type: none"> Gain skills to handle strings and files.
MCA108	Skill Based lab I – Linux	<ul style="list-style-type: none"> Use Linux utilities and develop shell scripts to perform tasks. Effectively use Linux environment to accomplish software development tasks. Monitor system performance and network activities.
MCA109	Soft Skills I - Communicative English	<ul style="list-style-type: none"> Display competence in oral and written communication. Use current technology related to the communication
MCA211	Resource Management Techniques	<ul style="list-style-type: none"> Identify the applications of Operations Research and methods to solve business problems. Apply linear programming to solve operational problem with constraints. Apply transportation and assignment models to find optimal solution in warehousing and Travelling, Prepare project scheduling using PERT and CPM. Use optimization concepts in real world problems
MCA212	Data Structures and Algorithms	<ul style="list-style-type: none"> Select appropriate data structures as applied to specified problem definition.

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<ul style="list-style-type: none"> • Implement operations like searching, insertion, deletion and traversing in trees. • Compare the data structures of advanced search trees. • Implement appropriate heap operations, sorting, searching techniques for a given problem. • Determine and analyze the complexity of graph Algorithms.
MCA213	Software Engineering	<ul style="list-style-type: none"> • Compare the different domains and process models. • Identify the data, class and flow oriented modeling concepts. • Analyze on the design oriented concepts. • Identify the managerial aspects of software development. • Generate project schedule for different activities of software development
MCA214	Relational Database Management Systems	<ul style="list-style-type: none"> • Design conceptual models of a database using ER model. • Outline the features of DBMS and Relational Database design. • Retrieve information from database by formulating complex SQL Queries. • Utilize PL/SQL programming to solve problems. • Implement Packages, Triggers for efficient retrieval of

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		information.
MCA215	Objected Oriented Programming in C++	<ul style="list-style-type: none"> • Outline the process and mechanism of functions. • Identify the relation between arrays and pointers, and use them efficiently in program • Use C++ classes for code reusability. • Discuss on the concept of function and operator overloading, virtual functions and polymorphism • Demonstrate the power of templates for generic programming.
MCA216	Lab –III RDBMS Lab	<ul style="list-style-type: none"> • Enhance Programming skills and techniques. • Formulate complex queries using SQL • Use the PL/SQL code constructs of IF-THEN-ELSE and LOOP types as well as syntax and command functions.
MCA217	Lab IV- C++ Lab	<ul style="list-style-type: none"> • Develop programs in object oriented paradigm. • Analyze, use, and create different types of functions and classes. • Design programs to implement various data structure concepts

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

MCA218	Skill Based Lab II- Multimedia Lab	<ul style="list-style-type: none"> • Model objects using a variety of techniques • Design and apply materials • Adjust basic lighting • Animate simple objects • Build and animate simple, effective environments
MCA219	Soft Skills II – Colloquium	<ul style="list-style-type: none"> • Identify the communication differences in working environment with different cultural styles. • Practice the skills and behaviors required to facilitate a group. • Demonstrate an effective presentation in a meeting.
MCA321	System Software	<ul style="list-style-type: none"> • Understand the basics of system programs like editors, compiler, assembler, linker, loader, interpreter and debugger. • Describe the various concepts of assemblers and macro-processors. • Understand the various phases of compiler and compare its working with assembler.
MCA322	Data Communication And Networking	<ul style="list-style-type: none"> • Identify the functionalities of Networking layers of both OSI and TCP/IP reference models.

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<ul style="list-style-type: none"> Analyze the design issues of Data link layer and techniques to resolve it. Compare the principles of Switching and Routing algorithm. Predict the TCP and UDP related procedures. Outline the Application layer protocols.
MCA323E1	E-Commerce	<ul style="list-style-type: none"> Gain a comprehensive understanding of the E-Commerce landscape, current and emerging technology and infrastructure underpinnings of the business. Analyze the impact of E-commerce on business models and strategy. Develop an understanding on how internet can help business grow/ Describe the infrastructure for E-commerce Assess electronic payment systems Gain an understanding on the importance of security, privacy, and ethical issues as they relate to E-Commerce.
MCA323E2	Distributed Operating System	<ul style="list-style-type: none"> To learn the fundamentals of Distributed Operating Systems. To learn the mechanisms involved in memory management in Distributed OS

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<ul style="list-style-type: none"> • .Analyze the various device and resource management techniques for timesharing and distributed systems • Understand the Mutual exclusion, Deadlock detection and agreement protocols of Distributed operating system • Interpret the mechanisms adopted for file sharing in distributed Applications
MCA323E3	Theory of Computation	<ul style="list-style-type: none"> • Discuss key notions of computation, such as algorithm, computability, decidability, reducibility, and complexity, through problem solving. • Explain the models of computation, including formal languages, grammars and automata, and their connections. • State and explain the Church-Turing thesis and its significance. • Analyze and design finite automata, pushdown automata, Turing machines, formal languages, and grammars. • Solve computational problems regarding their computability and complexity and prove the basic results of the theory of computation.
MCA323E4	Embedded Systems	<ul style="list-style-type: none"> • Understand hardware and software design requirements

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<p>of embedded systems.</p> <ul style="list-style-type: none"> Analyze the embedded systems' specification and develop software programs. Evaluate the requirements of programming Embedded Systems, related software architectures and tool chain for Embedded Systems.
MCA324	Advanced Programming Principles	<ul style="list-style-type: none"> Design, implement, test and debug programs that use loops and arrays. Design, implement, test and debug programs that use functions. Design, implement, test and debug programs that use arrays for character strings and that use pointers for character strings. Use if-else statements and switch-case statements to write programs in Python to tackle any decision-making scenario. Master Object-oriented programming to create an entire Python project using objects and classes. Store and retrieve information using variables
MCA325	Programming in JAVA	<ul style="list-style-type: none"> Apply the basic Java constructs to develop solutions to real time

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<p>problems.</p> <ul style="list-style-type: none"> Analyze the hierarchy of java classes to develop object oriented programs. Design software in Java using Packages and Threads. Implement Concepts of AWT for creating GUI. Design a Software using JDBC.
MCA326	Lab – V- Advanced C & Python Programming	<ul style="list-style-type: none"> Understand basic data structures such as arrays, linked lists, stack using pointers Describe the Python language syntax including control statements, loops and functions to write programs Examine the core data structures like lists, dictionaries, tuples and sets in Python to store, process and sort the data
MCA327	Lab – VI- JAVA Programming	<ul style="list-style-type: none"> Apply the basic Java constructs to develop solutions to real time problems. Analyze the hierarchy of java classes to develop object oriented programs. Design software in Java using Packages and Threads. Implement Concepts of AWT for creating GUI.

