## Green Club Report 2018-2019

### ACTIVITY V

#### Bird Feeder

**DATE: 29/01/2019**

**Time: 1: 30 pm**

**Venue: Home Science Lab**

**Programme: Recycled bird feeders**

Our students designed the Bird feeder to feed the birds in our college. The main motto of this activity is to increase the number of birds and total species in our college campus. The waste bottles were collected from the students and they make it as a useful one. They fill the bottles with sand in the bottom layer and the different kinds of grains are mixed and filled in the bottle. In the summer season it is useful for the birds. This made students understand the significance of birds in the ecosystem and to recycle the waste boxes into artificial nest and bird feeders.

**OUTCOME:** Students learnt the importance of birds, their role in maintaining the ecological balance, and the destruction of their habitats and scarcity for food, they learnt to prepare simple bird feeders and implement it.
