ACTIVITY VI - Solid waste management

Date: 31- 01-2019

Time : 12 noon – 1: 30 pm

Venue : SF Herbal garden

Programme: Solid waste management

A compost pit was made ready by collecting the fruits and vegetable wastes regularly from the canteens and fruit stalls in the month of January and worms were introduced o 29th January 2019. The bed was prepared by layering the soil, Cow dung and the collected dry litter from the campus which was already put in regular basis in a pit located in the vermin compost shed. The main aim of the vermin compost shed is to convert the leaf litters and other organic wastes to useful manure.

Outcome: Students came to understand the preparation of compost manure using solid wastes, the method they can practice by themselves at home and even if interested can become a entrepreneur.