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<ul style="list-style-type: none"> Design a Software using JDBC.
MCA328	Skill Based Lab III- HTML, CSS.	<ul style="list-style-type: none"> Design and develop attractive WebPages. Implement a variety of presentation effects in html documents using CSS. Write valid standards-conformant html documents using variety of form elements
MCA329	Soft skills III – Quantitative Aptitude	<ul style="list-style-type: none"> Apply quantitative techniques to solve variety of problems. Perform statistical analysis to interpret information
MCA330	Open Source Lab– I Blender	<ul style="list-style-type: none"> Learn to Use Blender to Create Beautiful 3D Models From Zero. create valid and complete 3D meshes for use in visualization, games design, and 3D printing.
MCA433	Graph Theory	<ul style="list-style-type: none"> Write precise & accurate mathematical definitions of graph theory Apply the principles and concepts of graph theory in practical situations. Solve the problems using the concepts of Graphs and trees. Validate and critically assess a mathematical proof.

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<ul style="list-style-type: none"> Explore the modern applications of graph theory
MCA434E1	Computer Graphics	<ul style="list-style-type: none"> To list the basic concepts used in computer graphics. To implement various algorithms to scan, convert the basic geometrical primitives, transformations, Area filling, clipping. To describe the importance of 2 dimensional and 3 dimensional transformations. To define the fundamentals of multimedia systems and compression. To understand different standards of file format and multimedia Input/Output technologies.
MCA434E2	Data Mining & Data Warehousing	<ul style="list-style-type: none"> Practice the pre-processing operations of data. Compare & contrast OLTP, OLAP and Data mining as techniques for extracting knowledge from a Data Warehouse. Perform Association Rule Mining for Market Basket Analysis. Design & deploy the appropriate Classification and Clustering techniques. Explore the recent trends in data mining.

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

MCA434E3	Compiler Design	<ul style="list-style-type: none"> • To analyze the basic concepts and applications of Compiler Design • To compare various lexical analyzers and grammars • To formulate the conversion process between finite automata, regular grammars with the transition and transformation methods • To demonstrate the knowledge of formal connection and relationship to expressions and languages • To identify if a language is regular, context-free, unambiguous after reducing it to normal forms
MCA434E4	Network Security and Cryptography	<ul style="list-style-type: none"> • Evaluate the fundamentals of networks security, security architecture, threats and vulnerabilities. • Compare Stream ciphers and block ciphers. • Apply the different cryptographic operations of public key cryptography. • Pertain the various Authentication schemes to simulate different applications. • Analyze various Security practices and System security

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		standards
MCA435E1	Software Testing	<ul style="list-style-type: none"> List a range of different software testing techniques and strategies and be able to apply specific(automated) unit testing method to the projects. Distinguish characteristics of structural testing methods. Demonstrate the integration testing which aims to uncover interaction and compatibility problems as early as possible. Discuss about the functional and system testing methods. Demonstrate various issues for object oriented testing.
MCA435E2	OOAD & UML	<ul style="list-style-type: none"> Describe the three pillars of object-orientation and explain the benefits of each. Create use case documents that capture requirements for a software system. Create class diagrams that model both the domain model and design model of a software system. Create interaction diagrams that model the dynamic aspects of a software system. Explain the facets of the Unified Process approach to designing

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<p>and building a software system.</p> <ul style="list-style-type: none"> Describe how design patterns facilitate development and list several of the most popular patterns.
MCA435E3	Ethics in Computing	<ul style="list-style-type: none"> Predict the relationship between the law, ethics and computer technology. Outline the philosophical and ethical debates with the ideas and the nature of intellectual creativity. Design the impact of computer technology on free speech. Formulate the ethical and legal issues of the impact that computing technologies had on workplace. Develop a personal standpoint in relation to Database society and the usage of biometric data
MCA435E4	Client/ Server Computing	<ul style="list-style-type: none"> Understand fundamental concepts of Client Server systems, system models of distributed systems, networks that distributed systems run on. Explore communication protocols between processes in distributed systems, Middleware, Enterprise Application integration, and Web Services Security

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<ul style="list-style-type: none"> • Gain Exposure on most common used servers. • Understand the concept of client-server development and learn problem solving skills through design scenarios for network environment. • Develop a client –server based application.
MCA436	Mobile communication & Application Development	<ul style="list-style-type: none"> • Identify, Predict and Evaluate Wireless Communication Protocols • Compare and analyze various multiplexing techniques in mobile environment. • Demonstrate the architectures, challenges and solutions of Wireless communication. • Assess the role of Wireless Networks in shaping the future internet. • Design and develop apps for mobiles using Android. • Apply Location Based Services of Android for ensuring women's safety and security
MCA437	Web Based Programming	<ul style="list-style-type: none"> • Develop a dynamic webpage by the use of java script and DHTML.

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<ul style="list-style-type: none"> • Connect with a DBMS and perform insert, update and delete operations on DBMS table. • Write a server side program • Perform various MySQL database queries
MCA438	Lab – VII – Mobile Application Development	<ul style="list-style-type: none"> • Install and configure Android application development tools. • Design and develop user Interfaces for the Android platform. • Apply Java programming concepts to Android application development. • Familiar with technology and business trends impacting mobile applications.
MCA439	Lab – VIII- PHP & MYSQL Lab	<ul style="list-style-type: none"> • Create a PHP web page that is unique to each visitor • Validate user input • Create, back up and restore a MySQL database
MCA440	Skill Based Lab IV- Software Testing Tools Lab	<ul style="list-style-type: none"> • Finding defects in the programs while developing the software. • Able to write test cases and test scenarios. • Develop the scripts for finding the defects and preventing them. • Understand the automated testing tools available

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

MCA441	Soft skills IV- Technical Aptitude	<ul style="list-style-type: none"> • Enhance the technical skills for employability. • Improve the proficiency of participation in competitive examinations
MCA442	Open Source Lab– II GIMP	<ul style="list-style-type: none"> • Demonstrate working with images. • Demonstrate working with selections, layers, and painting tools. • Demonstrate methods for photo retouching. • Demonstrate methods for making color corrections. • Demonstrate using masks and the quick mask mode
MCA545	Cloud Computing	<ul style="list-style-type: none"> • Compare the strengths and limitations of cloud computing. • Identify the architecture, infrastructure and delivery models of cloud computing. • Apply suitable virtualization concept. • Choose the appropriate Cloud player, Programming Models and approach. • Address the core issues of cloud computing such as security, privacy and interoperability
MCA546E1	Digital Image Processing	<ul style="list-style-type: none"> • To review the fundamental concepts of a digital image

