## INTENSIFYING PERFORMANCE OF INDIAN MANUFACTURING INDUSTRY

DR.S.VANITHA

**Abstract:** Industrialization has major role to play in the economic development of the under developed countries. The gap in per capita income between the developed and under developed countries is largely affected by industries while in the latter production is confined predominantly to agriculture clearly revealing the positive relationship between per capita income and the share of manufacturing output. Undoubtedly, some countries have achieved relatively high per capita income by virtue of their fortunate natural resources endowments.

## RURAL INFRASTRUCTURE IN INDIA: TRIBULATIONS AND INSINUATION

DR. P. ANITA

**Abstract :** *India lives in Villages – Mahatma Gandhiji*

Indian economy is mounting rapidly. Industries and big corporate are contemporarily going globalized. There is an imbalanced changes in rural development and other sectors like IT, Manufacturing and service sector. There is a need to study as to why this disproportional progress and development. The author intends to probe answers to the questions as to why rural areas lag behind cities by decades, why rural areas lag behind cities in growth, why lack of opportunities in rural area, why rising disconnect between cities and villages. Further, an attempt has been made to study a five fold impact on the economy which correspond to mechanism through which the rural infrastructure could be raised and economic growth can be facilitated. This article highlights the role of government to improve infrastructure and the mode of raising funds to have better rural infrastructure.

**Key words:** Rural Development, Disconnect, Government, Funding.
