V.	A PICTORIAL JOURNEY WITH WRIGHT	165

Judith Wright is an icon of environmental movement. She campaigned against ecological issues like deforestation, soil erosion, extinction of native birds and animals. She explores the basic social causes of the ecological crisis, and she re-invents the earth anew with her scientific knowledge. She loved nature and felt the need to conserve it. What makes Wright one of the World's most important poets is that in a materialistic world, she has reestablished values of love for nature through her poetry.

Dr. P.V. Christi Shanthi, is an Associate Professor in English, working for Fatima College, Madurai, Tamil Nadu, India, She was awarded with doctoral degree by Madurai Kamaraj University, in the year 2014. Her area of interest is Eco criticism and Psychology. She likes travelling and her favorite spot is Himalayan ranges.