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<p>processing system.</p> <ul style="list-style-type: none"> • To examine various types of images, their intensity transformations and spatial filtering. • To analyze the different types of noises and the filters used to restore and reconstruct the images. • To create color images and pseudo images with smoothening and sharpening techniques. • To compare the various lossy and lossless compression mechanisms.
MCA546E2	Big Data Analytics	<ul style="list-style-type: none"> • Work with big data platform and Understand the fundamentals of various big data analysis techniques • Analyze the big data analytic techniques for useful business applications. • Design efficient algorithms for mining the data from large volumes. • Examine the HADOOP and Map Reduce technologies associated with big data analytics • Explore the applications of Big Data

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

MCA546E3	Cyber Forensics	<ul style="list-style-type: none"> • Predict the forensics fundamentals and the various technologies used to avoid computer crimes. • Illustrate different methods to collect and preserve digital evidence and Digital Crime Scene. • Identify and Analyze Forensic Technical Surveillance Devices. • Evaluate the Various tools and tactics followed in military. • Demonstrate the Usage of surveillance tools for tracking cyber criminals
MCA546E4	High Speed Networks	<ul style="list-style-type: none"> • Identify the building blocks and operation of high speed networking and ATM. • Analyze the cause of congestion, traffic slow down and related factors for Quality of Service Identify. • Apply the concepts learnt in this course to optimize performance of high-speed networks using Flow Control. • Compare the different architectures used for HSN. • Describe the protocols that are used to design high speed networks.

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

MCA547E1	Soft Computing	<ul style="list-style-type: none"> • Explore the functional components of artificial neural networks. • Examine the principles of back propagation networks. • Expose the students to the concepts of predicting the functionalities of ART. • Analyze the logic principle of classical sets and fuzzy set operations in fuzzy set theory. • Identify the concept of fuzzification and defuzzification involved in various systems
MCA547E2	Wireless Sensor Networks	<ul style="list-style-type: none"> • Formulate the basic standardization of wireless networks. • Analyze the implementation of technologies related to WSN. • Identify and understand the security issues in ad hoc and sensor networks. • Compare the protocols and to promote the research work in this area. • Apply and solve problems in the applications of Wireless Networking Area.
MCA547E3	Software Project	<ul style="list-style-type: none"> • Deliver successful software projects that support organization's strategic goals

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

	Management	<ul style="list-style-type: none"> • Match organizational needs to the most effective software development model • Plan and manage projects at each stage of the software development life cycle • Create project plans that address real-world management challenges • Develop the skills for tracking and controlling software deliverables • Predict the behavior of people working in teams and to explore the ways of Managing people in Software Environments.
MCA547E4	Service Oriented Architecture	<ul style="list-style-type: none"> • The creation of SOA compliant web service using various technologies • Predict the various service oriented analysis techniques • Apply the knowledge on advanced concepts of service composition, Orchestration and Choreography. • Understand web service framework with respect to SOA. • Understand various open standards available for developing SOA compliant web services.

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

MCA548	Internet Programming using J2EE	<ul style="list-style-type: none"> • Create dynamic web pages, using Servlets and JSP. Make a reusable software component, using Java Bean. • invoke the remote methods in an application using Remote Method Invocation (RMI) • Understand the multi-tier architecture of web-based enterprise applications using Enterprise JavaBeans (EJB)
MCA549	. NET Programming	<ul style="list-style-type: none"> • Know about multi-tier application development. • Create user interactive web pages using ASP.Net. • Create simple data binding applications using ADO.Net connectivity. • Performing Database operations for Windows Form and web applications. • Develop web services.
MCA550	Lab IX- J2EE Programming	<ul style="list-style-type: none"> • Design and develop Web applications • Designing Enterprise based applications by encapsulating an application's business logic. • Designing applications using pre-built frameworks.

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

MCA551	Lab X- . Net Programming	<ul style="list-style-type: none"> • .Create user interactive web pages using ASP.Net. • Create simple data binding applications using ADO.Net connectivity. • Performing Database operations for Windows Form and web applications.
MCA552	Skill Based Lab V- Domain Study	<ul style="list-style-type: none"> • Identify the domain to be analysed • Prepare an in depth study on the recent trends in the chosen domain • Present the various analysis using various tools • Create a model on the analysis done • Create a research paper from the analysis and findings
MCA553	Soft skills V- Interpersonal Skill for Corporate Readiness	<ul style="list-style-type: none"> • Outline the roles played in workgroups and teams • Describe how good communication influences working relationship.
MCA554	Open Source Lab- III – Netbeans	<ul style="list-style-type: none"> • Starts with Java development with Maven in NetBeans IDE • Describe the complete Java development workflow, including testing

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

2016 – 2017

COURSE CODE	COURSE TITLE	COURSE OBJECTIVES
MCA101	Mathematical Foundation of Computer Science	<ul style="list-style-type: none"> • Perform Logical operations and predicate calculus needed for computing skill. • Analyze and Compare the various techniques for solving numerical equations. • Apply the techniques of statistics and numerical methods to unravel problems by computers. • Explain the set theory logic. • Utilize the Knowledge of matrices for designing and solving problems
MCA102	Digital Principles and Computer Organization	<ul style="list-style-type: none"> • Ability to perform arithmetic operations in various number systems. • Conceptualize the basics of organizational and architectural issues of a digital computer. • Demonstrate and perform computer arithmetic operations on integer and real numbers. • Identify logic for assembly language programming.

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<ul style="list-style-type: none"> Analyze the performance of Reduced Instruction Set Architecture.
MCA103	Operating Systems	<ul style="list-style-type: none"> Ability to perform arithmetic operations in various number systems. Conceptualize the basics of organizational and architectural issues of a digital computer. Demonstrate and perform computer arithmetic operations on integer and real numbers. Identify logic for assembly language programming. Analyze the performance of Reduced Instruction Set Architecture.
MCA104	Visual Programming	<ul style="list-style-type: none"> Develop GUI applications. Design and Deploy application programs. Design and implement applications using databases.
MCA105	Programming in C	<ul style="list-style-type: none"> Identify the basic terminologies used in C programming. Design programs involving decision structures and loops. Implement code reusability with the help of user defined functions. Develop advanced applications using nested structures. Demonstrate the dynamics of memory by the use of pointers and files.

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<p>agreement protocols of Distributed operating system</p> <ul style="list-style-type: none"> • Interpret the mechanisms adopted for file sharing in distributed Applications
MCA323E3	Theory of Computation	<ul style="list-style-type: none"> • Discuss key notions of computation, such as algorithm, computability, decidability, reducibility, and complexity, through problem solving. • Explain the models of computation, including formal languages, grammars and automata, and their connections. • State and explain the Church-Turing thesis and its significance. • Analyze and design finite automata, pushdown automata, Turing machines, formal languages, and grammars. • solve computational problems regarding their computability and complexity and prove the basic results of the theory of computation.
MCA323E4	Embedded Systems	<ul style="list-style-type: none"> • Understand hardware and software design requirements of embedded systems. • Analyze the embedded systems' specification and develop software programs. • Evaluate the requirements of programming Embedded Systems,

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		related software architectures and tool chain for Embedded Systems.
MCA324	Advanced Programming Principles	<ul style="list-style-type: none"> • Design, implement, test and debug programs that use loops and arrays. • Design, implement, test and debug programs that use functions. • Design, implement, test and debug programs that use arrays for character strings and that use pointers for character strings. • Use if-else statements and switch-case statements to write programs in Python to tackle any decision-making scenario. • Master Object-oriented programming to create an entire Python project using objects and classes. • Store and retrieve information using variables
MCA325	Programming in JAVA	<ul style="list-style-type: none"> • Apply the basic Java constructs to develop solutions to real time problems. • Analyze the hierarchy of java classes to develop object oriented programs. • Design software in Java using Packages and Threads. • Implement Concepts of AWT for creating GUI.

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<ul style="list-style-type: none"> Design a Software using JDBC.
MCA326	Lab – V- Advanced C & Python Programming	<ul style="list-style-type: none"> Understand basic data structures such as arrays, linked lists, stack using pointers Describe the Python language syntax including control statements, loops and functions to write programs Examine the core data structures like lists, dictionaries, tuples and sets in Python to store, process and sort the data
MCA327	Lab – VI- JAVA Programming	<ul style="list-style-type: none"> Apply the basic Java constructs to develop solutions to real time problems. Analyze the hierarchy of java classes to develop object oriented programs. Design software in Java using Packages and Threads. Implement Concepts of AWT for creating GUI. Design a Software using JDBC.
MCA328	Skill Based Lab III- HTML, CSS.	<ul style="list-style-type: none"> Design and develop attractive WebPages. Implement a variety of presentation effects in html documents using CSS.

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<ul style="list-style-type: none"> Write valid standards-conformant html documents using variety of form elements
MCA329	Soft skills III – Quantitative Aptitude	<ul style="list-style-type: none"> Apply quantitative techniques to solve variety of problems. Perform statistical analysis to interpret information
MCA330	Open Source Lab– I Blender	<ul style="list-style-type: none"> Learn to Use Blender to Create Beautiful 3D Models From Zero. create valid and complete 3D meshes for use in visualization, games design, and 3D printing.
MCA433	Graph Theory	<ul style="list-style-type: none"> Write precise & accurate mathematical definitions of graph theory Apply the principles and concepts of graph theory in practical situations. Solve the problems using the concepts of Graphs and trees. Validate and critically assess a mathematical proof. Explore the modern applications of graph theory
MCA434E1	Computer Graphics	<ul style="list-style-type: none"> To list the basic concepts used in computer graphics.

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<ul style="list-style-type: none"> To implement various algorithms to scan, convert the basic geometrical primitives, transformations, Area filling, clipping. To describe the importance of 2 dimensional and 3 dimensional transformations. To define the fundamentals of multimedia systems and compression. To understand different standards of file format and multimedia Input/Output technologies.
MCA434E2	Data Mining & Data Warehousing	<ul style="list-style-type: none"> Practice the pre-processing operations of data. Compare & contrast OLTP, OLAP and Data mining as techniques for extracting knowledge from a Data Warehouse. Perform Association Rule Mining for Market Basket Analysis. Design & deploy the appropriate Classification and Clustering techniques. Explore the recent trends in data mining.
MCA434E3	Compiler Design	<ul style="list-style-type: none"> To analyze the basic concepts and applications of Compiler Design To compare various lexical analyzers and grammars

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<ul style="list-style-type: none"> To formulate the conversion process between finite automata, regular grammars with the transition and transformation methods To demonstrate the knowledge of formal connection and relationship to expressions and languages To identify if a language is regular, context-free, unambiguous after reducing it to normal forms
MCA434E4	Network Security and Cryptography	<ul style="list-style-type: none"> Evaluate the fundamentals of networks security, security architecture, threats and vulnerabilities. Compare Stream ciphers and block ciphers. Apply the different cryptographic operations of public key cryptography. Pertain the various Authentication schemes to simulate different applications. Analyze various Security practices and System security standards
MCA435E1	Software Testing	<ul style="list-style-type: none"> List a range of different software testing techniques and strategies and be able to apply specific(automated) unit testing method to the projects. Distinguish characteristics of structural testing methods.

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<ul style="list-style-type: none"> • Demonstrate the integration testing which aims to uncover interaction and compatibility problems as early as possible. • Discuss about the functional and system testing methods. • Demonstrate various issues for object oriented testing.
MCA435E2	OOAD & UML	<ul style="list-style-type: none"> • Describe the three pillars of object-orientation and explain the benefits of each. • Create use case documents that capture requirements for a software system. • Create class diagrams that model both the domain model and design model of a software system. • Create interaction diagrams that model the dynamic aspects of a software system. • Explain the facets of the Unified Process approach to designing and building a software system. • Describe how design patterns facilitate development and list several of the most popular patterns.
MCA435E3	Ethics in Computing	<ul style="list-style-type: none"> • Predict the relationship between the law, ethics and computer technology.

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<ul style="list-style-type: none"> • Outline the philosophical and ethical debates with the ideas and the nature of intellectual creativity. • Design the impact of computer technology on free speech. • Formulate the ethical and legal issues of the impact that computing technologies had on workplace. • Develop a personal standpoint in relation to DataBase society and the usage of biometric data.
MCA435E4	Client/ Server Computing	<ul style="list-style-type: none"> • Understand fundamental concepts of Client Server systems, system models of distributed systems, networks that distributed systems run on. • Explore communication protocols between processes in distributed systems, Middleware, Enterprise Application integration, and Web Services Security • Gain Exposure on most common used servers. • Understand the concept of client-server development and learn problem solving skills through design scenarios for network environment.

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<ul style="list-style-type: none"> Develop a client –server based application.
MCA436	Mobile communication & Application Development	<ul style="list-style-type: none"> Identify, Predict and Evaluate Wireless Communication Protocols Compare and analyze various multiplexing techniques in mobile environment. Demonstrate the architectures, challenges and solutions of Wireless communication. Assess the role of Wireless Networks in shaping the future internet. Design and develop apps for mobiles using Android. Apply Location Based Services of Android for ensuring women's safety and security
MCA437	Web Based Programming	<ul style="list-style-type: none"> Develop a dynamic webpage by the use of java script and DHTML. Connect with a DBMS and perform insert, update and delete operations on DBMS table. Write a server side program Perform various MySQL database queries
MCA438	Lab – VII – Mobile Application	<ul style="list-style-type: none"> Install and configure Android application development tools. Design and develop user Interfaces for the Android platform.

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

	Development	<ul style="list-style-type: none"> • Apply Java programming concepts to Android application development. • Familiar with technology and business trends impacting mobile applications.
MCA439	Lab – VIII- PHP &MySQL Lab	<ul style="list-style-type: none"> • Create various dynamic PHP web pages • Validate user input • Create, back up and restore a MySQL database
MCA440	Skill Based Lab IV- Software Testing Tools Lab	<ul style="list-style-type: none"> • Finding defects in the programs while developing the software. • Able to write test cases and test scenarios. • Develop the scripts for finding the defects and preventing them. • Understand the automated testing tools available
MCA441	Soft skills IV- Technical Aptitude	<ul style="list-style-type: none"> • Enhance the technical skills for employability. • Improve the proficiency of participation in competitive examinations
MCA442	Open Source Lab– II GIMP	<ul style="list-style-type: none"> • Demonstrate working with images. • Demonstrate working with selections, layers, and painting tools. • Demonstrate methods for photo retouching. • Demonstrate methods for making color corrections.

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<ul style="list-style-type: none"> • Demonstrate using masks and the quick mask mode
MCA545	Software project management	<ul style="list-style-type: none"> • Deliver successful software projects that support organization's strategic goals • Match organizational needs to the most effective software development model • Plan and manage projects at each stage of the software development life cycle • Create project plans that address real-world management challenges • Develop the skills for tracking and controlling software deliverables • Predict the behaviour of people working in teams and to explore the ways of Managing people in Software Environments.
MCA546E1	Cloud Computing	<ul style="list-style-type: none"> • Compare the strengths and limitations of cloud computing. • Identify the architecture, infrastructure and delivery models of cloud computing. • Apply suitable virtualization concept. • Choose the appropriate Cloud player, Programming Models and approach.

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<ul style="list-style-type: none"> Address the core issues of cloud computing such as security, privacy and interoperability
MCA546E2	Wireless Sensor Networks	<ul style="list-style-type: none"> Formulate the basic standardization of wireless networks. Analyze the implementation of technologies related to WSN. Identify and understand the security issues in ad hoc and sensor networks. Compare the protocols and to promote the research work in this area. Apply and solve problems in the applications of Wireless Networking Area.
MCA546E3	Human Resource Management	<ul style="list-style-type: none"> Explain the various functions of human resource management and identify their relationship to the workplace from the perspective of both employee and employer. Apply the principles of human resource management to the automotive industry in the areas of hiring, compensation and benefits. Government legislation. Identify social issues relating to human resource management Identify and predict human resource management trends in the

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<p>automotive industry and develop proactive solutions and techniques of adaptation to changing industry demands.</p> <ul style="list-style-type: none"> • Understand the policies and government legislation
MCA546E4	Service Oriented Architecture	<ul style="list-style-type: none"> • The creation of SOA compliant web service using various technologies • Predict the various service oriented analysis techniques • Apply the knowledge on advanced concepts of service composition, Orchestration and Choreography. • Understand web service framework with respect to SOA. • Understand various open standards available for developing SOA compliant web services.
MCA547E1	Soft Computing	<ul style="list-style-type: none"> • Explore the functional components of artificial neural networks. • Examine the principles of back propagation networks. • Expose the students to the concepts of predicting the functionalities of ART. • Analyze the logic principle of classical sets and fuzzy set operations in fuzzy set theory.

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<ul style="list-style-type: none"> Identify the concept of fuzzification and defuzzification involved in various systems
MCA547E2	Ethics in Computing	<ul style="list-style-type: none"> Predict the relationship between the law, ethics and computer technology. Outline the philosophical and ethical debates with the ideas and the nature of intellectual creativity. Design the impact of computer technology on free speech. Formulate the ethical and legal issues of the impact that computing technologies had on workplace. Develop a personal standpoint in relation to Database society and the usage of biometric data.
MCA547E3	Embedded Systems	<ul style="list-style-type: none"> Understand hardware and software design requirements of embedded systems. Analyze the embedded systems' specification and develop software programs. Evaluate the requirements of programming Embedded Systems, related software architectures and tool chain for Embedded Systems.

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

MCA547E4	Distributed Systems	<ul style="list-style-type: none"> • List the principles of distributed systems and describe the problems and challenges associated with these principles. • Understand Distributed Computing techniques, Synchronous and Processes. • Apply Shared Data access and Files concepts. • Design a distributed system that fulfils requirements with regards to key distributed systems properties. • Understand Distributed File Systems and Distributed Shared Memory. • Understand the importance of security in distributed systems
MCA548	Internet Programming using J2EE	<ul style="list-style-type: none"> • Create dynamic web pages, using Servlets and JSP. Make a reusable software component, using Java Bean. • invoke the remote methods in an application using Remote Method Invocation (RMI) • Understand the multi-tier architecture of web-based enterprise applications using Enterprise JavaBeans (EJB)
MCA549	. NET Programming	<ul style="list-style-type: none"> • Know about multi-tier application development.

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<ul style="list-style-type: none"> • Create user interactive web pages using ASP.Net. • Create simple data binding applications using ADO.Net connectivity. • Performing Database operations for Windows Form and web applications. • Develop web services.
MCA550	Lab XI- J2EE Programming	<ul style="list-style-type: none"> • Design and develop Web applications • Designing Enterprise based applications by encapsulating an application's business logic. • Designing applications using pre-built frameworks.
MCA551	Lab XII- . Net Programming	<ul style="list-style-type: none"> • Create user interactive web pages using ASP.Net. Create simple data binding applications using ADO.Net connectivity. • Performing Database operations for Windows Form and web applications.
MCA552	Skill Based Lab V- Domain Study	<ul style="list-style-type: none"> • Identify the domain to be analyzed • Prepare an in depth study on the recent trends in the chosen domain

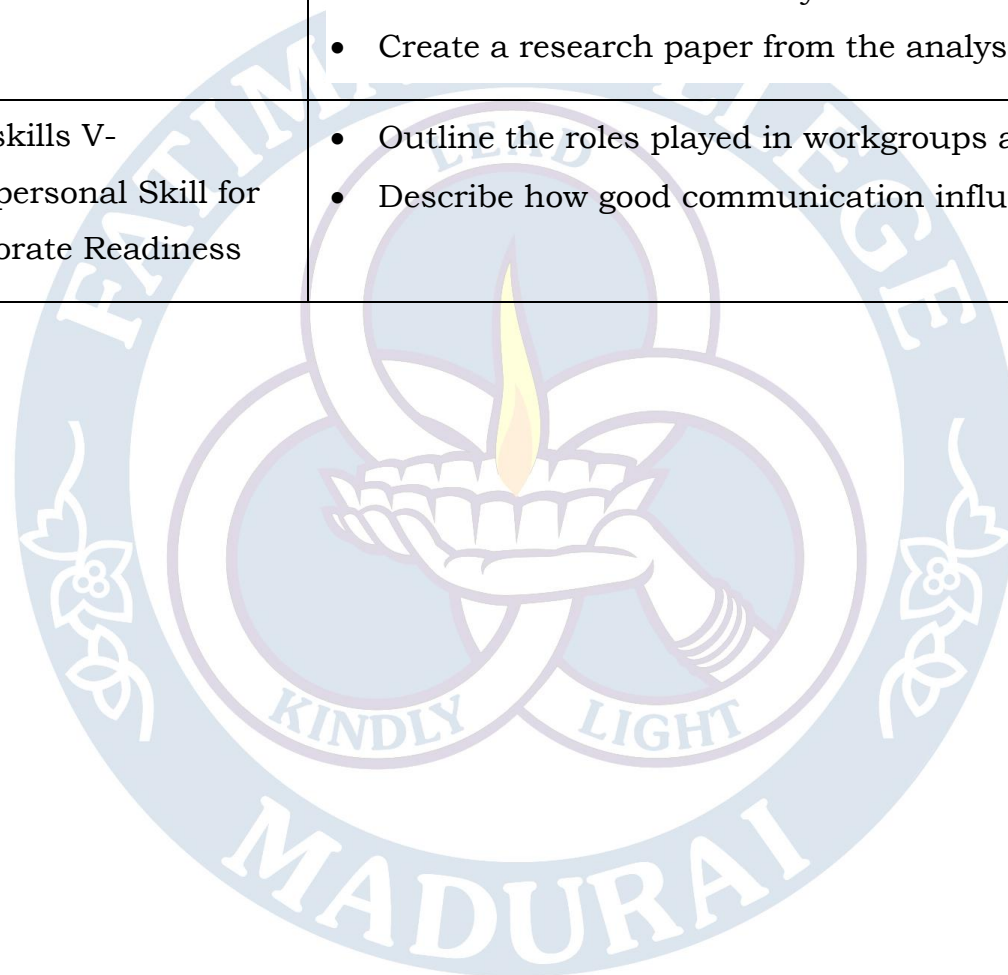

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<ul style="list-style-type: none"> • Present the various analysis using various tools • Create a model on the analysis done • Create a research paper from the analysis and findings
MCA553	Soft skills V- Interpersonal Skill for Corporate Readiness	<ul style="list-style-type: none"> • Outline the roles played in workgroups and teams • Describe how good communication influences working relationship.

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

2015 – 2016

COURSE CODE	COURSE TITLE	COURSE OBJECTIVES
MCA101	Mathematical Foundation of Computer Science	<ul style="list-style-type: none"> • Perform Logical operations and predicate calculus needed for computing skill. • Analyze and Compare the various techniques for solving numerical equations. • Apply the techniques of statistics and numerical methods to unravel problems by computers. • Explain the set theory logic. • Utilize the Knowledge of matrices for designing and solving problems
MCA102	Digital Principles and Computer Organization	<ul style="list-style-type: none"> • Ability to perform arithmetic operations in various number systems. • Conceptualize the basics of organizational and architectural issues of a digital computer. • Demonstrate and perform computer arithmetic operations on integer and real numbers.

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<ul style="list-style-type: none"> Identify logic for assembly language programming. Analyze the performance of Reduced Instruction Set Architecture.
MCA103	Operating Systems	<ul style="list-style-type: none"> Ability to perform arithmetic operations in various number systems. Conceptualize the basics of organizational and architectural issues of a digital computer. Demonstrate and perform computer arithmetic operations on integer and real numbers. Identify logic for assembly language programming. Analyze the performance of Reduced Instruction Set Architecture.
MCA104	Visual Programming	<ul style="list-style-type: none"> Develop GUI applications. Design and Deploy application programs. Design and implement applications using databases.
MCA105	Programming in C	<ul style="list-style-type: none"> Identify the basic terminologies used in C programming. Design programs involving decision structures and loops.

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<ul style="list-style-type: none"> Implement code reusability with the help of user defined functions. Develop advanced applications using nested structures. Demonstrate the dynamics of memory by the use of pointers and files.
MCA106	Lab II- Visual Programming & Tally	<ul style="list-style-type: none"> Develop GUI applications. Design and Deploy application programs. Design and implement applications using databases.
MCA107	Lab II- C Programming	<ul style="list-style-type: none"> Develop programs using branching statements and control statements. Create applications using arrays, functions, pointers and files. Gain skills to handle strings and files.
MCA108	Skill Based lab I - Linux	<ul style="list-style-type: none"> Use Linux utilities and develop shell scripts to perform tasks. Effectively use Linux environment to accomplish software development tasks. Monitor system performance and network activities.
MCA109	Soft Skills I -	<ul style="list-style-type: none"> Display competence in oral and written communication.

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

	Communicative English	<ul style="list-style-type: none"> • Use current technology related to the communication.
MCA211	Resource Management Techniques	<ul style="list-style-type: none"> • Identify the applications of Operations Research and methods to solve business problems. • Apply linear programming to solve operational problem with constraints. • Apply transportation and assignment models to find optimal solution in warehousing and Travelling, • Prepare project scheduling using PERT and CPM. • Use optimization concepts in real world problems
MCA212	Data Structures and Algorithms	<ul style="list-style-type: none"> • Select appropriate data structures as applied to specified problem definition. • Implement operations like searching, insertion, deletion and traversing in trees. • Compare the data structures of advanced search trees. • Implement appropriate heap operations, sorting, searching techniques for a given problem. • Determine and analyze the complexity of graph Algorithms.

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

MCA213	Software Engineering	<ul style="list-style-type: none"> • Compare the different domains and process models. • Identify the data, class and flow oriented modelling concepts. • Analyze on the design oriented concepts. • Identify the managerial aspects of software development. • Generate project schedule for different activities of software development
MCA214	Relational Database Management Systems	<ul style="list-style-type: none"> • Design conceptual models of a database using ER model. • Outline the features of DBMS and Relational Database design. • Retrieve information from database by formulating complex SQL Queries. • Utilize PL/SQL programming to solve problems. • Implement Packages, Triggers for efficient retrieval of information.
MCA215	Objected Oriented Programming in C++	<ul style="list-style-type: none"> • Outline the process and mechanism of functions. • Identify the relation between arrays and pointers, and use them efficiently in program • Use C++ classes for code reusability. • Discuss on the concept of function and operator overloading,

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<p>virtual functions and polymorphism</p> <ul style="list-style-type: none"> • Demonstrate the power of templates for generic programming.
MCA216	Lab –III RDBMS Lab	<ul style="list-style-type: none"> • Enhance Programming skills and techniques. • Formulate complex queries using SQL • Use the PL/SQL code constructs of IF-THEN-ELSE and LOOP types as well as syntax and command functions.
MCA217	Lab IV- C++ Lab	<ul style="list-style-type: none"> • Develop programs in object oriented paradigm. • Analyze, use, and create different types of functions and classes. • Design programs to implement various data structure concepts
MCA218	Skill Based Lab II- Multimedia Lab	<ul style="list-style-type: none"> • Model objects using a variety of techniques • Design and apply materials • Adjust basic lighting • Animate simple objects • Build and animate simple, effective environments
MCA219	Soft Skills II - Colloquium	<ul style="list-style-type: none"> • Identify the communication differences in working environment with different cultural styles.

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<ul style="list-style-type: none"> Practice the skills and behaviours required to facilitate a group. Demonstrate an effective presentation in a meeting.
MCA220	Comprehensive Viva-II	<ul style="list-style-type: none"> Identify the communication differences in working environment with different cultural styles. Practice the skills and behaviours required to facilitate a group. Demonstrate an effective presentation in a meeting.
MCA323	Resource Management Techniques	<ul style="list-style-type: none"> Identify the applications of Operations Research and methods to solve business problems. Apply linear programming to solve operational problem with constraints. Apply transportation and assignment models to find optimal solution in warehousing and Travelling, Prepare project scheduling using PERT and CPM. Use optimization concepts in real world problems
MCA324	Data Communication And Networking	<ul style="list-style-type: none"> Identify the functionalities of Networking layers of both OSI and TCP/IP reference models. Analyze the design issues of Datalink layer and techniques to

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<p>resolve it.</p> <ul style="list-style-type: none"> • Compare the principles of Switching and Routing algorithm. • Predict the TCP and UDP related procedures. • Outline the Application layer protocols.
MCA325E1	System Programming	<ul style="list-style-type: none"> • Understand the basics of system programs like editors, compiler, assembler, linker, loader, interpreter and debugger. • Describe the various concepts of assemblers and macro-processors. • Understand the various phases of compiler and compare its working with assembler.
MCA325E2	Distributed Operating Systems	<ul style="list-style-type: none"> • To learn the fundamentals of Distributed Operating Systems. • To learn the mechanisms involved in memory management in Distributed OS • .Analyze the various device and resource management techniques for timesharing and distributed systems • Understand the Mutual exclusion, Deadlock detection and agreement protocols of Distributed operating system • Interpret the mechanisms adopted for file sharing in distributed

Year : 2015 - 2020

		after reducing it to normal forms
MCA435E4	Digital Image Processing	<ul style="list-style-type: none"> • To review the fundamental concepts of a digital image processing system. • To examine various types of images, their intensity transformations and spatial filtering. • To analyze the different types of noises and the filters used to restore and reconstruct the images. • To create color images and pseudo images with smoothening and sharpening techniques. • To compare the various lossy and lossless compression mechanisms.
MCA436E1	Client / Server Computing	<ul style="list-style-type: none"> • Understand fundamental concepts of Client Server systems, system models of distributed systems, networks that distributed systems run on. • Explore communication protocols between processes in distributed systems, Middleware, Enterprise Application integration, and Web Services Security • Gain Exposure on most common used servers.

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<ul style="list-style-type: none"> Understand the concept of client-server development and learn problem solving skills through design scenarios for network environment. Develop a client –server based application.
MCA436E2	Network Security and Crypt Analysis	<ul style="list-style-type: none"> Evaluate the fundamentals of networks security, security architecture, threats and vulnerabilities. Compare Stream ciphers and block ciphers. Apply the different cryptographic operations of public key cryptography. Pertain the various Authentication schemes to simulate different applications. Analyze various Security practices and System security standards
MCA436E3	Computer Graphics and Multimedia	<ul style="list-style-type: none"> To list the basic concepts used in computer graphics. To implement various algorithms to scan, convert the basic geometrical primitives, transformations, Area filling, clipping. To describe the importance of 2 dimensional and 3 dimensional transformations.

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<ul style="list-style-type: none"> To define the fundamentals of multimedia systems and compression. To understand different standards of file format and multimedia Input/Output technologies.
MCA436E4	Component Based Technologies	<ul style="list-style-type: none"> Utilize framework and components in real time application creation. Understand different COM objects. Use Applet and Servlets in their component framework creation. Differentiate framework Vs Connectors. Know about Component distribution and acquisition.
MCA437	Mobile communication & Application Development	<ul style="list-style-type: none"> C01: Identify, Predict and Evaluate Wireless Communication Protocols C02: Compare and analyze various multiplexing techniques in mobile environment. C03: Demonstrate the architectures, challenges and solutions of Wireless communication. C04: Assess the role of Wireless Networks in shaping the future internet.

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<ul style="list-style-type: none"> • C05: Design and develop apps for mobiles using Android. • C06: Apply Location Based Services of Android for ensuring women's safety and security
MCA438	Web Engineering	<ul style="list-style-type: none"> • Develop a web application using server side programming languages and components. • Apply the web engineering methodologies for Web application development. • Develop a component based web solution and use UML diagrams to describe such a solution.
MCA439	Lab – IX – Mobile Application Development	<ul style="list-style-type: none"> • Install and configure Android application development tools. • Design and develop user Interfaces for the Android platform. • Apply Java programming concepts to Android application development. • Familiar with technology and business trends impacting mobile applications.
MCA440	Lab – X- Web Applications Using PHP	<ul style="list-style-type: none"> • Design and implement dynamic websites with good aesthetic sense of designing and latest technical know-how's.

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

	& MYSQL	<ul style="list-style-type: none"> Have a Good grounding of Web Application Terminologies, Internet Tools
MCA441	Skill Based Lab IV- Software Testing Tools Lab	<ul style="list-style-type: none"> Finding defects in the programs while developing the software. Able to write test cases and test scenarios. Develop the scripts for finding the defects and preventing them. Understand the automated testing tools available
MCA442	Soft skills IV- Technical Aptitude	<ul style="list-style-type: none"> Enhance the technical skills for employability. Improve the proficiency of participation in competitive examinations
MCA545	Software project management	<ul style="list-style-type: none"> Deliver successful software projects that support organization's strategic goals Match organizational needs to the most effective software development model Plan and manage projects at each stage of the software development life cycle Create project plans that address real-world management challenges

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<ul style="list-style-type: none"> • Develop the skills for tracking and controlling software deliverables • Predict the behaviour of people working in teams and to explore the ways of Managing people in Software Environments.
MCA546E1	Cloud Computing	<ul style="list-style-type: none"> • Compare the strengths and limitations of cloud computing. • Identify the architecture, infrastructure and delivery models of cloud computing. • Apply suitable virtualization concept. • Choose the appropriate Cloud player, Programming Models and approach. • Address the core issues of cloud computing such as security, privacy and interoperability
MCA546E2	Wireless Sensor Networks	<ul style="list-style-type: none"> • Formulate the basic standardization of wireless networks. • Analyze the implementation of technologies related to WSN. • Identify and understand the security issues in ad hoc and sensor networks. • Compare the protocols and to promote the research work in this area.

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<ul style="list-style-type: none"> • Apply and solve problems in the applications of Wireless Networking Area.
MCA546E3	Human Resource Management	<ul style="list-style-type: none"> • Explain the various functions of human resource management and identify their relationship to the workplace from the perspective of both employee and employer. • Apply the principles of human resource management to the automotive industry in the areas of hiring, compensation and benefits. Government legislation. • Identify social issues relating to human resource management • Identify and predict human resource management trends in the automotive industry and develop proactive solutions and techniques of adaptation to changing industry demands. • Understand the policies and government legislation
MCA546E4	Service Oriented Architecture	<ul style="list-style-type: none"> • The creation of SOA compliant web service using various technologies • Predict the various service oriented analysis techniques • Apply the knowledge on advanced concepts of service composition, Orchestration and Choreography.

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<ul style="list-style-type: none"> • Understand web service framework with respect to SOA. • Understand various open standards available for developing SOA compliant web services.
MCA547E1	Soft Computing	<ul style="list-style-type: none"> • Explore the functional components of artificial neural networks. • Examine the principles of back propagation networks. • Expose the students to the concepts of predicting the functionalities of ART. • Analyze the logic principle of classical sets and fuzzy set operations in fuzzy set theory. • Identify the concept of fuzzification and defuzzification involved in various systems
MCA547E2	Ethics in Computing	<ul style="list-style-type: none"> • Predict the relationship between the law, ethics and computer technology. • Outline the philosophical and ethical debates with the ideas and the nature of intellectual creativity. • Design the impact of computer technology on free speech. • Formulate the ethical and legal issues of the impact that computing technologies had on workplace.

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<ul style="list-style-type: none"> Develop a personal standpoint in relation to Database society and the usage of biometric data.
MCA547E3	Embedded Systems	<ul style="list-style-type: none"> Understand hardware and software design requirements of embedded systems. Analyze the embedded systems' specification and develop software programs. Evaluate the requirements of programming Embedded Systems, related software architectures and tool chain for Embedded Systems.
MCA547E4	Distributed Systems	<ul style="list-style-type: none"> List the principles of distributed systems and describe the problems and challenges associated with these principles. Understand Distributed Computing techniques, Synchronous and Processes. Apply Shared Data access and Files concepts. Design a distributed system that fulfils requirements with regards to key distributed systems properties. Understand Distributed File Systems and Distributed Shared Memory.

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<ul style="list-style-type: none"> Understand the importance of security in distributed systems
MCA548	Internet Programming using J2EE	<ul style="list-style-type: none"> Create dynamic web pages, using Servlets and JSP. Make a reusable software component, using Java Bean. invoke the remote methods in an application using Remote Method Invocation (RMI) Understand the multi-tier architecture of web-based enterprise applications using Enterprise JavaBeans (EJB)
MCA549	. NET Programming	<ul style="list-style-type: none"> Know about multi-tier application development. Create user interactive web pages using ASP.Net. Create simple data binding applications using ADO.Net connectivity. Performing Database operations for Windows Form and web applications. Develop web services.
MCA550	Lab XI- J2EE Programming	<ul style="list-style-type: none"> Design and develop Web applications Designing Enterprise based applications by encapsulating an application's business logic.

Criterion : II – Teaching-Learning and Evaluation

Metric : 2.6.1 – Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) – M.C.A

Year : 2015 - 2020

		<ul style="list-style-type: none"> Designing applications using pre-built frameworks.
MCA551	Lab XII- . Net Programming	<ul style="list-style-type: none"> .Create user interactive web pages using ASP.Net. Create simple data binding applications using ADO.Net connectivity. Performing Database operations for Windows Form and web applications.
MCA552	Skill Based Lab V- Domain Study	<ul style="list-style-type: none"> Identify the domain to be analyzed Prepare an in depth study on the recent trends in the chosen domain Present the various analysis using various tools Create a model on the analysis done Create a research paper from the analysis and findings
MCA553	Soft skills V- Interpersonal Skill for Corporate Readiness	<ul style="list-style-type: none"> Outline the roles played in workgroups and teams Describe how good communication influences working relationship.
